An observer study to assess the detection of calcification clusters using 2D mammography, digital breast tomosynthesis, and synthetic 2D imaging [10952-30]

2D single-slice vs. 3D viewing of simulated tomosynthesis images of a small-scale breast tissue model [10952-31]

Changes in breast density [10952-32]

Assessment of a quantitative mammographic imaging marker for breast cancer risk prediction [10952-33]

Comparing senior residents performance to radiologists in lung cancer detection [10952-28]

Data transformations for variance stabilization in the statistical assessment of quantitative imaging biomarkers [10952-34]

A case study regarding clinical performance evaluation method of medical device software for approval [10952-35]

In-vitro and in-vivo comparison of radiation dose estimates between state-of-the-art interventional fluoroscopy systems [10952-36]

Prostate Imaging Self-assessment and Mentoring (PRISM): a prototype self-assessment scheme [10952-37]

A statistical analysis of oral tagging in CT colonography and its impact on flat polyp detection and characterization [10952-40]

Missed cancer and visual search of mammograms: what feature-based machine-learning can tell us that deep-convolution learning cannot (Cum Laude Poster Award) [10952-41]

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
