Industrial and Commercial Applications of Smart Structures Technologies 2017

Dan J. Clingman
Editor

26–27 March 2017
Portland, Oregon, United States

Sponsored by
SPIE

Co-sponsored by
OZ Optics, Ltd. (United States)
Polytecn, Inc. (United States)
Fiberguide Industries (United States)
Frontiers Media (Switzerland)

Cooperating Organization
Jet Propulsion Laboratory (United States)

Published by
SPIE
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/17/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

### SESSION 1  ENERGY HARVESTING/SENSORS I

10166 02  A forty-year history of fiber optic smart structures (Invited Paper) [10166-1]
10166 03  Examination of single-substance multiphase material distribution in a cylindrical container using acoustic wavenumber spectroscopy [10166-2]
10166 04  A piezoelectric shock-loading response simulator for piezoelectric-based device developers [10166-3]

### SESSION 2  ENERGY HARVESTING/SENSORS II

10166 05  Piezoelectric-based hybrid reserve power sources for munitions [10166-4]
10166 06  Modal analysis of a loaded tire with non-contact measurements and piezoelectric excitation [10166-5]
10166 08  A new class of monolithic seismometers and accelerometers for commercial and industrial applications: the UNISA folded pendulum [10166-7]
10166 09  The development of two Broadband Vibration Energy Harvesters (BVEH) with adaptive conversion electronics [10166-8]

### SESSION 3  SMART MATERIALS AND APPLICATIONS I

10166 0B  Bimorph-driven synthetic jet actuators optimized for various piezoelectric materials using a low-order model [10166-10]
10166 0C  Self-tuning tuned mass damper (TMD) [10166-11]
10166 0D  An electro-dynamic 3-dimensional vibration test bed for engineering testing [10166-12]

### SESSION 4  SMART MATERIALS AND APPLICATIONS II

10166 0E  Preliminary aeroelastic assessment of a large aeroplane equipped with a camber-morphing aileron [10166-13]
SESSION 5  SMART MATERIALS AND APPLICATIONS III

10166 0F  Touchscreen surface based on interaction of ultrasonic guided waves with a contact impedance [10166-14]

10166 0G  Magnetorheological stabilizer bar for ground vehicles [10166-15]

10166 0H  Challenges and the state of the technology for printed sensor arrays for structural monitoring [10166-16]

10166 0I  Reinforcing cementitious structures by pH activated in-situ shrinking microfiber [10166-17]

10166 0J  A portable integrated system to control an active needle [10166-18]

10166 0K  Auto-Gopher-II: an autonomous wireline rotary-hammer ultrasonic drill [10166-19]

10166 0L  Experimental validation of a true-scale morphing flap for large civil aircraft applications [10166-20]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)
Theodoros E. Matikas, University of Ioannina (Greece)

Symposium Co-chairs

Tribikram Kundu, The University of Arizona (United States)
Gregory W. Reich, Air Force Research Laboratory (United States)

Conference Chair

Dan J. Clingman, Boeing Research and Technology (United States)

Conference Program Committee

Steven R. Anton, Tennessee Technological University (United States)
Diann E. Brei, University of Michigan (United States)
Peter C. Chen, NASA Goddard Space Flight Center (United States)
Marcelo J. Dapino, The Ohio State University (United States)
Kevin M. Farinholt, Luna Innovations Inc. (United States)
Xiao-Yan Gong, Medical Implant Mechanics LLC (United States)
Steven F. Griffin, The Boeing Company (United States)
Nancy L. Johnson, General Motors Corporation (United States)
Jayanth N. Kudva, NextGen Aeronautics, Inc. (United States)
Amrita Kumar, Acellent Technologies, Inc. (United States)
Jung-Ryul Lee, KAIST (Korea, Republic of)
Donald J. Leo, The University of Georgia (United States)
Geoffrey P. McKnight, HRL Laboratories, LLC (United States)
Tobias Melz, Fraunhofer-Institut für Betriebsfestigkeit und Systemzuverlässigkeit (Germany)
Christopher Niezrecki, University of Massachusetts Lowell (United States)
Gyuhee Park, Chonnam National University (Korea, Republic of)
W. Lance Richards, NASA Dryden Flight Research Center (United States)
Janet M. Sater, Institute for Defense Analyses (United States)
Edward V. White, The Boeing Company (United States)

Session Chairs

1. Energy Harvesting/Sensors I
   Frederick Tad Calkins, The Boeing Company (United States)

2. Energy Harvesting/Sensors II
   Dan J. Clingman, Boeing Research and Technology (United States)
3  Smart Materials and Applications I
   Bardia Konh, University of Hawai‘i at Manoa (United States)

4  Smart Materials and Applications II
   Bardia Konh, University of Hawai‘i at Manoa (United States)

5  Smart Materials and Applications III
   Christopher S. Lynch, University of California, Los Angeles (United States)
