Volume 10839
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)
ISBN: 9781510623200

The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.
## Contents

| 10839 02 | Feasibility study of scanning optical focusing detection system [10839-1] |
| 10839 03 | Image tracking technology for dynamic angle measurement of machine vision [10839-2] |
| 10839 04 | An accelerated ICP registration algorithm for 3D point cloud data [10839-3] |
| 10839 05 | Feature extraction of three-point cloud images based on clustering analysis [10839-4] |
| 10839 06 | A high precision field angle detection technology applied to laser communication system [10839-7] |
| 10839 07 | Precision of the attitude algorithm of the strap-down inertial navigation system [10839-8] |
| 10839 08 | Study on the calibration technique for multi-directional affine projection in optical computerized tomography [10839-9] |
| 10839 09 | Real-time compensation of the time-skew and phase-mismatch for heterodyne DAS system [10839-10] |
| 10839 0A | Experiment on phase correction of reflection fringe based on camera calibration [10839-12] |
| 10839 0B | Research on reflection characteristics for a rectangular laser pulse passing through a Fabry-Perot interferometer [10839-13] |
| 10839 0C | The application of the digital filtering algorithms in the signal processing system of the micro-displacement sensor [10839-14] |
| 10839 0D | Research on photoelectric measurement method for filament diameter based on FPGA [10839-15] |
| 10839 0E | The laser screen technology research of the firing dispersion and initial velocity test of the high shooting frequency weapons [10839-16] |
Two methods comparison and verification for monochromator calibration of wavelength [10839-17]

Optimal modified lateral shearing interferometer for in-line damage morphology measurement [10839-18]

Research and design of synchronous phase shifting optical profile detection system [10839-19]

The design of motor vehicle exhaust carbon monoxide concentration detection system based on tunable diode laser absorption spectroscopy [10839-21]

Study on the effects of multiple factors on the photoacoustic detection of glucose [10839-22]

The theory model establishment and experiment measure of Lidar ranging signal in large incident angle condition [10839-23]

Application of variational mode decomposition method in Fourier transform profilometry [10839-24]

A spectral calibration approach for snapshot Image Mapping Spectrometer (IMS) [10839-27]

Analysis on uneven laser signal in laser guided weapon simulation [10839-28]

Develop the fiber coupling efficiency based on SPGD control algorithm [10839-30]

Research on obstacle detection and location of indoor robot based on LIDAR [10839-31]

The comparisons between the preconditioned conjugate-gradient method and the Fourier transform method in lateral shearing interferometry [10839-33]

The research on absolute distance measurement based on large-bandwidth reverse-synchronous dynamic frequency scanning interference [10839-36]

Design and Instrumentation of transmission digital holographic microscopy [10839-39]

Improvement of specular gloss measurements in SIMT [10839-40]

A digital filtering algorithm based on four-channel wavelet and its application in active optical system [10839-42]

The studies of noninvasive blood glucose monitoring using optical coherence tomography [10839-44]

Research on the UV energy measurement based on UV LEDs [10839-45]

The angular measurement of the motion direction of the stack motion platform based on the dual-frequency laser interferometer [10839-46]

A research on the dynamic range of the dual channel monochrome sCMOS [10839-47]
Optical axis parallelism calibration in three-channel filter-based non-imaging passive ranging system based on oxygen absorption [10839-48]

Study on irradiance metrology of single LED in comparison method [10839-49]

A device for comprehensive performance test of photoelectric system [10839-50]

Research on adaptive interferometric measurement of complex vibration environment [10839-53]

Study on spectral distribution and coherence length of light source [10839-56]

Optimized design of high-flux 2D magneto-optical trapping [10839-60]

Wavefront reconstruction in square region based on improved two-dimension Legendre polynomials [10839-63]

Study on image stitching algorithm of surface defects three-dimensional features measurement with transient interferometry [10839-64]

An improved feedforward controller design method [10839-65]

Fast measurement technique for obtaining the diffraction efficiency and its uniformity of a large-aperture pulse compression grating [10839-69]

Thin film thickness measurement based on laser heterodyne interferometry [10839-71]

Refractive index gradient measurement method based on the principle of Mach-Zehnder interference [10839-74]

Research on the software of the micro-displacement sensor in the active optical system based on FPGA [10839-76]

Study of wavefront reconstruction based on four-wave lateral shear interferometer method [10839-80]

Multi-wavelength investigation of the influence of polarization orientation on bulk damage resistance of type I doubler KDP crystals [10839-83]

The combined application of two high speed cameras with different frequency in the study about explosion process [10839-84]

A Mueller matrix measurement technique based on a division-of-aperture polarimetric camera [10839-85]

Based on industrial inspection of the UV double-telescopic lens design [10839-88]

Spatial location measurements of point target based on ultra-sparse image [10839-90]
| 10839 1I | Research on key technology of the optical measurement device used in liquid oxygen tank of carrier rocket [10839-91] |
| 10839 1J | Field registration and test for multi-module imaging spectrometer [10839-92] |
| 10839 1K | Design of portable fundus camera system based on mobile phone [10839-96] |
| 10839 1L | Detection of specular surface defects with eliminating dusts based on polarized structured-light illumination [10839-97] |
| 10839 1M | Simulation probe of scanning optical focusing detection system design based on Zemax [10839-98] |
| 10839 1N | Study on calibration and error compensation of laser scanning system [10839-100] |
| 10839 1O | Spectrum-analysis study of parameters associated with laser-induced air breakdown plasma [10839-101] |
| 10839 1P | Reconstruction of the free-falling body trajectory in an optical interferometric absolute gravimeter [10839-104] |
| 10839 1Q | Mechanism design of a low temperature resistant and high precision zoom lens [10839-107] |
| 10839 1R | A novel optical system of fingerprint and finger vein images acquisition [10839-111] |
| 10839 1S | Optical free form surface metrology in adaptive polarized interferometry [10839-113] |
| 10839 1T | Uncertainty analysis of dynamic goniometer based on fiber optic gyroscope [10839-115] |
| 10839 1U | Measurement for the structure of microcosmic defects on optical surface with digital holographic microscopy [10839-117] |
| 10839 1V | Comparison and analysis on the accurate measurement of spherical curvature radius [10839-118] |
| 10839 1W | The compact high energy DPSSL driving circuit system [10839-119] |
| 10839 1X | Glass viscoelasticity determination and analysis based on TMA compression creep [10839-124] |
| 10839 1Y | An on-machine non-contact form measurement method for the high steepness elements [10839-130] |
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Symposium Committees

Symposium General Chairs
Bingkun Zhou, Tsinghua University (China)
Guangcan Guo, University of Science and Technology of China (China)
Liwei Zhou, Beijing Institute of Technology (China)
Qihuang Gong, Peking University (China)
Henri Lezec, National Institute of Standards and Technology (United States)
Minghui Hong, National University of Singapore (Singapore)
Yuwen Qin, National Natural Science Foundation of China (China)
Yudong Zhang, Chengdu Branch of Chinese Academy of Sciences (China)
Enhai Liu, Institute of Optics and Electronics (China)

International Advisory Committee
Wenhan Jiang, Institute of Optics and Electronics (China)
Yuen-Ron Shen, University of California, Berkeley (United States)
Myung K. Cho, National Optical Astronomy Observatory (United States)

Organizing Committee
Jinghua Cao, CAS Bureau of International Cooperation (China)
Yadong Jiang, University of Electronic Science and Technology of China (China)
Li Yang, Institute of Optics and Electronics (China)

Program Committee
Hu Yang, Institute of Optics and Electronics (China)
Xiaodi Tan, Beijing Institute of Technology (China)
Ting Xu, Nanjing University (China)
Qiao Xu, China Academy of Engineering Physics (China)
Xuanming Duan, Chongqing Institute of Green and Intelligent Technology (China)
Xue Feng, Tsinghua University (China)
Junsheng Yu, University of Electronic Science and Technology of China (China)
Xinbin Cheng, Tongji University (China)
Zheyu Fang, Peking University (China)
Rui Zhou, Xiamen University (China)
Changtao Wang, Institute of Optics and Electronics (China)

Conference Chairs

Yudong Zhang, Institute of Optics and Electronics (China)
Wei Gao, Tohoku University (Japan)
Min Xu, Fudan University (China)
