### PLENARY SESSION

**8129 02** The history of telescopes and binoculars: an engineering perspective *(Plenary Paper)* [8129-100]
J. E. Greivenkamp, D. L. Steed, College of Optical Sciences, The Univ. of Arizona (United States)

### SESSION 1 IMAGING SYSTEMS

**8129 03** 3D astigmatic depth sensing camera [8129-01]
G. C. Birch, J. S. Tyo, J. Schwiegerling, College of Optical Sciences, The Univ. of Arizona (United States)

**8129 04** 3D imaging with a single-aperture 3-mm objective lens: concept, fabrication, and test *(Invited Paper)* [8129-02]
R. Korniski, S. Y. Bae, M. Shearn, H. Manohara, Jet Propulsion Lab. (United States); H. Shahinian, Skull Base Institute (United States)

**8129 05** Wide and narrow dual image guidance system for ground vehicle on fast focusing and stereo matching operation [8129-03]
A. Akiyama, Kanazawa Technical College (Japan); N. Kobayashi, Kanazawa Institute of Technology (Japan); E. Mutoh, Kawasaki Heavy Industries Ltd. (Japan); H. Kumagai, Tamagawa Seiki Co., Ltd. (Japan); H. Ishii, Nihon Univ. (Japan)

**8129 06** Reflective autofocus image system with MEMS deformable mirror and freeform design [8129-04]
W.-L. Chang, M.-H. Lin, G.-D. J. Su, National Taiwan Univ. (Taiwan)

**8129 07** Continuous optical zoom module based on two deformable mirrors for mobile device applications [8129-05]
Y.-H. Lin, G.-D. J. Su, National Taiwan Univ. (Taiwan)

### SESSION 2 BIOMEDICAL APPLICATIONS

**8129 08** Development of low-coherence light sheet illumination microscope for fluorescence-free bioimaging [8129-06]
Z. Xu, T. E. Holy, Washington Univ. School of Medicine in St. Louis (United States)
8129 0A **Design of a retinal tracking system for jumping spiders** [8129-08]
C. Canavesi, The Institute of Optics, Univ. of Rochester (United States); S. Long, Univ. of Massachusetts Amherst (United States); D. Fantone, The Institute of Optics, Univ. of Rochester (United States); E. Jakob, Univ. of Massachusetts Amherst (United States); R. R. Jackson, Univ. of Canterbury (New Zealand) and International Ctr. of Insect Physiology and Ecology (Kenya); D. Harland, AgResearch Ltd. (New Zealand); J. P. Rolland, The Institute of Optics, Univ. of Rochester (United States)

8129 0B **SOI strip waveguide microring resonator for homogeneous biosensing** [8129-09]
S. Malathi, N. Mangal, Indian Institute of Science Bangalore (India); S. A. Samad, Cochin Univ. of Science & Technology (India); R. V. Honnungar, T. Srinivas, Indian Institute of Science Bangalore (India)

**SESSION 3 SIMULATION AND METROLOGY**

8129 0C **Scalability of a cross-platform multi-threaded non-sequential optical ray tracer (Invited Paper)** [8129-10]
A. W. Greynolds, Ruda-Cardinal, Inc. (United States)

8129 0D **Modeling the role of phosphor grain packing in compact fluorescent lamps** [8129-11]
N. Pannier, M. Filoche, M. Piapp, Ecole Polytechnique (France); V. Buissette, T. Le Mercier, Rhodia (France)

8129 0E **Simulation and optimization of a sub-micron beam for macromolecular crystallography using SHADOW and XOP at GM/CA CAT at the APS** [8129-12]
Z. Liu, S. Xu, D. W. Yoder, R. F. Fischetti, Argonne National Lab. (United States)

8129 0F **Determination of off-axis aberrations of imaging systems using on-axis measurements (Invited Paper)** [8129-27]
J. H. Burge, C. Zhao, M. Dubin, S. Lampen, College of Optical Sciences, The Univ. of Arizona (United States)

8129 0H **Innovating spectrometry studies at undergraduate level using a linear CCD array** [8129-15]
A. Garg, R. Sharma, V. Dhingra, Acharya Narendra Dev College (India)

**SESSION 4 NONIMAGING AND FREEFORM OPTICS**

8129 0I **Ultracompact SWIR telephoto lens design with SMS method (Invited Paper)** [8129-16]
L. Wang, Univ. Politécnica de Madrid (Spain); P. Benítez, J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); J. Infante, Univ. Politécnica de Madrid (Spain) and Indra Sistemas, S.A. (Spain); M. de la Fuente, Indra Sistemas, S.A. (Spain); G. Biot, Univ. Politécnica de Madrid (Spain)

8129 0J **Fresnel lens solar concentrator derivations and simulations** [8129-17]
A. Davis, Reflexite Energy Solutions (United States)

8129 0K **Novel freeform optical surface design with spiral symmetry** [8129-18]
P. Zamora, Univ. Politécnica de Madrid (Spain); P. Benítez, J. C. Miñano, Univ. Politécnica de Madrid (Spain) and Light Prescriptions Innovators, LLC (United States); J. Vilaplana, Light Prescriptions Innovators, LLC (United States)
Optical design of light guide film with external illuminance backlight module [8129-19]
C.-T. Yen, National Formosa Univ. (Taiwan); Y.-C. Fang, C.-H. Huang, B.-R. Hsueh, C. Chen, National Kaohsiung First Univ. of Science and Technology (Taiwan)

Laser-based study of geometrical optics at school level [8129-21]
A. Garg, V. Dhingra, R. Sharma, A. Mittal, R. Tiwadi, P. Chakravarty, Acharya Narendra Dev College (India)

Optical sensor for the determination of adulteration in petrol: design and development [8129-22]
K. Kishor, R. K. Sinha, A. D. Varshney, V. Kumar, Delhi Technological Univ. (India)

Variation of optical polarization in reflected light by redistribution of electric charge in metals [8129-23]
J. G. Suarez-Romero, E. Hernandez-Gomez, Instituto Tecnológico de Querétaro (Mexico); J. B. Hurtado-Ramos, Ctr. de Investigación en Ciencia Aplicada y Tecnología Avanzada Querétaro (Mexico)

Optical design for LED dental lighting with imaging optic technique [8129-24]
Y.-H. Kwon, S.-C. Bae, H.-R. Lim, LED-IT Fusion Technology Research Ctr. (Korea, Republic of); J.-S. Jang, Yeungnam Univ. (Korea, Republic of)

Design and evaluation of wide field-of-view optical antenna [8129-28]
P. Deng, X. Yuan, Y. Zeng, M. Zhao, Huazhong Univ. of Science and Technology (China)

Author Index
Conference Committee

Program Track Chairs

**R. John Koshel**, Photon Engineering LLC (United States) and College of Optical Sciences, The University of Arizona (United States)

**José Sasián**, College of Optical Sciences, The University of Arizona (United States)

Conference Chairs

**R. John Koshel**, Photon Engineering LLC (United States) and College of Optical Sciences, The University of Arizona (United States)

**G. Groot Gregory**, Synopsys, Inc. (United States)

Program Committee

**W. Andrew Cheng**, PROSYS Optics Corporation (United States)

**Jyh-Long Chern**, National Chiao Tung University (Taiwan)

**Arthur J. Davis**, Reflexite Energy Solutions (United States)

**Oliver Dross**, Light Prescriptions Innovators Europe, S. L. (Germany)

**Frank S. Grochocki**, Ball Aerospace & Technologies Corporation (United States)

**Andrew R. Harvey**, Heriot-Watt University (United Kingdom)

**Joseph M. Howard**, NASA Goddard Space Flight Center (United States)

**Richard C. Juergens**, Raytheon Missile Systems (United States)

**Scott A. Lerner**, Hewlett-Packard Company (United States)

**Rongguang Liang**, College of Optical Sciences, The University of Arizona (United States)

**Paul K. Manhart**, NASA Langley Research Center (United States)

**Craig Olson**, L-3 Communications Sonoma EO (United States)

**Andrew Rakich**, Large Binocular Telescope Observatory (United States)

**Michael D. Robinson**, Richo Innovations, Inc. (United States)

**José Sasián**, College of Optical Sciences, The University of Arizona (United States)

**David L. Shealy**, The University of Alabama at Birmingham (United States)

**Andrew W. Sparks**, L-3 Wescam Sonoma Operations (United States)

**Marija Strojnik**, Centro de Investigaciones en Óptica, A.C. (Mexico)

**Kevin P. Thompson**, Optical Research Associates (United States)

Session Chairs

1 Imaging Systems

**Andrew W. Sparks**, L-3 Wescam Sonoma Operations (United States)
2 Biomedical Applications
Craig Olson, L-3 Communications Sonoma EO (United States)

3 Simulation and Metrology
Arthur J. Davis, Reflexite Energy Solutions (United States)

4 Nonimaging and Freeform Optics
Rongguang Liang, College of Optical Sciences, The University of Arizona (United States)
Introduction

In 2011 Novel Optical Systems Design and Optimization (Novel Optics) conference met for the fourteenth time at SPIE’s Optics and Photonics (O+P) in San Diego, California. The four oral and one poster sessions were well attended. The four oral sessions and their respective presiders were:

- Imaging Systems: from 3D imaging to zoom lenses; presider: Andrew Sparks (L-3)
- Biomedical Applications: from microscopes to eye tracking; presider: Craig Olson (L-3)
- Simulation and Metrology: from multi-threaded ray tracing to aberration measurement; presider: Arthur Davis (Reflexite), and
- Nonimaging and Freeform Optics: from simultaneous multiple surface telephoto lenses to headlights; presider: Rongguang Liang (Univ. of Arizona).

In 2011 the oral sessions were held on a single day so that the conference would be better focused and limit the overlap with other conferences held at O+P. This choice meant that there were more posters. Fortunately, the poster session immediately followed the completion of the oral sessions, such that the Novel Optics conference was compact and finished in one day.

There were four invited papers at Novel Optics:

- “3D imaging with a single-aperture 3-mm objective lens: concept, fabrication, and test,” by Sam Bae, Ronald Komiski, Harish Manohara (JPL), and Hrayr Shahninian (Skull Base Institute)
- “Design considerations for biomedical optical imaging systems,” by Rongguang Liang (Univ. of Arizona, but submitted when he was at Carestream Health)
- “Scalability of a cross-platform multi-threaded non-sequential optical ray tracer,” by Alan Greynolds (Ruda-Cardinal); and
- “Determination of off-axis aberrations of imaging systems using on-axis measurements,” by James Burge (Univ. of Arizona).

Additionally, the plenary paper from Prof. John Greivenkamp (Univ. of Arizona) entitled “The history of telescope and binoculars: an engineering perspective” appears in this volume. The Novel Optical Systems Design and Optimization conference continues to grow by presenting state-of-the-art optical systems and designs, while always being cognizant of the tools, design techniques, and systems from the past. Though the conference name starts with “Novel,” we would be remiss in not recognizing that the past guides a number of the designs of this day and future ones. The diverse topics presented at the conference led to lively and interesting discussions following each paper. Additionally, these
discussions were carried into the hallways following each session. This conference will have a bright future with contributors spanning multiple generations.

Our thanks go to those who helped make this conference a success, especially the authors, audience, SPIE staff, and program committee. The authors take the bulk of the credit for making this conference an unqualified success. The audience built upon this success by being active and asking engaging questions. The SPIE staff ensured that everything ran smoothly before, during, and after the meeting. The program committee provided excellent assistance to ensure the quality of the content while also presiding over the sessions. The program committee was composed of W. Andrew Cheng, Jyh-Long Chern, Arthur J. Davis, Oliver Dross, Frank S. Grochocki, Andrew R. Harvey, Joseph M. Howard, Richard C. Juergens, Scott A. Lerner, Rongguang Liang, Paul K. Manhart, Craig Olson, Andrew Rakich, Michael D. Robinson, José Sasián, David L. Shealy, Andrew W. Sparks, Marija Strojnik, and Kevin P. Thompson.

Next year we will return for the 15th iteration of this conference. The chairs will be Groot Gregory and Art Davis. John Koshel will be stepping down (finally) to allow a fresh face to contribute to the conference. The planning for Novel Optical Systems Design and Optimization XV in 2012 is already underway, so please start planning submissions, questions, and attendance. Focus themes are being decided at this time. If you would like to assist with the 2012 or later conference please contact one of us. We look forward to seeing you in 2012.
