Front Matter: Volume 10723
Optical Trapping and Optical Micromanipulation XV

Kishan Dholakia
Gabriel C. Spalding
Editors

19–23 August 2018
San Diego, California, United States

Sponsored by
SPIE

Cosponsored by
Laser Quantum (United Kingdom)

Published by
SPIE

Volume 10723
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)
ISBN: 9781510620179

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.
Contents

HOLOGRAPHIC OPTICAL SYSTEMS: FROM SPECKLE TO STUDIES OF NEURONS

10723 02 Volumetric display by movement of particles trapped in a laser via photophoresis (Invited Paper) [10723-1]

10723 03 Stiff traps using super-oscillating optical beams [10723-2]

10723 06 Spatio-temporal modulation of light for stimulating and recording neuronal activity [10723-5]

STATISTICAL MECHANICS OF SMALL SYSTEMS

10723 0A Fluctuation-dissipation of an active Brownian particle under confinement [10723-10]

SPECIAL SESSION HONORING HALINA RUBINSZTEIN-DUNLOP

10723 0E Optical trapping of individual magnetic nanoparticles (Invited Paper) [10723-15]

HIGH-SENSITIVITY DETECTORS I

10723 0H Tests of fundamental physics with optically levitated microspheres in high vacuum (Invited Paper) [10723-18]

10723 0J MEMS gravity sensors for imaging density anomalies (Invited Paper) [10723-20]

10723 0L Interaction of acoustic waves with optomechanical resonators and oscillators [10723-22]

MEASUREMENT OF FLUCTUATION-INDUCED EFFECTS

10723 0O Control over phase separation and nucleation using an optical-tweezing potential (Invited Paper) [10723-25]
RADIATION PRESSURE, TRACTOR BEAMS, AND SOLAR SAILS

10723 0Q  The Abraham-Minkowski momentum controversy for a linear magneto-dielectric medium [10723-27]

10723 0R  Energy, linear momentum, and angular momentum exchange between an electromagnetic wave-packet and a small particle [10723-28]

10723 0U  Verification of radiation pressure on a diffraction grating [10723-31]

10723 0V  Mechanical characterization of planar springs for compact radiation pressure power meters (Invited Paper) [10723-32]

REACTIVE OPTICAL MATTER

10723 0Y  Analysis of the dynamics of electric dipoles in fluctuating electromagnetic fields [10723-35]

HIGH-SENSITIVITY DETECTORS II

10723 11  Solid state laser cooling of optically levitated particles [10723-39]

10723 13  Infrared induced photo-dynamics of NV centres in optically trapped nanodiamond [10723-41]

10723 14  An apparatus for optical levitation of microspheres in high vacuum with rotational control [10723-42]

MICRORHEOLOGICAL PROBES AND STUDIES

10723 1D  Active microrheology using a two-particle system coupled by hydrodynamic interactions in optical tweezers [10723-51]

USING THE PHOTONIC TOOLBOX TO STUDY CELLS AND THEIR ORGANELLES

10723 1H  Studies of biflagellated microalgae adhesion using an optical trap system [10723-55]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
