PROCEEDINGS OF SPIE

Radar Sensor Technology XVI

Kenneth I. Ranney
Armin W. Doerry
Editors

23–25 April 2012
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 8361

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

### SESSION 1  ALGORITHMS AND PROCESSING I

<table>
<thead>
<tr>
<th>Paper Number</th>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>8361 02</td>
<td>Interferometric measurement of the angular velocity of moving humans</td>
<td>J. A. Nanzer, The Johns Hopkins Univ. Applied Physics Lab. (United States)</td>
</tr>
<tr>
<td>8361 03</td>
<td>Adaptive waveform scheduling in radar: an information theoretic approach</td>
<td>P. Setlur, N. Devroye, Univ. of Illinois at Chicago (United States)</td>
</tr>
<tr>
<td>8361 04</td>
<td>Testing a transmission line model for homogeneous subsurface media using ground penetrating radar</td>
<td>B. Rodriguez-Hervas, B. C. Flores, C. Pappu, R. F. von Borries, The Univ. of Texas at El Paso (United States); P. S. Debroux, U.S. Army Research Lab. (United States)</td>
</tr>
<tr>
<td>8361 05</td>
<td>High-resolution time-frequency representations based on the local polynomial Fourier transform for over-the-horizon radars</td>
<td>I. Djurović, S. Djukanović, Univ. of Montenegro (Montenegro); M. G. Amin, Y. D. Zhang, Villanova Univ. (United States); B. Himed, Air Force Research Lab. (United States)</td>
</tr>
</tbody>
</table>

### SESSION 2  ALGORITHMS AND PROCESSING II

<table>

<tbody>
<tr>
<td>8361 0A</td>
<td>Multifunctional millimeter-wave radar system for helicopter safety</td>
<td>D. S. Goshi, T. J. Case, J. B. McKitterick, L. Q. Bui, Honeywell International Inc. (United States)</td>
</tr>
</tbody>
</table>
Flexible end-to-end system design for synthetic aperture radar applications [8361-10]
E. C. Zaugg, M. C. Edwards, J. P. Bradley, ARTEMIS, Inc. (United States)

Radar-based full-body screening of passengers with constant motion [8361-11]
S. Hantscher, B. Schlenther, S. Lang, M. Hägelen, H. Essen, Fraunhofer Institute for High Frequency Physics and Radar Techniques (Germany); A. Tessmann, Fraunhofer Institute for Applied Solid State Physics (Germany)

Radar tracking and classification of littoral targets [8361-12]
J. Silvious, D. Tahrnoush, U.S. Army Research Lab. (United States)

3-D synthetic aperture processing on high-frequency wide-beam microwave systems [8361-14]
E. Cristofani, A. Brook, M. Vandewal, Royal Belgian Military Academy (Belgium)

Preliminary analysis of fully polarimetric air and spaceborne SAR measurements for security and reconnaissance purposes [8361-13]
H. Suess, German Aerospace Ctr. (Germany); T. Rueckel, Federal Armed Forces Univ. Munich (Germany)

SAR change detection for monitoring the impact of the rehabilitation of the Arghandab irrigation system in Afghanistan [8361-15]
J. Bustler, M. Ghazel, V. Kotamraju, MDA Systems Ltd. (Canada); L. Vandehei, Canadian International Development Agency (Canada); G. Aubé, Canadian Space Agency (Canada); C. Froese, Alberta Geological Survey (Canada)

Detection of clandestine tunnels in complex environments using a mobile focused-source electromagnetic data measurement and processing unit [8361-16]
S. Davydycheva, M. Frenkel, Border Security Technologies, LLC (United States)

Cooperative control of MAVs for a hidden emitter localization [8361-17]
M. Gates, R. Selmic, Louisiana Tech Univ. (United States); R. Ordonez, Univ. of Dayton (United States)

Synthetic aperture radar imaging of a two-story building [8361-18]
C. Le, T. Dogaru, U.S. Army Research Lab. (United States)

Indoor imagery with a 3-D through-wall synthetic aperture radar [8361-19]
P. Sévigny, D. J. DiFilippo, T. Laneve, Defence Research and Development Canada, Ottawa (Canada); J. Fournier, Defence Research and Development Canada, Valcartier (Canada)

Micro-Doppler processing for ultra-wideband radar data [8361-20]
G. E. Smith, The Ohio State Univ. (United States); F. Ahmad, M. G. Amin, Villanova Univ. (United States)
Histogram-based segmentation for stationary target detection in urban environments [8361-21]
M. G. Amin, Villanova Univ. (United States); P. Setlur, Univ. of Illinois at Chicago (United States); F. Ahmad, Villanova Univ. (United States); P. Sevigny, D. DiFilippo, Defence Research and Development Canada, Ottawa (Canada)

Evaluation of polarimetric through-the-wall radar measurements [8361-23]
T. Johansson, A. Sume, J. Rahm, S. Nilsson, A. Örbom, Swedish Defence Research Agency (Sweden)

SESSION 6 COMPONENTS AND TECHNOLOGY

High efficiency switching power amplifiers for multi-band radar [8361-24]
J. Lawler, J. Wells, S. Mendez, T. Wurth, NuWaves Engineering (United States)

Antenna array devised for amplifier integration [8361-25]
B. H. Strassner II, Sandia National Labs. (United States)

Compensating for inconsistent high power vircator microwave radar pulse sources [8361-26]
A. D. McAulay, Lehigh Univ. (United States)

Developments in extraordinary transmission metallic lens [8361-27]
M. Navarro-Cia, Imperial College London (United Kingdom); M. Beruete, F. Falcone, M. Sorolla, Univ. Pública de Navarra (Spain)

SESSION 7 ALGORITHMS AND PROCESSING III

Image-based target detection with multispectral UWB OFDM radar [8361-28]
T. D. Bufler, D. S. Garmatyuk, Miami Univ. (United States)

A new phase space method for target discrimination [8361-29]
F. J. Rachford, T. L. Carroll, U.S. Naval Research Lab. (United States)

Implementation of generalized detector for distributed sources using sensor arrays [8361-30]
V. Tuzlukov, Kyungpook National Univ. (Korea, Republic of)

Classification and modeling of human activities using empirical mode decomposition with S-band and millimeter-wave micro-Doppler radars [8361-32]
D. P. Fairchild, R. M. Narayanan, The Pennsylvania State Univ. (United States)

SESSION 8 PHENOMENOLOGY

Radar cross section statistics of cultural clutter at Ku-band [8361-33]
A. M. Raynal, D. L. Bickel, D. F. Dubbert, Sandia National Labs. (United States); T. J. Verge, General Atomics Aeronautical Systems, Inc. (United States); B. L. Burns, Sandia National Labs. (United States); R. Dunkel, General Atomics Aeronautical Systems, Inc. (United States); A. W. Doerry, Sandia National Labs. (United States)

</table>

**SESSION 10 SPECIAL TOPIC: NOISE RADAR II**

| 8361 16 | Noisy Stepped Frequency (NSF) waveform in RF tomography              | R. Vela, L. Lo Monte, Univ. of Dayton Research Lab. (United States) |                                        |
| 8361 17 | Ultra-wideband noise radar based on optical waveform generation      | D. Grodensky, D. Kravitz, A. Zadok, Bar-Ilan Univ. (Israel)        |                                        |
| 8361 18 | Impulse response characterization of the propagation and scattering environment in through-wall applications using an S-band noise radar | S. Smith, R. M. Narayanan, The Pennsylvania State Univ. (United States) |                                        |
| 8361 19 | Simultaneous human detection and ranging using a millimeter-wave radar system transmitting wideband noise with an embedded tone | K. A. Gallagher, R. M. Narayanan, The Pennsylvania State Univ. (United States) |                                        |
| 8361 1A | Microwave noise field: active radiometry principles and applications | J. Polivka, Spacek Labs. Inc. (United States)                      |                                        |
A better trihedral corner reflector for low grazing angles [8361-47]
A. W. Doerry, B. C. Brock, Sandia National Labs. (United States)

What maritime ISAR designers should know about ship dynamics [8361-48]
A. W. Doerry, Sandia National Labs. (United States)

Designing interpolation kernels for SAR data resampling [8361-49]
A. W. Doerry, Sandia National Labs. (United States); E. Bishop, J. Miller, V. Horndt, General Atomics Aeronautical Systems, Inc. (United States); D. Small, Sandia National Labs. (United States)

Multitarget detection algorithm for automotive FMCW radar [8361-50]
E. Hyun, Daegu Gyeongbuk Institute of Science & Technology (Korea, Republic of); W.-J. Oh, Kumoh National Institute of Technology (Korea, Republic of); J.-H. Lee, Daegu Gyeongbuk Institute of Science & Technology (Korea, Republic of)

Tunnel monitoring with an advanced InSAR technique [8361-51]
B. Rabus, J. Eppler, J. Sharma, J. Busler, MacDonald, Dettwiler and Associates Ltd. (Canada)

Integrated radar-camera security system: range test [8361-53]
M. Życzkowski, M. Szustakowski, W. Ciurapiński, M. Karol, P. Markowski, Military Univ. of Technology (Poland)

Fast stereo matching under variable illumination [8361-56]
S. Arunagiri, A. Contreras, E. Gallardo, A. DattaGupta, P. J. Teller, The Univ. of Texas at El Paso (United States); J. C. Deroba, U.S. Army Intelligence and Information Warfare Directorate (United States); L. H. Nguyen, Army Research Lab (United States)

Novel nonlinear phase distortion estimation in wideband linear frequency modulated waveform [8361-58]
H. Yang, J. Chun, KAIST (Korea, Republic of); S.-C. Song, Samsung Thales Co., Ltd. (Korea, Republic of)

Target detection using multi-resolution forward-looking SAR imagery [8361-59]
R. Innocenti, K. Ranney, L. Nguyen, U.S. Army Research Lab. (United States)

Contrast-based moving target detection with the randomized linear receive array [8361-60]
K. Ranney, A. Martone, R. Innocenti, L. Nguyen, U.S. Army Research Lab. (United States)

Lynx maritime radar in USN experiment Trident Warrior 2011 [8361-62]
R. Dunkel, Z. Link, T. Verge, J. Laue, General Atomics Aeronautical Systems, Inc. (United States)

An efficient means to mitigate wavefront curvature effects in polar format processed SAR imagery [8361-63]
R. Linnehan, M. Yasuda, General Atomics Aeronautical Systems, Inc. (United States); A. Doerry, Sandia National Labs. (United States)

Author Index
Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

Kenneth I. Ranney, U.S. Army Research Laboratory (United States)
Armin W. Doerry, Sandia National Laboratories (United States)

Program Committee

Fauzia Ahmad, Villanova University (United States)
Joseph C. Deroba, U.S. Army CERDEC Intelligence and Information Warfare Directorate (United States)
Doreen M. Dyck, Defence Research and Development Canada, Ottawa (Canada)
Benjamin C. Flores, The University of Texas at El Paso (United States)
Majeed M. Hayat, The University of New Mexico (United States)
Todd A. Kastle, Air Force Research Laboratory (United States)
Seong-Hwoon Kim, Raytheon Space & Airborne Systems (United States)
James L. Kurtz, University of Florida (United States)
Changzhi Li, Texas Tech University (United States)
Jenshan Lin, University of Florida (United States)
David G. Long, Brigham Young University (United States)
Jia-Jih Lu, General Atomics Aeronautical Systems, Inc. (United States)
Anthony F. Martone, U.S. Army Research Laboratory (United States)
George J. Moussally, Mirage Systems (United States)
Ram M. Narayanan, The Pennsylvania State University (United States)
Lam H. Nguyen, U.S. Army Research Laboratory (United States)
Hector A. Ochoa-Gutierrez, The University of Texas at Tyler (United States)
Meppalli K. Shandas, dB Control (United States)
Jerry Silvious, U.S. Army Research Laboratory (United States)
Brian Smith, U.S. Army Armament Research, Development and Engineering Center (United States)
Helmut H. Suess, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)
David Tahmoush, U.S. Army Research Laboratory (United States)
Steven J. Weiss, U.S. Army Research Laboratory (United States)
Lars M. Wells, Sandia National Laboratories (United States)

Session Chairs

1  Algorithms and Processing I
   Jerry Silvious, U.S. Army Research Laboratory (United States)

2  Algorithms and Processing II
   Lam H. Nguyen, U.S. Army Research Laboratory (United States)

3  Systems and Applications I
   Ann Marie Raynal, Sandia National Laboratories (United States)

4  Systems and Applications II
   David Tahmoush, U.S. Army Research Laboratory (United States)

5  Special Topic: Through-the-Wall Sensing
   Gregory J. Mazzaro, U.S. Army Research Laboratory (United States)
   Anthony F. Martone, U.S. Army Research Laboratory (United States)

6  Components and Technology
   Seong-Hwoon Kim, Raytheon Space & Airborne Systems
   (United States)

7  Algorithms and Processing III
   Fauzia Ahmad, Villanova University (United States)

8  Phenomenology
   Gregory J. Mazzaro, U.S. Army Research Laboratory (United States)

9  Special Topic: Noise Radar I
   Ram M. Narayanan, The Pennsylvania State University (United States)

10 Special Topic: Noise Radar II
    Mark Govoni, U.S. Army Research, Development and Engineering
        Command (United States)
