Volume 10942
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)
ISBN: 9781510625266

Paper Numbering: Proceedings of SPIE follow an e-first publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- the first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ..., 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

<td>Dynamic focal tracker display</td>
</tr>
<tr>
<td>10942.OL</td>
<td>Applying the discovery of melanopsin photoreceptors in the human retina to enhancing the performance of visual displays</td>
</tr>
</tbody>
</table>
3D DISPLAYS

10942 0M  A novel control method of the combination of simple active barrier pitch control and image processing to extremely expand the viewing zone in forward and backward directions of stereoscopic 3D displays [10942-20]

10942 0P  Resolution-enhanced mobile three-dimensional display based on computer-generated integral imaging [10942-23]

DISPLAY COMPONENTS

10942 0R  All-dielectric colored truncated cone metasurfaces with silicon mie magnetic resonators [10942-26]

10942 0S  Full-color optical combiner based on multilayered metasurface design [10942-27]

POSTER SESSION

10942 0X  Analysis of displayable depth range for retinal projection type super multi-view 3D head-mounted display using the time division projection optical system [10942-33]

10942 0Z  Time-sequential super multiview theater system [10942-35]

10942 10  Anisotropic holographic screen for wide field-of-view augmented-reality system [10942-36]

10942 11  3D display with active parallax barrier using the monochromatic LC panel of specifications same as the image display panel [10942-37]

10942 15  Enhancement of inorganic electroluminescence by chlorine-functionalized CNTs [10942-41]

10942 16  Holographic waveguide-type three-dimensional augmented-reality display using the holographic optical element-mirror array [10942-42]

10942 17  Performance analysis for holographic display based on phase only spatial light modulator [10942-43]

10942 19  Compensation for temperature dependency of 1D position sensitive detector [10942-45]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B..., 0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Connie J. Chang-Hasnain, University of California, Berkeley (United States)
Graham T. Reed, Optoelectronics Research Centre, University of Southampton (United Kingdom)

Symposium Co-chairs

Sailing He, KTH Royal Institute of Technology (Sweden) and Zhejiang University (China)
Yasuhiro Koike, Keio University (Japan)

Program Track Chair

Liang-Chy Chien, Kent State University (United States)

Conference Chairs

Jiun-Haw Lee, National Taiwan University (Taiwan)
Qiong-Hua Wang, Beihang University (China)
Tae-Hoon Yoon, Pusan National University (Korea, Republic of)

Conference Program Committee

Karlheinz Blankenbach, Hochschule Pforzheim (Germany)
Pierre M. Boher, ELDIM (France)
Liangcai Cao, Tsinghua University (China)
Janglin Chen, Industrial Technology Research Institute (Taiwan)
Liang-Chy Chien, Kent State University (United States)
Nobuyuki Hashimoto, Citizen Holdings Co., Ltd. (Japan)
Yi-Pai Huang, National Chiao Tung University (Taiwan)
Byoungho Lee, Seoul National University (Korea, Republic of)
Sin-Doo Lee, Seoul National University (Korea, Republic of)
Akihiro Mochizuki, i-CORE Technology, LLC (United States)
Michael Wittek, Merck KGaA (Germany)

Session Chairs

1 AR/VR and HDR Displays
   Jiun-Haw Lee, National Taiwan University (United States)

2 NTE Displays
   Qionghua Wang, Beihang University (China)
3 OLED Materials and Devices  
Tien-Lung Chiu, Yuan Ze University (Taiwan)

4 OLED Physics  
Juozas Vidas Grazulevicius, Kaunas University of Technology (Lithuania)

5 Projection Displays and Human Factor  
Qionghua Wang, Beihang University (China)

6 3D Displays  
Byoungho Lee, Seoul National University (Korea, Republic of)

7 Display Components  
Jiun-Haw Lee, National Taiwan University (Taiwan)
