Front Matter: Volume 10912
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)
ISBN: 9781510624665

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• The first five digits correspond to the SPIE volume number.
• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

### NANO-EMITTERS AND NON-CLASSICAL LIGHT

- 10912 05 Photonic engineering providing conditions for direct exciton macroscopic coherence at elevated temperatures [10912-4]

### III-NITRIDE LASERS AND LEDs

- 10912 0D Inhomogeneous spectral broadening in deep ultraviolet light emitting diodes [10912-12]
- 10912 0E InGaN/GaN μLED SPICE modelling with size-dependent ABC model integration [10912-13]

### LASERS AND LEDs I

- 10912 0G VENUS: a comprehensive electro-thermo-opto VCSEL simulator (Invited Paper) [10912-15]
- 10912 0H Low-noise x-band tunable microwave generator based on external cavity lasers [10912-16]
- 10912 0I Characterization of MBE-grown 1.55-μm GaSb-based multiple-quantum-well lasers at cryogenic temperatures [10912-17]

### LASER DYNAMICS

- 10912 0M Stable and unstable Nozaki-Bekki holes in a long laser [10912-21]
- 10912 0N Theoretical investigation on effects of group-velocity dispersion on mid-infrared quantum-cascade lasers with Fabry-Perot and ring cavities [10912-22]
- 10912 0O Coexisting periodic regimes in semiconductor lasers with optical feedback [10912-23]
**ELECTROMAGNETICS AND PLASMONICS**

10912 0Q  Revisiting beamforming under the prism of inverse methods [10912-25]

10912 0T  Ellipso-polarimetric schemes for improved surface plasmon resonance detection [10912-28]

**LASERS AND LEDs II**

10912 0U  Hybrid modeling of quantum light emitting diodes: self-consistent coupling of drift-diffusion, Schrödinger-Poisson, and quantum master equations (Invited Paper) [10912-29]

10912 0V  Carrier lifetime of heavily p-doped base in light-emitting transistors and transistor lasers [10912-30]

10912 0X  Wide-temperature-range characterization of 1.55-μm phosphorus-free multiple-quantum-well lasers grown by MBE on InP [10912-32]

**PHOTODETECTION**

10912 0Y  Minimization of dark counts in PureB SPADs for NUV/VUV/EUV light detection by employing a 2D TCAD-based simulation environment [10912-33]

10912 0Z  A comparative study of methods and algorithms for spatially resolved spectral value reconstruction with multispectral resolving filter-on-chip CMOS sensors [10912-34]

**SENSORS**

10912 13  Bimetallic surface plasmon resonance photonic crystal fiber biosensor using refractory plasmonic material [10912-40]

10912 14  Design and analysis of low-cost high-sensitive surface plasmon resonance-based biosensor [10912-41]

**OPTICAL SYSTEMS SIMULATION**

10912 15  Fully tensorial elastic-wave mode solver for stimulated Brillouin scattering simulations in integrated photonics [10912-42]

10912 16  Exploring the impacts of long-period corrugation and phase gratings on a cascade of phase-shifted lithium niobate waveguides with the combined theoretical and experimental approaches [10912-43]

10912 17  Indoor positioning and intuitive advertising using visible light communication [10912-44]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Connie J. Chang-Hasnain, University of California, Berkeley (United States)
Graham T. Reed, Optoelectronics Research Centre, University of Southampton (United Kingdom)

Symposium Co-chairs

Sailing He, KTH Royal Institute of Technology (Sweden) and Zhejiang University (China)
Yasuhiro Koike, Keio University (Japan)

Program Track Chairs

James G. Grote, Photonics Consultant (United States)
Shibin Jiang, AdValue Photonics, Inc. (United States)

Conference Chairs

Bernd Witzigmann, Universität Kassel (Germany)
Marek Osiński, The University of New Mexico (United States)
Yasuhiko Arakawa, The University of Tokyo (Japan)

Conference Program Committee

Hiroshi Amano, Nagoya University (Japan)
Toshihiko Baba, Yokohama National University (Japan)
Jing Bai, University of Minnesota, Duluth (United States)
Enrico Bellotti, Boston University (United States)
Guillermo Carpintero del Barrio, Universidad Carlos III de Madrid (Spain)
Weng W. Chow, Sandia National Laboratories (United States)
Alexandre Freundlich, University of Houston (United States)
Frédéric Grillot, Télécom ParisTech (France)
Ortwin Hess, Imperial College London (United Kingdom)
Stephan W. Koch, Philipps-Universität Marburg (Germany)
Cun-Zheng Ning, Arizona State University (United States)
Joachim Piprek, NUSOD Institute LLC (United States)
Marc Sciamanna, CentraleSupélec (France)
Ikuo Suemune, Hokkaido University (Japan)
Kaikai Xu, State Key Laboratory of Electronic Thin Films & Integrated Devices (China)
Session Chairs

1. Nano-Emitters and Non-Classical Light
   Bernd Witzigmann, Universität Kassel (Germany)

2. Quantum Dot Lasers
   Yasuhiko Arakawa, The University of Tokyo (Japan)

3. III-Nitride Lasers and LEDs
   Andrea Fiore, Technische Universität Eindhoven (Netherlands)

4. Lasers and LEDs I
   Johann Peter Reithmaier, Universität Kassel (Germany)

5. Laser Dynamics
   Marek Osiński, The University of New Mexico (United States)

6. Electromagnetics and Plasmonics
   Alberto Tibaldi, Politecnico di Torino (Italy)

7. Lasers and LEDs II
   Bernd Witzigmann, Universität Kassel (Germany)

8. Photodetection
   Sahar Sharifzadeh, Boston University (United States)

9. Sensors
   Markus Kantner, Weierstrass-Institut für Angewandte Analysis und
   Stochastik (Germany)

10. Optical Systems Simulation
    Jing Bai, University of Minnesota Duluth (United States)
