</table>

**HUMAN INFORMATION INTERACTION: ADVANCED CONCEPTS**

| 11006 OL | Uncertainty-aware situational understanding [11006-20] |
| 11006 OM | Agent based simulation of decision making with uncertainty [11006-21] |
| 11006 ON | Application of data science within the Army intelligence warfighting function: problem summary and key findings [11006-22] |
| 11006 OO | Computational tools to support analysis and decision making [11006-23] |
| 11006 OP | Managing training data from untrusted partners using self-generating policies [11006-24] |

**HUMAN AGENT TEAMING I**

| 11006 OR | Partnering with technology: the importance of human machine teaming in future MDC2 systems [11006-25] |
| 11006 OS | Grounding natural language commands to StarCraft II game states for narration-guided reinforcement learning [11006-26] |
| 11006 OT | Improving motion sickness severity classification through multi-modal data fusion [11006-27] |
| 11006 OU | Investigating immersive collective intelligence [11006-28] |
| 11006 OV | Intelligent squad weapon: challenges to displaying and interacting with artificial intelligence in small arms weapon systems [11006-29] |
| Proc. of SPIE Vol. 11006 1100601-5 |
---|---|

**HUMAN AGENT TEAMING II**

11006 0 W  *Classification of military occupational specialty codes for agent learning in human-agent teams* [11006-31]

11006 0 X  *Achieving useful AI explanations in a high-tempo complex environment* [11006-32]

11006 0 Y  *A framework for enhancing human-agent teamwork through adaptive individualized technologies* [11006-33]

11006 0 Z  *Effect of cooperative team size on coordination in adaptive multi-agent systems* [11006-34]

11006 10  *Developing the sensitivity of LIME for better machine learning explanation* [11006-55]

**NOVEL AI/ML ALGORITHMS**

11006 11  *Intelligence augmentation for urban warfare operation planning using deep reinforcement learning* [11006-35]

11006 12  *Super-convergence: very fast training of neural networks using large learning rates* [11006-36]

11006 13  *An efficient approximate algorithm for achieving (k −ω) barrier coverage in camera wireless sensor networks* [11006-37]

11006 14  *Algorithmically identifying strategies in multi-agent game-theoretic environments* [11006-38]

11006 15  *A rapid convergent genetic algorithm for NP-hard problems* [11006-39]

11006 16  *Identifying maritime vessels at multiple levels of descriptions using deep features* [11006-40]

11006 17  *Super resolution-assisted deep aerial vehicle detection* [11006-41]

11006 18  *Using convolutional neural network autoencoders to understand unlabeled data* [11006-42]

11006 19  *Bayesian learning of random signal distributions in complex environments* [11006-70]

**ADVERSARIAL LEARNING**

11006 1 C  *Defending against adversarial attacks in deep neural networks* [11006-45]

11006 1 D  *Model poisoning attacks against distributed machine learning systems* [11006-46]

11006 1 E  *Steps toward a principled approach to automating cyber responses* [11006-47]
### AI/ML APPLICATIONS

| 11006 1F | DAIS-ITA scenario [11006-3] |
| 11006 1G | Towards building actionable indicators of compromise based on a collaboration model [11006-48] |
| 11006 1H | Radar emitter and activity identification using deep clustering methods [11006-49] |
| 11006 1I | Approaches to address the data skew problem in federated learning [11006-50] |
| 11006 1J | Experience and lessons learned from the Army RCO Blind Signal Classification Competition [11006-52] |

### POSTER SESSION

| 11006 1K | Properties of federated averaging on highly distributed data [11006-51] |
| 11006 1L | Beyond validation accuracy: incorporating out-of-distribution checks, explainability, and adversarial attacks into classifier design [11006-53] |
| 11006 1M | Image quality and super resolution effects on object recognition using deep neural networks [11006-54] |
| 11006 1O | Security engineering with machine learning for adversarial resiliency in cyber physical systems [11006-59] |
| 11006 1P | On the machine learning for minimizing the negative influence in mobile cyber physical systems [11006-60] |
| 11006 1Q | Deep adversarial attack on target detection systems [11006-61] |
| 11006 1R | How to practically deploy deep neural networks to distributed network environments for scene perception [11006-62] |
| 11006 1S | Machine learning using template matching applied to object tracking in video data [11006-63] |
| 11006 1T | Overview of machine learning (ML) based perception algorithms for unstructured and degraded visual environments [11006-64] |
| 11006 1U | Reducing bathymetric-lidar algorithm uncertainty with genetic programming and the evolutionary multi-objective algorithm design engine [11006-65] |
| 11006 1W | Understanding of multi-domain battle challenges: AI/ML and the day/night thermal variability of targets [11006-67] |
| 11006 1X | Machine learning based spectral interpretation in chemical detection [11006-68] |
Radio frequency classification toolbox for drone detection [11006-69]

Contingent attention management in multitasked environments [11006-72]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)
Ruth L. Moser, Air Force Research Laboratory (United States)

Symposium Co-chair

John Pellegrino, Electro-Optical Systems Laboratory, Georgia Institute of Technology (United States)

Conference Chair

Tien Pham, U.S. Army Research Laboratory (United States)

Conference Co-chair

Latasha Solomon, U.S. Army Research Laboratory (United States)

Conference Program Committee

Tarek Abdelzaher, University of Illinois (United States)
Erik Blash, Air Force Office of Scientific Research (United States)
Addison Bohannon, U.S. Army Research Laboratory (United States)
Kevin Chan, U.S. Army Research Laboratory (United States)
Supriyo Chakraborty, IBM Thomas J. Watson Research Center (United States)
Ed Colbert, Virginia Polytechnic Institute and State University (United States)
Geeth del Mel, IBM United Kingdom Ltd. (United Kingdom)
John Fossaceca, U.S. Army Research Laboratory (United States)
Tim Hanratty, U.S. Army Research Laboratory (United States)
Brian J. Henz, U.S. Army Research Laboratory (United States)
Brian Jalaian, U.S. Army Research Laboratory (United States)
Henry Leung, University of Calgary (Canada)
Gavin Pearson, Defence Science and Technology Laboratory (United Kingdom)
Alun D. Preece, Cardiff University (United Kingdom)
Katie Rainey, SPAWAR Systems Center Pacific (United States)
Brian Satterfield, Lockheed Martin Corporation (United States)
Peter Schwartz, Mitre (United States)
Dietrich Wiegmann, U.S. Army Research Laboratory (United States)
Robert Williams, Discovery Laboratory Global (United States)
Session Chairs

1  AI/ML Multi-Domain Operations (MDO)
   Tien Pham, U.S. Army Research Laboratory (United States)
   Latasha Solomon, U.S. Army Research Laboratory (United States)

2  Context-VOI/Trust
   Kevin S. Chan, U.S. Army Research Laboratory (United States)

3  Enabling Capabilities for AI/ML
   Katie Rainey, SPAWAR Systems Center Pacific (United States)

4  Learning in Complex Environments
   Alun D. Preece, Cardiff University (United Kingdom)
   Tarek Abdelzaher, University of Illinois (United States)

5  Human Information Interaction: Advanced Concepts
   Timothy P. Hanratty, U.S. Army Research Laboratory (United States)
   Addison W. Bohannon, U.S. Army Research Laboratory (United States)

6  Human Agent Teaming I
   Timothy P. Hanratty, U.S. Army Research Laboratory (United States)
   Addison W. Bohannon, U.S. Army Research Laboratory (United States)

7  Human Agent Teaming II
   Addison W. Bohannon, U.S. Army Research Laboratory (United States)
   Timothy P. Hanratty, U.S. Army Research Laboratory (United States)

8  Novel AI/ML Algorithms
   Robert Williams, Discovery Laboratory Global (United States)
   Brian Jalaian, U.S. Army Research Laboratory (United States)

9  Adversarial Learning
   Supriyo Chakraborty, IBM Thomas J. Watson Research Center
   (United States)
   Kevin S. Chan, U.S. Army Research Laboratory (United States)

10 AI/ML Applications
    Brian J. Henz, U.S. Army Research Laboratory (United States)
    Peter Schwartz, The MITRE Corporation (United States)
