The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIE Digital Library.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: Proceedings of SPIE follow an e-first publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- the first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B, 0C, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

CRYSTALLINE WGM MICRORESONATORS AND APPLICATIONS 1

11266 06 Electro-optic based adiabatic frequency conversion in a non-centrosymmetric microresonator [11266-4]
11266 07 High-precision measurement of a propagation loss of low-loss single-mode optical waveguides on lithium niobate on insulator [11266-5]
11266 09 Juggling with light; powerful second-order nonlinear optical effects in whispering gallery resonators (Invited Paper) [11266-7]
11266 0A Ultra-low loss lithium niobate photonics (Invited Paper) [11266-8]

KERR OPTICAL FREQUENCY MICROCOMBS WITH WGM

11266 0F Silicon oxynitride microresonators for Kerr frequency combs [11266-13]
11266 0G Frequency comb generation in non-centrosymmetric optical microresonators [11266-14]
11266 0I Ultra-high-Q whispering-gallery mode resonators in the pulsed-pump regime [11266-16]

CONFIGURABLE WGM AND EXCITATION

11266 0J All-optically triggerable organic/inorganic photonic devices (Invited Paper) [11266-17]
11266 0M Optically tunable on-chip microresonator [11266-20]
11266 0N Exciting Whispering Gallery Modes in liquid microdrops using sub-micron size tapered fibers [11266-21]

LASERS WITH WGM RESONATORS

11266 0O 780 nm narrow-linewidth self-injection-locked WGM lasers (Invited Paper) [11266-23]

Proc. of SPIE Vol. 11266  1126601-5
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Beat Neuenschwander, Berner Fachhochschule Technik und Informatik (Switzerland)
Xianfan Xu, Purdue University (United States)

Symposium Co-chairs

Craig B. Arnold, Princeton University (United States)
Takunori Taira, Institute for Molecular Science (Japan)

Program Track Chairs

Vladimir Ilchenko, GM Cruise LLC (United States)
Paul O. Leisher, Lawrence Livermore National Laboratory (United States)

Conference Chairs

Alexis V. Kudryashov, Institute of Geosphere Dynamics (Russian Federation)
Alan H. Paxton, Air Force Research Laboratory (United States)
Vladimir S. Ilchenko, GM Cruise LLC (United States)

Conference Co-chair

Andrea M. Armani, The University of Southern California (United States)

Conference Program Committee

Lutz Aschke, TRUMPF Lasertechnik GmbH (Germany)
Gaurav Bahl, University of Illinois (United States)
Paul E. Barciany, University of Calgary (Canada)
Hui Cao, Yale University (United States)
Yanne K. Chembo, University of Maryland, College Park (United States)
Jean-Claude M. Diels, The University of New Mexico (United States)
Hans Joachim Eichler, Technische Universität Berlin (Germany)
Andrew Forbes, University of the Witwatersrand, Johannesburg (South Africa)
Pierre Galarneau, INO (Canada)
Thomas Graf, Universität Stuttgart (Germany)
Session Chairs

1  WGM Microsensors
   Andrea M. Armani, The University of Southern California
   [United States]
   Andre Kovach, The University of Southern California
   [United States]

2  Crystalline WGM Microresonators and Applications I
   Vladimir S. Ilychenko, GM Cruise LLC [United States]

3  Crystalline WGM Microresonators and Applications II
   Andrea M. Armani, The University of Southern California
   [United States]
   Andre Kovach, The University of Southern California
   [United States]

4  Kerr Optical Frequency Microcombs with WGM
   Jonathan M. Ward, Okinawa Institute of Science and Technology
   Graduate University [Japan]

5  Configurable WGM and Excitation
   Andrea M. Armani, The University of Southern California
   [United States]

6  Lasers with WGM resonators
   Andrey B. Matsko, OEwaves, Inc. [United States]
7 Quantum Optics with WGM Resonators
Victor Brasch, CSEM SA (Switzerland)

8 Beam Shaping I
Stefan Hambücker, INGENERIC GmbH (Germany)

9 Beam Shaping II
Stefan Hambücker, INGENERIC GmbH (Germany)

10 Laser Mode Control
Alan H. Paxton, Air Force Research Laboratory (United States)

11 Adaptive Optics, Laser Diagnostics, Nonlinear Propagation
Julia V. Sheldakova, Active Optics Night N Ltd. (Russian Federation)
