## Part One

**OPTICAL SENSING AND IMAGING TECHNOLOGIES AND APPLICATIONS**

10846 02 Design of flexible small pixel readout integrated circuit (ROIC) with high input charge handling ability [10846-2]

10846 03 Accuracy analysis for target location with no control point for the camera loaded on space-based platform [10846-4]

10846 04 A non-reference image quality objective evaluation algorithm based on neural network [10846-5]

10846 05 Sum frequency generation of communication band pumped by sub-nanosecond micro-cavity laser [10846-6]

10846 06 Beam radius transformation of orbital angular momentum in free space optical communication system [10846-7]

10846 07 Research on laser proximity detection method based on optical circumferential scanning technology [10846-8]

10846 08 Hyperspectral anomaly detection based on laplace of Gaussian operator [10846-9]

10846 09 A research on HDR and low illumination imaging based on the dual channel monochrome sCMOS [10846-10]

10846 0A Error comparison and analysis of six-light-screen vertical target under different light-screen-array model [10846-14]

10846 0B Research on micro-motion target feature extraction based on inverse synthetic aperture laser radar [10846-15]

10846 0C Recovery of ammonia absorption spectroscopy using asynchronous differential detection [10846-16]

10846 0D Design of a balanced amplified photodetector based gas sensor [10846-17]
Design of fiber bundle imaging system [10846-18]

Analysis of UV-visible spectra of phthalocyanine compounds by quantum chemistry calculation [10846-19]

Underwater image enhancement algorithm based on RGB channels histogram equalization [10846-20]

An improved unscented Kalman filter for satellite tracking [10846-23]

A high-precision institutional design and mechanical performance analysis of the medium-wave infrared continuous zoom [10846-24]

Image motion compensation method on reflector multi degree of freedom of aerial cameras [10846-25]

An approach on motion blurred star map simulation for star sensor [10846-26]

Monte-Carlo investigation of cell packed geometries on detection properties in Wolter type square-pore micro-channel optics [10846-27]

Design of in-situ monitor system for lithium-ion battery based on multifunctional fiber [10846-28]

Real-time detection and recognition algorithm for hyperspectral small targets on ocean [10846-29]

A green-band Scheimpflug lidar system: feasibility studies for atmospheric remote sensing [10846-30]

Sub-blocks segmentation based on multi-feature fusion [10846-31]

Tilt error analysis for laser triangulation sensor based on ZEMAX [10846-32]

Shunting mode railway obstacles detection using feature fusion neural network [10846-33]

Full-waveform echo tomography radar target reconstruction modeling and simulation [10846-34]

A fast method for searching the best matching point of the automatic reconstruction of focal spot measurement using the steepest descent method [10846-35]

Image quality assessment method based on human visual system [10846-36]

The infrared polarization characteristics of ship-target in marine environment [10846-37]

Modeling and date analysis of the error propagation of double-theodolite wind data [10846-38]
| 10846 0Y | Research on wide-angle telescope array space target surveillance and orbit determination method [10846-39] |
|抬起 | Design of APD double temperature compensation circuit with high gain stability [10846-41] |
| 10846 10 | Calculation and analysis of working performance about spaceborne HgCdTe infrared detector affected by temperature [10846-42] |
| 10846 11 | Analysis of optical properties of different types of aerosol [10846-43] |
| 10846 12 | Highlight removal method in polarimetric images based on Stokes parameters [10846-45] |
| 10846 13 | Applications of InGaAs near-infrared linear scanning camera in solar cell inspection [10846-46] |
| 10846 14 | Hydrodynamic measurements in water tunnel using enhanced-sensitivity all-fiber Fabry-Perot strain gauges [10846-47] |
| 10846 15 | Integrated navigation method based on inertial and geomagnetic information fusion [10846-48] |
| 10846 16 | A fiber bragg grating sensing system for monitoring IGBT temperature distribution and thermal conduction state of upper surface silicone [10846-49] |
| 10846 17 | Research of algorithm for single gray-scale image haze removal [10846-50] |
| 10846 18 | Athermal design of a compact MWIR dual field-of-view optical system [10846-51] |
| 10846 19 | A real-time compensation method for blind pixels in infrared focal plane detectors based on spatio-temporal combined filtering [10846-52] |
| 10846 1A | Fiber-solid hybrid amplification laser system with high peak power and high beam quality [10846-53] |
| 10846 1B | GeSn on Si avalanche photodiodes for short wave infrared detection [10846-54] |
| 10846 1C | Simulation and experiment of diffractive optic imaging spectrometer [10846-55] |
| 10846 1D | Scheme for second-generation forest lidar based on few-photon mode [10846-56] |
| 10846 1E | A novel wind lidar system based on 1.55μm all-fiber coherent Doppler laser [10846-57] |
| 10846 1F | Condition detection of overhaul platform based on image processing [10846-58] |
| 10846 1G | Multi-scale kernel correlation filter for visual tracking [10846-59] |
| 10846 1H | Design and implementation of continuous weak grating demodulation system [10846-60] |
High sensitivity detection integrated cryogenic optical system [10846-61]

High resolution distance measurement using reverse frequency sample method [10846-64]

Research on target loss early warning of KCF algorithm based on hypothesis test [10846-65]

The influence about meteorological parameters on infrared detection distance of point targets [10846-66]

ESD design of radiation-hardened for UV AlGaN focal plane arrays readout circuit [10846-67]

Research on nonlinear focal plane stitching method for TDICCD space camera [10846-69]

A model of point target temperature estimation based on multispectral infrared [10846-70]

Part Two

High accuracy alignment facility for the receiver and transmitter of laser altimeter [10846-72]

Boresight test of the space camera [10846-73]

Remote sensing image segmentation based on a modified pulse coupled neural network [10846-74]

Hardware-in-the-loop simulation system for dual-star-sensor [10846-75]

The design of laser detection circuit with high reliability and large dynamic range based on APD [10846-76]

Design and research of a spectral data acquisition system for underwater in-situ detection [10846-77]

Real-time super-block-based star detection and centroid calculation [10846-79]

Generation of three-dimensional fluorescent spot with radially polarized Laguerre-Gaussian beams for STED microscopy imaging [10846-81]

Study on inner orientation element measurement method for plane array camera using self-calibration technique [10846-84]

Thermal design and verification for a small space remote sensing camera [10846-85]

Simulation of AlGaN avalanche photodiodes [10846-86]

Research and realization of geophysical system for HJ-2 satellite camera controller [10846-87]

Effect of electron scrubbing on gain and dynamic range of microchannel plate [10846-88]
Design of atmospheric polarization transmission analysis system based on multi information fusion [10846-89]

Denoising and dimensionality reduction based on PARAFAC decomposition for hyperspectral images [10846-90]

A real-time location method for sea surface target by aerial camera [10846-91]

A novel ellipse detection method for real-time applications [10846-92]

Negative differential capacitance in InGaAs/InAlAs photodetector [10846-93]

Research on temperature measurement by spontaneous Rayleigh-Brillouin scattering profile [10846-94]

A novel laser stripe center extraction method for pavement rut detection [10846-95]

Improved Lidar system based on optical bandpass filter [10846-96]

Edge detection in planet image using an improved partial area effect algorithms [10846-97]

Image mosaic of bionic compound eye imaging system based on image overlap rate prior [10846-100]

Influence of aerodynamic optics on the imaging quality degradation of an high-speed aircraft [10846-101]

Study on aerodynamic heat response of multi-free curvilinear surface dome of hypersonic vehicle [10846-102]

Research on multi-channel gain response nonuniformity correction technique for x-ray single-photon detection [10846-103]

Graphene infrared electromagnetic interference shielding filter on ZnS and As₄₀Se₆₀ substrates [10846-104]

Annealing effect on the photodiode properties of Be implanted InSb [10846-105]

Study of technology on spectral polarization imaging [10846-106]

Hyperspectral unmixing using graph-regularized and sparsity-constrained deep NMF [10846-107]

Study on preparation and sensitive properties of Ag-doped ZnO thin films [10846-108]

Study on a new type of green infrared stealth film material [10846-109]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Session Chairs

1. Infrared Sensing and Imaging Technology I
   Mircea Guina, Tampere University of Technology (Finland)

2. Image Processing and Analysis I
   Haimei Gong, Shanghai Institute of Technical Physics (China)

3. Infrared Sensing and Imaging Technology II
   Yi Gu, Shanghai Institute of Microsystem and Information Technology (China)

4. Image Processing and Analysis II
   Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)

5. Novel Laser Radar and Related Technology
   Dong Liu, Zhejiang University (China)

6. Ultra-violet and Visible Sensing and Imaging Technology
   Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)
Introduction

The International Symposium on Optoelectronic Technology and Application 2018 (OTA 2018) is the annual conference of the Chinese Society for Optical Engineering. It continues to be one of the largest academic and industrial conferences in the field of optical and optoelectronic technology in China. This year’s program included academic exchanges, industry exhibitions, and cooperation negotiations together in one event. There were five technical conferences, seven exhibition themes, and 600 technical negotiations. We sincerely hope that this event continues to promote research and development of optoelectronic technology and to enhance international cooperation in the optical and optoelectronic fields.

OTA 2018 was sponsored by The Division of Information and Electronic Engineering of the Chinese Academy of Engineering (China), and The Chinese Society for Optical Engineering (CSOE) (China). The conference was organized by the Chinese Society for Optical Engineering (CSOE) (China), the Photoelectronic Technology Committee, the Chinese Society of Astronautics (China), the Photoelectronic Industrialization Committee, CHIA (China), the Department of Cooperation and Coordination for Industry, Academe, and Research, CHIA (China), and the Science and Technology on Low-light-level Night Vision Laboratory (China). We received more than 759 contributions from more than 15 countries, including the United States, United Kingdom, Germany, France, Spain, Australia, Canada, Mexico, Brazil, Japan, Republic of Korea, Thailand, Singapore, Russian Federation and China. There were more than 400 contributions published in SPIE Proceedings, including 70 contributions from invited speakers. After careful discussion, six keynote speeches were selected and presented by famous scientists from the United States, United Kingdom, Republic of Korea, and China. There were 138 excellent invited talks, 45 from overseas, that reflected first-class level in the field of optics and photonics technology. On behalf of the OTA 2018 Organizing Committee, I would like to express thanks to all the invited speakers and authors for their contributions and support.

Finally, on behalf of the other Co-chairmen and the Organizing Committee, I would like to heartily thank our sponsors and cooperating organizers for all they have done for the conference, and to all of the participants and friends for their interests and efforts in helping us to make the conference a success. Thanks also to the Program Committee for their effective work and valuable advice, especially the Secretariat, and to the staff of SPIE for their tireless efforts and outstanding service preparing and publishing the proceedings.

We hope to see you next year!

Guangjun Zhang
