Window and Dome Technologies and Materials X

Randal W. Tustison
Editor

11–12 April 2007
Orlando, Florida, USA

Sponsored and Published by
SPIE—The International Society for Optical Engineering
Contents

vii  Conference Committee

SESSION 1  LONG-WAVELENGTH INFRARED TRANSPARENT MATERIALS

654502  Development of hot-pressed and chemical-vapor-deposited zinc sulfide and zinc selenide in the United States for optical windows (Invited Paper) [6545-01]
           D. C. Harris, Naval Air Systems Command (USA)

654503  International development of chemical vapor deposited zinc sulfide [6545-02]
           J. McCloy, Raytheon Missile Systems (USA)

654504  Optical properties of epitaxial single-crystal chemical-vapor-deposited diamond [6545-03]
           G. Turri, Y. Chen, M. Bass, CREOL/College of Optics and Photonics/Univ. of Central Florida (USA); D. Orchard, Qinetiq Ltd. (United Kingdom); J. E. Butler, S. Magana, T. Feygelson, D. Thiel, K. Fourspring, Naval Research Lab. (USA); J. Pentony, S. Hawkins, M. Baronowski, R. V. Dewees, D. Seltzer, A. Guenthner, D. C. Harris, Naval Air Systems Command (USA); C. M. Stickley, DARPA (USA)

654505  Spectral characterization of diffractively structured GaAs using the ARISTMS [6545-04]
           P. Coulter, M. Wilson, MilSys Technologies, LLC (USA)

SESSION 2  GLASSES

654507  Fluorinated silicate glass for conventional and holographic optical elements [6545-06]
           L. Glebov, CREOL/College of Optics and Photonics/Univ. of Central Florida (USA)

654508  Development of a laser glass for the National Ignition Facility [6545-07]
           J. S. Hayden, SCHOTT North America, Inc. (USA); J. H. Campbell, S. A. Payne, Lawrence Livermore National Lab. (USA)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:
• The first four digits correspond to the SPIE volume number.
• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.
### SESSION 3  MICRO- AND NANO-CRYSTALLINE OPTICAL MATERIALS AND STRUCTURES

Laser-assisted pre-finishing of optical ceramic materials [6545-25]
J. C. Rozzi, O. H. Clavier, M. D. Barton, Creare Inc. (USA)

Developments in the finishing of domes and conformal optics [6545-26]
A. B. Shorey, W. Kordonski, J. Tracy, M. Tricard, QED Technologies (USA)

Contact mechanics models and algorithms for dome polishing with UltraForm Finishing (UFF) [6545-27]
C. Bouvier, S. M. Gracewski, S. J. Burns, Univ. of Rochester (USA)

Improving surface figure and microroughness of IR materials and diamond turned surfaces with magnetorheological finishing (MRF) [6545-28]
C. Supranowitz, C. Hall, P. Dumas, B. Hallock, QED Technologies (USA)

High durability antireflection coatings for silicon and multispectral ZnS [6545-29]

iDLC: hardcoat for chalcogenide glass and other IR materials [6545-31]
K. Rogers, J. Ward, Umicore Coating Services (United Kingdom); Y. Guimond, Umicore IR Glass (France)

Effects of mesh voids on insertion loss of metallic mesh coatings [6545-33]
J. Halman, K. Ramsey, V. Sawtelle, Battelle Memorial Institute (USA)

Update on the development of high performance anti-reflecting surface relief microstructures [6545-34]
D. S. Hobbs, B. D. MacLeod, J. R. Riccobono, TelAztec LLC (USA)

An improved soft-chemistry approach to the preparation of spinel powders [6545-38]
R. Cook, TDA Research, Inc. (USA)

Polycrystalline transparent spinel domes for multimode seeker applications [6545-40]
A. A. DiGiovanni, A. LaRoche, L. Schubel, L. Fehrenbacher, Technology Assessment and Transfer (USA); D. W. Roy, Consultant (USA)

Critical parameters for grinding large sapphire window panels [6545-43]

Improvements in large window and optics production [6545-45]
B. Hallock, B. Messner, C. Hall, C. Supranowitz, QED Technologies (USA)
65451C Reduced angle-shift infrared bandpass filter coatings [6545-48]
B. M. Lairson, J. Mosier, K. Gibbons, J. H. Sternbergh, M. A. George, Deposition Sciences, Inc. (USA)

Author Index
Conference Committee

Symposium Chair
  John C. Carrano, Luminex Corporation (USA)

Symposium Cochair
  Larry B. Stotts, Defense Advanced Research Projects Agency (USA)

Program Track Chair
  Gabor F. Fulop, Maxtech International, Inc. (USA)

Conference Chair
  Randal W. Tustison, Raytheon Company (USA)

Program Committee
  Joel Askinazi, Goodrich Corporation (USA)
  Richard L. Gentilman, Raytheon Integrated Defense Systems (USA)
  Daniel C. Harris, Naval Air Systems Command (USA)
  James C. Kirsch, U.S. Army Research, Development and Engineering Command (USA) and U.S. Army Aviation and Missile Command (USA)
  John McCloy, Raytheon Missile Systems (USA)
  Robert J. Ondercin, Air Force Research Laboratory (USA)
  Roger M. Sullivan, Naval Air Warfare Center (USA)
  Michael E. Thomas, Johns Hopkins University Applied Physics Laboratory (USA)

Session Chairs
  1 Long-wavelength Infrared Transparent Materials
     Michael E. Thomas, Johns Hopkins University Applied Physics Laboratory (USA)
  2 Glasses
     Richard L. Gentilman, Raytheon Integrated Defense Systems (USA)
  3 Micro- and Nano-crystalline Optical Materials and Structures
     Daniel C. Harris, Naval Air Systems Command (USA)
  4 Modeling, Characterization, and Fabrication I
     John McCloy, Raytheon Missile Systems (USA)
5 Modeling, Characterization, and Fabrication II
James C. Kirsch, U.S. Army Research, Development and Engineering Command (USA) and U.S. Army Aviation and Missile Command (USA)

6 Optical Coatings and Surface Structures
Robert J. Ondercin, Air Force Research Laboratory (USA)

7 Visible to Mid-wavelength Infrared Transparent Materials and Applications
Joel Askinazi, Goodrich Corporation (USA)
