Volume 6603
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN 0277-786X

---

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.
- The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.
Contents

xi Conference Committee

xiii Introduction

xv Origins of randomness in statistical and quantum mechanics (Plenary Paper) [6600-500]
M. B. Weissman, Univ. of Illinois at Urbana-Champaign (USA)

xxv Thermal noise informatics: totally secure communication via a wire, zero-power communication, and thermal noise driven computing (Plenary Paper) [6600-501]
L. B. Kish, Texas A&M Univ. (USA); R. Mingesz, Z. Gingl, Univ. of Szeged (Hungary)

SESSION 1 NOVEL QUANTUM OPTICS

6603 03 Ramsey interferometry with two frequencies (Invited Paper) [6603-04]
D. Seidel, J. G. Muga, I. Lizuain, Univ. del Pais Vasco (Spain)

6603 04 Blackbody radiation: rosetta stone of heat bath models (Invited Paper) [6603-01]
R. F. O’Connell, Louisiana State Univ. (USA)

6603 05 Vacuum fluctuations and nuclear quantum optics in strong laser pulses (Invited Paper)
[6603-02]
A. Di Piazza, K. Z. Hatsagortsyan, J. Evers, C. H. Keitel, Max-Planck-Institute for Nuclear Physics
(Germany)

6603 06 Quantum pulse compression laser radar (Invited Paper) [6603-05]
J. H. Shapiro, Massachusetts Institute of Technology (USA)

6603 07 Suppressing noise in single molecule imaging using quantum optics (Invited Paper)
[6603-06]
P. R. Hemmer, Texas A&M Univ. (USA)

SESSION 2 NONSTATIONARY NOISE

6603 09 Noisy oscillator: theory and applications [6603-09]
M. Gitterman, Bar-Ilan Univ. (Israel)

6603 0C Breakdown of the few-level approximation in dipole-dipole interacting systems [6603-59]
M. Kiffner, J. Evers, C. H. Keitel, Max-Planck-Institut für Kernphysik (Germany)

6603 0D High-sensitivity imaging with quantum spatial correlation of twin beams [6603-60]
dell'Insubria (Italy)
Noise-induced critical phenomena: a case study [6603-16]
G. Nunnari, Univ. degli Studi di Catania (Italy); G. Puglisi, Istituto Nazionale di Geofisica e Vulcanologia (Italy); F. Cannavò, A. Spata, Univ. degli Studi di Catania (Italy)

Characterization of non-stationary interference signals in GNSS applications (Invited Paper) [6603-08]
L. Lo Presti, B. Motella, Politecnico di Torino (Italy)

Impact of non-stationary noise on xDSL systems: an experimental analysis [6603-17]

Comment on the suppression of noise by the ribosome in the transition state for formation of the peptide bond (Invited Paper) [6603-94]
L. Massa, Hunter College and Graduate Ctr., City Univ. of New York (USA)

Impact of noise on current-driven polarization switching of vertical-cavity surface-emitting lasers [6603-61]
C. Masoller, Univ. Politecnica de Catalunya (Spain)

Detection and estimation of multiple weak signals in non-Gaussian noise (Invited Paper) [6603-11]
D. J. Nelson, U.S. Department of Defense (USA)

The generalized Rényi image entropy as a noise indicator (Invited Paper) [6603-13]
S. Gabarda, G. Cristóbal, Instituto de Óptica Daza de Valdés, CSIC (Spain)

Effect of noise in quantum communications [6603-62]
S. V. Kartalopoulos, The Univ. of Oklahoma (USA)

Transient analysis of random systems (Invited Paper) [6603-10]
L. Galleani, Politecnico di Torino (Italy)

Statistical study of the inverse first passage time algorithm (Invited Paper) [6603-14]
L. Sacerdote, C. Zucca, Univ. di Torino (Italy)

SESSION 3 QUANTUM WALKS AND NOISE

Quantum walks, automata, and structured search (Invited Paper) [6603-18]
S. Naguleswaran, I. Fuss, L. B. White, Univ. of Adelaide (Australia)

Analytic views of quantum walks (Invited Paper) [6603-19]
I. Fuss, L. White, Univ. of Adelaide (Australia); P. Sherman, Iowa Univ. (USA); S. Naguleswaran, Univ. of Adelaide (Australia)

Deterministic purity evolution via weak measurement for bipartite quantum systems [6603-21]
C. Hill, J. Ralph, Univ. of Liverpool (United Kingdom)
SESSION 4  FaN IN ATOMIC CLOCK APPLICATIONS

6603 0V  A systems approach to the quantum random walk (Invited Paper) [6603-24]
P. Sherman, Iowa State Univ. (USA); I. Fuss, L. White, S. Naguleswaran, Univ. of Adelaide (Australia)

6603 0W  The statistics of GPS (Invited Paper) [6603-25]
D. Matsakis, U.S. Naval Observatory (USA)

6603 0X  Impact of atomic clock and time-transfer noises in the formation of the International Atomic Time (Invited Paper) [6603-26]
W. Lewandowski, Bureau International des Poids et Mesures (France)

6603 0Y  Roles of noise in reliability problems: the view point of a mathematician and some application proposals (Invited Paper) [6603-27]
L. Sacerdote, Univ. di Torino (Italy); P. Tavella, Istituto Nazionale di Ricerca Metrologica (Italy)

6603 0Z  Characterization of nonstationary atomic clocks (Invited Paper) [6603-28]
L. Galleani, Politecnico di Torino (Italy); P. Tavella, INRIM (Italy)

6603 10  The generalized likelihood ratio test for detecting anomalous behaviors of atomic clocks (Invited Paper) [6603-29]
E. Nunzi, P. Carbone, Univ. of Perugia (Italy)

SESSION 5  TIMING NOISE IN HIGH-ENERGY ASTRONOMY

6603 11  Noise components from black-hole binaries in our galaxy (Invited Paper) [6603-30]
T. M. Belloni, INAF, Osservatorio Astronomico di Brera (Italy)

6603 12  Millisecond phenomena in mass accreting neutron stars (Invited Paper) [6603-31]
M. van der Klis, Univ. of Amsterdam (Netherlands)

6603 14  Studying accreting black holes and neutron stars with time series: beyond the power spectrum (Invited Paper) [6603-33]
S. Vaughan, Univ. of Leicester (United Kingdom); P. Uttley, Univ. of Southampton (United Kingdom)

6603 15  Time-varying spectral analysis of astronomical time series (Invited Paper) [6603-34]
L. Galleani, Politecnico di Torino (Italy); L. Cohen, CUNY (USA); D. Nelson, U.S. Dept. of Defense (USA); T. Belloni, INAF, Osservatorio Astronomico di Brera (Italy)

SESSION 6  QUANTUM ENTANGLEMENT

6603 16  Quantum interferometric sensors (Invited Paper) [6603-35]
K. T. Kapale, Jet Propulsion Lab. (USA) and Louisiana State Univ. (USA); L. D. Didomenico, Lawrence Livermore National Lab. (USA); H. Lee, Louisiana State Univ. (USA); P. Kok, Oxford Univ. (United Kingdom); J. P. Dowling, Louisiana State Univ. (USA) and Texas A&M Univ. (USA)
Three-mode squeezing: SU(1,1) symmetry (Invited Paper) [6603-36]
Z. Shaterzadeh Yazdi, P. S. Turner, B. C. Sanders, Univ. of Calgary (Canada)

Experimental observation of environment-induced sudden death of entanglement (Invited Paper) [6603-37]
M. P. Almeida, F. de Melo, M. O. Hor-Meyll, A. Salles, S. P. Walborn, P. H. S. Ribeiro, L. Davidovich, Univ. Federal do Rio de Janeiro (Brazil)

Entanglement and noise in the above-threshold optical parametric oscillator (Invited Paper) [6603-40]
P. Nussenzveig, K. N. Cassemiro, A. S. Villar, P. Valente, M. Martinelli, Univ. de São Paulo (Brazil)

Entanglement in macroscopic optomechanical systems [6603-42]
D. Vitali, C. Genes, S. Mancini, P. Tombesi, Univ. di Camerino (Italy)

SESSION 7 QUANTUM COHERENCE

Quantum interference in light scattering and propagation (Invited Paper) [6603-44]
J. Evers, Max-Planck-Institut für Kernphysik (Germany); M. Mahmoudi, Max-Planck-Institut für Kernphysik (Germany) and Zanjan Univ. (Iran); M. Macovei, Max-Planck-Institut für Kernphysik (Germany)

Nonlinear magneto-optic polarization rotation with intense laser fields (Invited Paper) [6603-45]
P. S. Hsu, A. K. Patnaik, G. R. Welch, Texas A&M Univ. (USA)

SESSION 8 NOISE IN FIBERS

Analysis of optical mixing in RF modulated noisy optical links [6603-85]
M. R. Salehi, Shiraz Univ. of Technology (Iran)

Fluctuation reduction in a rational harmonic mode-locked fiber ring laser using carrier-suppressed return-to-zero modulation format [6603-80]
S. Yamanaka, J. Maeda, Tokyo Univ. of Science (Japan)

Nonlinear decomposition-and-denoising approach for removal of signal-dependent noise of a digital color camera [6603-79]
T. Saito, Y. Ishii, T. Komatsu, Kanagawa Univ. (Japan)

Optical regeneration based on noise generated in bistable devices: going from 2R to 3R [6603-82]
A. P. González-Marcos, T. Vivero, J. M. Rivas-Moscoso, J. A. Martín-Pereda, Univ. Politécnica de Madrid (Spain)

Highly-sensitive measurement technique of relative intensity noise and laser characterization [6603-92]
J. Poette, P. Besnard, L. Bramerie, J.-C. Simon, FOTON-ENSSAT (France)
Noise and jitter behavior of nonlinear amplifier optical loop mirror based on photonic crystal fiber [6603-49]
C. de Dios, H. Lamela, Univ. Carlos III (Spain)

SESSION 9

NOISE IN DEVICES

Accurate excess photodetection noise measurements in raman amplifiers [6603-54]
C. Chluda, M. Myara, P. Signoret, L. Troussellier, B. Orsal, CEM2 (France)

Repetitive single amplified high intensity ultra-short pulse laser system [6603-75]
J. Chen, K.-C. Chuang, Chung-Hua Univ. (Taiwan)

Excess noise sources in depolarized Raman pumping system [6603-81]
C. Chluda, M. Myara, L. Troussellier, J.-P. Perez, P. Signoret, B. Orsal, CEM2 (France)

Pump to signal and pump to ASE noise correlations in copropagative Raman amplifiers [6603-63]
C. Chluda, M. Myara, L. Troussellier, J.-P. Perez, P. Signoret, B. Orsal, IES (France)

Intensity noise of ultrabroadband quantum dot light emitting diodes and lasers at 1.3μm [6603-76]
M. Blazek, S. Breuer, T. Gensty, W. E. Elsäßer, Darmstadt Univ. of Technology (Germany); M. Hopkinson, K. M. Groom, Univ. of Sheffield (United Kingdom); M. Calligaro, P. Resneau, M. Krakowski, Alcatel Thales, III-V Lab. (France)

Intensity fluctuations of focused general-type beams in atmospheric optics links [6603-57]
Y. Baykal, H. T. Eyyuboğlu, Çankaya Univ. (Turkey)

Stochastic resonance in photonic crystal growth [6603-64]
A. Amann, W. Khunsin, G. Kocher, C. M. Sotomayor Torres, E. P. O’Reilly, Tyndall National Institute (Ireland)

Noise in atomic force microscopy images [6603-65]
P. S. Timashev, Institute of Laser and Information Technologies (Russia); N. A. Aksenova, A. B. Solovieva, N.N. Semenov Institute of Chemical Physics (Russia); S. F. Timashev, L. Ya. Karpov Institute of Physical Chemistry (Russia)

Removal of water-vapor-induced fluctuations in T-ray signals: a preliminary study [6603-66]
W. Withayachumnankul, B. M. Fischer, S. P. Mickan, D. Abbott, The Univ. of Adelaide (Australia)

Experimental demonstration of impact of amplified spontaneous emission on devices based on cross-gain modulation in semiconductor optical amplifiers [6603-67]
B. S. Gopaikrishna Pillai, K. L. Lee, A. Nirmalathas, The Univ. of Melbourne (Australia); M. Premaratne, The Univ. of Melbourne (Australia) and Monash Univ. (Australia); C. Lim, The Univ. of Melbourne (Australia)
The joint distribution of neutrons and gamma photons from fissile samples and its application in safeguards [6603-73]
I. Pázsit, Chalmers Univ. of Technology (Sweden); L. Pál, KFKI Atomic Energy Research Institute (Hungary); A. Enqvist, Chalmers Univ. of Technology (Sweden); S. A. Pozzi, Oak Ridge National Lab. (USA)

Complex dynamics observed in the noise spectrum of lateral coupled diode lasers [6603-56]
H. Lamela, R. Santos, Univ. Carlos III de Madrid (Spain)

Quantum Zeno and anti-Zeno effects for the damped harmonic oscillator [6603-58]
S. Maniscalco, J. Piilo, K.-A. Suominen, Univ. of Turku (Finland)

In-service and in real-time optical channel performance analysis with combined noise and jitter [6603-77]
S. V. Kartalopoulos, The Univ. of Oklahoma (USA)

M:N phase synchronization of LFF in a chaotic ECSL system [6603-90]
M. Bulinski, Univ. of Bucharest (Romania); C. M. Ticos, Los Alamos National Lab. (USA); I. R. Andrei, The National Institute for Lasers, Plasma and Radiation Physics (Romania)

Estimation of channel performance with fast reassignment and equalization assisted by supercontinuum sources [6603-52]
S. V. Kartalopoulos, The Univ. of Oklahoma (USA)

Localization of a small collection of fluorescing atoms (Invited Paper) [6603-87]
M. Macovei, J. Evers, Max-Planck-Institute for Nuclear Physics (Germany); M. S. Zubairy, Max-Planck-Institute for Nuclear Physics (Germany), Texas A&M Univ. (USA), and Texas A&M Univ. of Qatar (Qatar)

Quantum optics with a mechanical microresonator [6603-88]
C. Molinelli, O. Arcizet, T. Briant, P.-F. Cohadon, M. Pinard, A. Heidmann, Lab. Kastler Brossel, UPMC, ENS, CNRS (France)

Radiation-pressure effects and back-action cancellation in interferometric measurements [6603-71]
P. Verlot, T. Caniard, T. Briant, P.-F. Cohadon, A. Heidmann, Lab. Kastler Brossel, UPMC, ENS, CNRS (France)

Monte Carlo simulations of non-Markovian open systems [6603-70]
J. Piilo, S. Maniscalco, K.-A. Suominen, Univ. of Turku (Finland)

Fringe tracking with noisy interferometric data [6603-96]
D. Bonino, INAF, Osservatorio Astronomico di Torino (Italy) and Univ. degli studi di Torino (Italy); M. Gai, L. Corcione, INAF, Osservatorio Astronomico di Torino (Italy)
Model based reduction of nonstationary noise for single channel speech communication systems [6603-95]
X. Xiao, R. M. Nickel, The Pennsylvania State Univ. (USA)

Introduction

The fourth SPIE International Symposium on Fluctuations and Noise took place in May 20–24, 2007. This volume consists of the papers in the Noise and Fluctuations in Photonics, Quantum Optics, and Communications conference. The conference took place in a wonderful locale, at the Villa La Pietra in Florence, Italy. I thank all the authors for their participation and contributions.

In addition to the standard topics we had seven special sessions:

- Novel Quantum Optics (Suhail Zubairy)
- Nonstationary Noise (Lorenzo Galleani)
- Quantum Walks and Noise (Langford White, Sanjeev Naguleswaran)
- FaN in Atomic Clock Applications (Patrizia Tavella)
- Timing Noise in High-Energy Astronomy (Tomaso M. Belloni)
- Quantum Entanglement (Luiz Davidovich)
- Quantum Coherence (Hai-Woong Lee)

I thank the organizers for putting together outstanding sessions, and I particularly thank the staff of SPIE for their usual highly professional efforts and for all their help.

Leon Cohen
