SPIE

Volume 10929
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: Proceedings of SPIE follow an e-first publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

• the first five digits correspond to the SPIE volume number.
• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

**NANOWIRE DEVICES AND CHARACTERIZATION**

| 10929 05 | MBE-grown GaAs/AlGaAs multiple quantum wells on Ge substrate [10929-4] |              |

**QUANTUM DOT DEVICES**

| 10929 0C | MBE-grown InGaAs/GaAs quantum-dots on Ge substrate: An idea towards optoelectronic integration on silicon [10929-11] |              |

**QUANTUM DOTS I**

| 10929 0E | Effect of vertical coupling on the performance of mid-infrared InAs-QDIP [10929-13] |              |
| 10929 0F | Auger recombination-induced neutralization and stretched exponential recharging in an InAs quantum dot [10929-14] |              |
| 10929 0G | Improvement in operating temperature of InAs/GaAs quantum-dots-based photodetectors by varying position of localized carriers in active region [10929-15] |              |

**QUANTUM DOTS II**

| 10929 0I | Coulomb-induced recombination dynamics in magnetically doped type-IIb quantum dots [10929-17] |              |
| 10929 0K | Influence of modulation doping on p-i-p quantum-dots (InAs/GaAs)-based infrared detector performance [10929-19] |              |

**PHYSICS OF NANOSTRUCTURES**

| 10929 0N | Tailoring and controlling fermionic properties in heterogenous quantum-dot colloidal solutions [10929-22] |              |

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Connie J. Chang-Hasnain, University of California, Berkeley (United States)
Graham T. Reed, Optoelectronics Research Centre, University of Southampton (United Kingdom)

Symposium Co-chairs

Sailing He, KTH Royal Institute of Technology (Sweden) and Zhejiang University (China)
Yasuhiro Koike, Keio University (Japan)

Program Track Chair

Ali Adibi, Georgia Institute of Technology (United States)

Conference Chairs

Diana L. Huffaker, University of California, Los Angeles (United States)
Holger Eisele, Technische Universität Berlin (Germany)

Conference Program Committee

Baolai L. Liang, California NanoSystems Institute (United States)
Huiyun Liu, University College London (United Kingdom)
Zetian Mi, University of Michigan (United States)
Jeffrey C. Owrutsky, U.S. Naval Research Laboratory (United States)
Qi Hua Xiong, Nanyang Technological University (Singapore)

Session Chairs

1 Nanowire Devices and Characterization
   Holger Eisele, Technische Universität Berlin (Germany)

2 Nanowires and Quantum Dots for NWs
   Frank Bertram, Otto-von-Guericke-Universität Magdeburg (Germany)

3 Quantum Dot Devices
   Ryan B. Lewis, Paul-Drude-Institut für Festkörperelektronik (Germany)

4 Quantum Dots I
   David J. Mowbray, The University of Sheffield (United Kingdom)
5 Quantum Dots II
   Holger Eisele, Technische Universität Berlin (Germany)

6 Physics of Nanostructures
   Baolai Liang, California NanoSystems Institute (United States)

7 Novel Quantum Systems
   Thi Huong Au, Laboratoire de Photonique Quantique et Moléculaire
   (France)

8 Colloidal Quantum Dots
   Adam D. Dunkelberger, U.S. Naval Research Laboratory
   (United States)
