## Contents

### vii Authors

### ix Conference Committee

### REMOTE SENSING, MODELING APPLICATION, AND GIS I

| 10767 02 | Harnessing commercial satellite technologies to monitor our forests (Invited Paper) [10767-1] |
| 10767 04 | Characterization of canola canopies using optical and SAR imagery [10767-4] |
| 10767 05 | Green areas and urban heat island: combining remote sensed data with ground observations [10767-6] |
| 10767 06 | Synthetic aperture radar for pipeline right-of-way monitoring [10767-51] |

### REMOTE SENSING, MODELING APPLICATION, AND GIS II

| 10767 08 | The Compact Hyperspectral Prism Spectrometer: advanced imaging spectrometer for sustainable land imaging (Invited Paper) [10767-8] |
| 10767 09 | A method for quantifying the number of U.S. lakes with cyanobacterial harmful algal blooms using satellite remote sensing [10767-9] |
| 10767 0A | The urbanization impact in China: a prospective model (1992-2025) [10767-10] |

### REMOTE SENSING FOR AGRICULTURE, ECOSYSTEMS, AND HYDROLOGY

| 10767 0C | Spatial interpolation of surface ozone observations using deep learning (Invited Paper) [10767-12] |
| 10767 0G | Investigation of the impact of urban vegetation on air pollutants based on remotely sensed measurements: a case study in Shenzhen, China [10767-17] |

### POSTER SESSION

| 10767 0H | Study on spatial distribution of aerosol optical depth and particulate matter using MODIS data [10767-18] |
Research on crop classification in northeast China based on multi-source and multi-temporal SAR Images [10767-20]

Research of forest type identification based on multi-dimensional POLSAR data in northeast China [10767-21]

The spatial distribution characteristics and ground-level estimation of NO2 and SO2 over Huaihe River Basin and Shanghai based on satellite observations [10767-22]

Study on the extraction method of tidal flat [10767-23]

Thermally enhanced spectral indices to discriminate burn severity in Mediterranean forest ecosystems [10767-24]

Correction and prediction of ultraviolet (UV-MFRSR) radiation value based on GARCH model [10767-25]

The variation characteristics of PM2.5 in Shanghai and its correlation with meteorological factors [10767-26]

Comparative study of the spatial interpolation methods for the Shanghai regional air quality evaluation [10767-27]

Analysis of land use changes and driving factors in Dongying urban area from 2005 to 2015 [10767-28]

Simulation of land use/cover change in Shanghai based on SLEUTH model [10767-29]

Analysis on land use changes and their driving forces in Weihai City between 2005 and 2015 [10767-31]

Using remote sensing to assess sustainable development on a Chinese national-level new district [10767-32]

A photon-efficient method based on curve fitting for photon counting 3D imaging lidar [10767-34]

Estimating initial biomass of green tide algae in the South Yellow Sea with aid of UAV and S2A data [10767-35]

Cardiovascular and respiratory diseases surveillance around Shanghai Chemical Industry Park based on remote sensing [10767-37]

The extraction of wetland vegetation information based on UAV remote sensing images [10767-38]

Change of sea surface temperature in the northwest Pacific Ocean over the past decade and its impacts on fisheries [10767-39]

Monitoring of polluted water in coastal zone using unmanned aerial vehicle remote sensing [10767-40]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair
Allen H.-L. Huang, University of Wisconsin-Madison (United States)

Conference Chairs
Wei Gao, Colorado State University (United States)
Ni-Bin Chang, University of Central Florida (United States)
Jinnian Wang, CHINARS SHENZHEN Institute for Satellite Applications Innovation (China)

Conference Program Committee
May Chui, The University of Hong Kong (Hong Kong, China)
E. Raymond Hunt Jr., Agricultural Research Service (United States)
Brian Robert Johnson, University of Colorado (United States)
Thomas U. Kampe, Ball Aerospace & Technologies Corporation (United States)
Xin-Zhong Liang, University of Maryland, College Park (United States)
William Parton, Colorado State University (United States)
David Riaño, University of California, Davis (United States)
Runhe Shi, East China Normal University (China)
Jiong Shu, East China Normal University (China)
Zhibin Sun, Colorado State University (United States)
Hongjie Xie, The University of Texas at San Antonio (United States)
Xiaobing Zhou, Montana Tech (United States)
K. Raja Reddy, Mississippi State University (United States)

Session Chairs
1 Remote Sensing, Modeling Application, and GIS I
Thomas U. Kampe, Ball Aerospace & Technologies Corporation (United States)
Brian Robert Johnson, University of Colorado (United States)

2 Remote Sensing, Modeling Application, and GIS II
Thomas U. Kampe, Ball Aerospace & Technologies Corporation (United States)
Brian Robert Johnson, University of Colorado (United States)

3 Remote Sensing for Agriculture, Ecosystems, and Hydrology
Ni-Bin Chang, University of Central Florida (United States)
Zhibin Sun, Colorado State University (United States)
