The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.
Contents

Authors vii

Conference Committee

SYSTEMS AND APPLICATIONS

10650 03  Electro-optical tracking considerations III [10650-2]
10650 04  Efficiency measurements for a digital-holography system [10650-3]
10650 05  Exploring mitigation of image blur due to atmospheric turbulence by utilizing multiple sensors to achieve optical path diversity [10650-4]

ATMOSPHERIC EFFECTS

10650 08  Signal-to-noise models for digital-holographic detection [10650-7]
10650 09  Accounting for optical refractivity and turbulence effects in optical wave propagation over long distances [10650-8]
10650 0A  Characterizing atmospheric turbulence over long paths using time-lapse imagery [10650-9]

TURBULENCE MITIGATION

10650 0B  Optically coherent image reconstruction in the presence of phase errors using advanced-prior models [10650-10]
10650 0C  ATACAMA: high performance atmospheric distortion correction using a Xilinx UltraScale+ [10650-11]
10650 0D  Variable aperture lucky look approach to imaging through deep turbulence [10650-12]
10650 0E  Mitigation of image intensity distortion using chaos-modulated image propagation through gamma-gamma atmospheric turbulence [10650-13]

MODELING, METRICS, AND TOOLS: JOINT SESSION WITH CONFERENCES 10625 AND 10650

10650 0H  Super-resolution in the presence of atmospheric optical turbulence [10650-16]
Estimating uncertainty in limiting resolution of full motion video

Validating pyBSM: a Python package for modeling imaging systems

Statistical evaluation of motion-based MTF for full-motion video using the Python-based PyBSM image quality analysis toolbox
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Arthur A. Morrish, Raytheon Space and Airborne Systems (United States)

Symposium Co-chair

Ruth L. Moser, Air Force Research Laboratory (United States)

Conference Chair

Eric J. Kelmelis, EM Photonics, Inc. (United States)

Conference Program Committee

Jeremy P. Bos, Michigan Technological University (United States)
Chris J. Cormier, Raytheon Company (United States)
Vincent Hamel, L-3 Wescam (Canada)
Jony Jiang Liu, U.S. Army Research Laboratory (United States)
Craig Olson, L-3 Sonoma EO (United States)
Kevin Rice, UTC Aerospace Systems (United States)
Michael A. Rucci, Air Force Research Laboratory (United States)

Session Chairs

1 Systems and Applications
   Ariel Sherman, EM Photonics, Inc. (United States)

2 Atmospheric Effects
   Steve C. J. Parker, RFEL Ltd. (United States)

3 Turbulence Mitigation
   James L. Bonnett, EM Photonics, Inc. (United States)

4 Modeling, Metrics, and Tools: Joint Session with Conferences 10625 and 10650
   Richard L. Espinola, U.S. Naval Research Laboratory (United States)
   Katrin Braesicke, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
   Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
   Nicolas Rivière, ONERA (France)
