Volume 6599

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

ix Introduction

SESSION I LASER MATERIALS, COMPONENTS, AND SEMICONDUCTOR LASERS

659902 Infra-red to visible up-conversion in Yb3Al5O12:Er3+ crystal [6599-01]
M. Kaczką, M. Borowska, Institute of Microelectronics and Optoelectronics (Poland);
K. Kołodziejak, T. Łukasiewič, Institute of Electronic Materials Technology (Poland);
M. Malinowski, Institute of Microelectronics and Optoelectronics (Poland) and Institute of
Electronic Materials Technology (Poland)

659903 Emission-excitation characteristics of luminophores for semiconductor sources of white
light [6599-02]
Z. Mierczyk, M. Włodarski, M. Kwaśny, J. Mierczyk, Military Univ. of Technology (Poland)

659904 MBE technology of saturable Bragg reflectors for mode locking of solid state lasers
[6599-03]
K. Kosiel, Institute of Electronics Technology (Poland); M. Kosmala, Warsaw Univ. of
Technology (Poland); K. Regiński, M. Bugajski, Institute of Electronics Technology (Poland)

659905 Optimal control characteristics of superconductor switching elements driven by current
and laser pulses [6599-04]
J. Waskiewicz, Białystok Technical Univ. (Poland)

659906 Control of laser-beam propagation in optically induced lattices [6599-05]
G. M. Staroń, Szczecin Univ. of Technology (Poland)

659907 Investigations of radiation resistance of anti-laser filters [6599-06]
Z. Mierczyk, M. Kwaśny, J. Mierczyk, J. Kubicki, Military Univ. of Technology (Poland)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on
CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation
identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully
citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the
publication.

SPIE uses a six-digit CID article numbering system in which:
• The first four digits correspond to the SPIE volume number.
• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals
  and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-22, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an
abbreviated version on subsequent pages.
Heat-induced wavelength shifts in emission spectra of pulse-operated diode lasers [6599-07]
E. Kowalczyk, L. Ornoch, B. Mroziewicz, Institute of Electron Technology (Poland)

Physics of an operation of vertical cavity surface emitting lasers with oxide apertures [6599-08]
R. P. Sarzata, W. Nakwaski, Technical Univ. of Lodz (Poland)

\section*{SESSION 2 SOLID STATE LASERS I}

\begin{itemize}
\item 65990A Nd:YAG slab laser side pumped by 600-W diode laser stack (Invited Paper) [6599-09]
W. Zendzian, J. K. Jabczynski, J. Kwiatkowski, Military Univ. of Technology (Poland)
\item 65990B Acousto-optic modulation in diode pumped solid state lasers (Invited Paper) [6599-10]
J. K. Jabczynski, W. Zendzian, J. Kwiatkowski, Military Univ. of Technology (Poland)
\item 65990C A highly efficient pulsed Nd:YVO4 laser pumped by two high-power diode lasers [6599-11]
J. Kwiatkowski, J. K. Jabczynski, W. Zendzian, Military Univ. of Technology (Poland)
\item 65990D Investigations of optical and generation properties of strongly doped erbium laser glasses (SELG) designed for 1.5 \textmu m microchip lasers [6599-12]
J. Mlynczak, K. Kopczynski, Z. Mierczyk, Military Univ. of Technology (Poland)
\item 65990E Generation of 1.54 \textmu m radiation in concentrated Yb-Er glasses [6599-13]
J. Mlynczak, K. Kopczynski, Z. Mierczyk, Military Univ. of Technology (Poland)
\item 65990F Compact eye-safe laser head [6599-14]
R. Ostrowski, Institute of Optoelectronics, MUT (Poland)
\end{itemize}

\section*{SESSION 3 SOLID STATE LASERS II}

\begin{itemize}
\item 65990G Parametric amplification of femtosecond pulses (Invited Paper) [6599-15]
Y. Stepanenko, C. Radzewicz, Institute of Physical Chemistry, PAN (Poland)
\item 65990H Modeling of light generation in photonic crystal lasers [6599-16]
P. Szczepański, Warsaw Univ. of Technology (Poland) and National Institute of Telecommunications (Poland); A. Mossakowska-Wyszyńska, A. Tyszka-Zawadzka, Warsaw Univ. of Technology (Poland)
\item 65990I Analysis of light generation in 2D photonic crystal laser: semi-classical approach [6599-17]
P. Czuma, Warsaw Univ. of Technology (Poland); P. Szczepański, Warsaw Univ. of Technology (Poland) and National Institute of Telecommunications (Poland)
\item 65990J Operating schemes for Pr3+ and Pr3+Yb3+ activated fluorozirconate fiber lasers in the visible [6599-18]
M. Klimczak, P. Wiórkę, M. Malinowski, Institute of Microelectronics and Optoelectronics (Poland); R. Piramidowicz, Institute of Microelectronics and Optoelectronics (Poland) and Telekomunikacja Polska (Poland)
\end{itemize}
1064-nm and 532-nm microchip lasers for micro-interferometer systems [6599-19]
K. Kopczynski, J. Mlynczak, Military Univ. of Technology (Poland); J. Sarnecki, Institute of
Electronic Materials Technology (Poland); Z. Mierczyk, Military Univ. of Technology (Poland)

SESSION 4  GAS LASERS

Use of adaptive optics elements in the industrial cw CO₂ laser for control of the output
beam characteristics (Invited Paper) [6599-20]
G. Rabczuk, The Szewalski Institute of Fluid-Flow Machinery (Poland)

Method for the CO₂ laser beam wavefront control [6599-21]
M. Sawczak, G. Rabczuk, The Szewalski Institute of Fluid-Flow Machinery (Poland)

Measurement of active medium parameters for ion gas laser operating in UV range
[6599-22]
J. Kęsik, M. Osiniak, Warsaw Univ. of Technology (Poland)

Current pulse operation of an argon-krypton ion laser [6599-23]
J. Kęsik, W. Kaminski, M. Osiniak, Warsaw Univ. of Technology (Poland); J. Lipowski, Pekao
Financial Services Sp. z o.o. (Poland); P. Warda, Warsaw Univ. of Technology (Poland)

Method for regulating pressure in ion laser discharge tubes [6599-24]
J. Kęsik, W. Kaminski, M. Osiniak, M. Osiniak, Warsaw Univ. of Technology (Poland)

Introduction

Laser Technology VIII was the eighth symposium in a periodical series that deals with advances in the state-of-the-art of laser technology in Poland. Historically, this series of symposia has evolved since 1984 due to the activity of the Committee on Electronics and Telecommunication of the Polish Academy of Sciences and the support of relevant universities.

The first symposium on laser technology was organized and hosted by the Nicolaus Copernicus University at Toruń and co-organized by Warsaw University of Technology, Military University of Technology, and Industrial Center of Optics in Warsaw. Three volumes of proceedings were published beginning in June, 1984.

Laser Technology II was organized in 1987 by Szczecin University of Technology, Warsaw University of Technology, and Military University of Technology. The host of the symposium was the Institute of Industrial Automation Szczecin University of Technology. The symposium provided material for four volumes of proceedings. Two of them were published in Polish (a volume of 140 contributed papers and volume of 14 invited papers,) and two in English (a volume of abstracts and SPIE Proceedings Vol. 859).

Laser Technology III was organized in 1990 also by Szczecin University of Technology, Warsaw University of Technology, and Military University of Technology. It was hosted by the Institute of Industrial Automation of Szczecin University of Technology. The symposium provided materials for four volumes of proceedings. Two of them were published in Polish (a volume of 140 contributed papers and another of invited papers,) and two in English (a volume of abstracts and SPIE Proceedings Vol. 1391).

Laser Technology IV was organized in 1993 by Szczecin University of Technology, Warsaw University of Technology, and Military University of Technology. The host of the symposium was the Institute of Electronics and Computer Science of Szczecin University of Technology. The symposium provided material for five volumes of proceedings. Two of them were published in Polish (a volume of contributed papers and another of invited papers,) and three in English (a volume of abstracts and SPIE Proceedings Vol. 2202 and 2203).

Laser Technology V was organized in 1996 by Szczecin University of Technology, Warsaw University of Technology, and Military University of Technology. The host of the symposium was the Institute of Electronics and Computer Science of Szczecin University of Technology. The symposium provided material for five volumes of proceedings. Two of them were published in Polish (a volume of contributed papers and another of invited papers,) and three in English (SPIE Proceedings Vol. 3186, 3187, and 3188).
Laser Technology VI was organized in 1999 by Szczecin University of Technology, Warsaw University of Technology, Military University of Technology, and by the Committee for Optoelectronics of the Association of Polish Electrical Engineers under the auspices of the Polish Academy of Sciences Committee on Electronics and Telecommunication. The symposium provided material for four volumes of proceedings. Two of them were published in Polish (a volume of contributed papers and another of invited papers,) and two in English (SPIE Proceedings Vol. 4237 and 4238).

Laser Technology VII was organized in 2002 also by Szczecin University of Technology, Warsaw University of Technology, Military University of Technology, and by the Committee for Optoelectronics of the Association of Polish Electrical Engineers and SPIE Poland Chapter under the auspices of the Polish Academy of Sciences Committee on Electronics and Telecommunication. The symposium provided material for four volumes of proceedings. Two of them were published in Polish (a volume of contributed papers and another of invited papers,) and two in English (SPIE Proceedings Vol. 5229 and 5230).

Laser Technology VIII was organized in 2006 also by Szczecin University of Technology, Warsaw University of Technology, Military University of Technology, the Committee for Optoelectronics of the Association of Polish Electrical Engineers, and SPIE Poland Chapter, under the auspices of the Polish Academy of Sciences Committee on Electronics and Telecommunication. This recent symposium was hosted by the Institute of Electronics, Telecommunications and Computer Science of Technical University of Szczecin and held in Świnoujście on 25–29 September 2006. Approximately 130 participants including a number of foreign guests attended this symposium. Professor Wiesław Woźniński, Chairman of the Polish Committee for Optoelectronics and the Committee on Electronics and Telecommunication, presented the welcome address and opened the meeting. The opening lecture, “Single-frequency solid-state micro lasers,” was given by Arkadiusz Antończak, Jarosław Sator, and Krzysztof Abramski.

The topics of Laser Technology VIII were as follows: (1) new active media, component and laser subassembly construction problems; (2) solid-state, semiconductor, gas, ion, and other laser types; (3) laser radiation: amplification, generation, stabilization, synchronization, frequency multiplying, and pulse shaping; (4) laser beams: collimation, focusing, polarization, filtration, modulation, and detection; (5) measurements of lasers and their radiation; (6) equipment cooperating with lasers; and (7) laser applications in material processing, medicine, and metrology. Included in these topics were 44 oral papers and 86 contributed papers.

The symposium provided materials for four volumes of proceedings. Two of them were published in Polish (a volume of 36 oral papers and another of 71 contributed papers) and two SPIE Proceedings in English. The editors of these
volumes present the full texts of 61 chosen and reviewed papers by authors affiliated primarily with university-based laboratories.

The symposium chairs and editors would like to thank personally the authors and conference contributors who made these books possible. Special cordial thanks are also due to SPIE for supporting the symposium by undertaking the publication of two proceedings volumes. The Symposium Committee announces with pleasure that the next meeting on Laser Technology is scheduled to be held in Świnoujście in 2009.
