ix Introduction

OPTICAL STORAGE AND DISPLAY TECHNOLOGY

10459 02 Study of the traditional Chinese pigments by terahertz time-domain and Fourier-transform infrared spectroscopy [10459-1]

10459 03 Reconstruction of on-axis lensless Fourier transform digital hologram with the screen division method [10459-3]

10459 04 A smart bending sensor based on microstructured fiber [10459-4]

10459 05 Improved depth estimation with the light field camera [10459-5]

10459 06 A novel method of one-step reflection hologram [10459-6]

10459 07 Using spatial frequency index method to cull occlusion for computer generated hologram [10459-7]

10459 08 A wavelet filtering method for parasitic interference ring based on gradient wavefront [10459-9]

10459 09 The application of diffraction grating in the design of virtual reality (VR) system [10459-10]

10459 0A Infrared dim small target segmentation method based on ALI-PCNN model [10459-11]

10459 0B Methods of building dense multi-view autostereoscopic display and its hardware requirements [10459-12]

10459 0C A method of LED free-form tilted lens rapid modeling based on scheme language [10459-13]

10459 0D Studies on the trapped-mode resonant properties in asymmetric terahertz metamaterial [10459-14]

10459 0E Increasing power and amplified spontaneous emission suppression for weak signal amplification in pulsed fiber amplifier [10459-16]

10459 0F The research on multi-projection correction based on color coding grid array [10459-17]
Super multi-view three-dimensional display with small light intensity ripple and high spatial resolution [10459-18]

Influence of asymmetric structures on electromagnetic response characteristics of terahertz metamaterials [10459-19]

Focus-tunable liquid cylindrical lens based on electrowetting [10459-20]

A panoramic imaging system based on fish-eye lens [10459-21]

Research of real-time video processing system based on 6678 multi-core DSP [10459-22]

Real-time free-viewpoint DIBR for large-size 3DLED [10459-23]

Electronic sand table three-dimensional display with the wide field of view [10459-24]

Markerless client-server augmented reality system with natural features [10459-25]

Integrated large view angle hologram system with multi-SLM [10459-26]

Analysis of the diffraction effects for a multi-view autostereoscopic three-dimensional display system based on shutter parallax barriers with full resolution [10459-28]

Demonstration of arbitrary views based on autostereoscopic three-dimensional display system [10459-29]

Augmented reality glass-free three-dimensional display with the stereo camera [10459-32]

Fabrication and performance study of light guide plate for LCD backlight based on quantum-dot scattering microstructure array [10459-33]

A performance test system for medium-wave imaging system with large field of view [10459-34]

Direct design of achromatic lens for Lambertian sources in collimating illumination [10459-37]

Design of CMOS imaging system based on FPGA [10459-38]

Creating a dynamic color hologram through the coding method [10459-39]

Generation of Olympic logo with freeform lens array [10459-41]

Robust design study on the wide angle lens with free distortion for mobile lens [10459-42]

Design of low noise imaging system [10459-43]

Atomized scan strategy for high definition for VR application [10459-45]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committees

Conference Chairs

Guangjun Zhang, Beihang University (China)
Byoungho Lee, Seoul National University (Korea, Republic of)

Conference Committee

Desheng Jiang, Wuhan University of Technology (China)
Hequan Wu, Chinese Academy of Engineering (China)
Jianquan Yao, Tianjin University (China)
Jianwei Pan, University of Science and Technology of China (China)
Junhao Chu, Shanghai Institute of Technical Physics, CAS (China)
Junen Yao, Beihang University (China)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China)
Lin Li, The University of Manchester (United Kingdom)
Liwei Zhou, Beijing Institute of Technology (China)
Min Gu, RMIT University (Australia)
Shibin Jiang, AdValue Photonics Inc. (United States)
Toyohiko Yatagai, Utsunomiya University (Japan)
Wei Wang, Beijing Institute of Aerospace Control Devices, CASC (China)
Weidou Ni, Tsinghua University (China)
Zuyan Xu, Technical Institute of Physics & Chemistry, CAS (China)

Program Committee

Anand Krishna Asundi, Nanyang Technological University (Singapore)
Bing Zhao, Jilin University (China)
Byoungho Lee, Seoul National University (Korea, Republic of)
Carl Nardell, Terra Bella (United States)
Chunhua Shen, The University of Adelaide (Australia)
Haimei Gong, Shanghai Institute of Technical Physics, CAS (China)
Honghai Liu, University of Portsmouth (United Kingdom)
Huaidong Yang, Tsinghua University (China)
Huijie Zhao, Beihang University (China)
Jannick Rolland, Institute of Optics, University of Rochester (United States)
Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)
Jin Yu, Université Claude Bernard Lyon 1 (France)
Jinxue Wang, SPIE
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China)
Lin Li, The University of Manchester (United Kingdom)
Lan Jiang, Tsinghua University (China)
Long Zhang, Shanghai Institute of Optics and Fine Mechanics, CAS (China)
Mengxia Xie, Beijing Normal University (China)
Min Gu, RMIT University (Australia)
Min Qiu, Zhejiang University (China)
Shibin Jiang, AdValue Photonics Inc. (United States)
Suijian Xue, National Astronomical Observatories, CAS (China)
Tsutomu Shimura, The University of Tokyo (Japan)
Wei Hang, Xiamen University (China)
Wei Wang, Beijing Institute of Aerospace Control Devices of CASC (China)
Weibiao Chen, Shanghai Institute of Optics and Fine Mechanics, CAS (China)
Wolfgang Osten, Universität Stuttgart (Germany)
Xiandeng Hou, Sichuan University (China)
Xiangping Li, Jinan University (China)
Xiaocong Yuan, Shenzhen University (China)
Xiaodi Tan, Beijing Institute of Technology (China)
Yadong Jiang, University of Electronic Science and Technology of China (China)
Yanbiao Liao, Tsinghua University (China)
Yong Bi, Academy of Opto-Electronics, CAS (China)
Yongtian Wang, Beijing Institute of Technology (China)
Zhe Wang, Tsinghua University (China)
Zhiping Zhou, Peking University (China)

Session Chairs
1 Yongtian Wang, Beijing Institute of Technology (China)
2 Xiaodi Tan, Beijing Institute of Technology (China)
3 Xiangping Li, Jinan University (China)
4 Qionghua Wang, Sichuan University (China)
5 Xinzhu Sang, Beijing University of Posts and Telecommunications (China)
6 Jun Xia, Southeast University (China)
Introduction

Applied Optics and Photonics China (AOPC2017) is the annual conference of the CSOE, and one of the largest academic and industry activities in the field of optical and optoelectronic technology in China. The organization committee has built a platform of academic exchanges, industry exhibitions, and cooperation negotiations in one. There are 8 technical conferences, 7 themes of the Exhibition and approximately 600 technical presentations. We sincerely hope that the research and development of optoelectronic technology are promoted, and the international cooperation between industry and the optical and optoelectronic fields are enhanced.

AOPC2017 is technically co-sponsored by the Chinese Society for Optical Engineering, the Optical Society of Korea (OSK), Optics and Photonics Society of Singapore (OPSS), European Optical Society (EOS), Optical Society of Japan (OSJ) and SPIE. There are also 60 cooperative organizers to support the conference. We received over 1209 contributions from more than 15 countries, including the United States, the United Kingdom, Germany, France, Spain, Australia, Canada, Mexico, Brazil, Japan, Korea, Thailand, Singapore, the Russian Federation, China, and more. There are more than 700 presentations published in the Proceedings of SPIE. After careful discussion, we suggested four keynote speeches which are presented by famous scientists from Germany, Australia, Japan and China. 138 excellent invited talks were presented, 45 are from outside of China. Their presentations reflect first-class research in the field of optics and photonics technology. On behalf of the Organization Committee of AOPC, I express thanks to all the invited speakers and authors for their contributions and support of the conference.

Finally, on behalf of Prof. Zhuang Songlin, and other co-chairmen, and the Organization Committee of AOPC, I would like to heartily thank our sponsors and cooperating organizers for all they have done for the conference, the participants and friends for their interests and efforts in helping us to make the conference a success, the program committee for their effective work and valuable advice, and especially the AOPC2017 Secretariat and the staff of SPIE for their tireless effort and outstanding services in preparing the conference and publishing the Proceedings.

We wish AOPC2017 great success! Hope to see you next year!

Guofan Jin
