xxi Introduction

TARGET DETECTION AND ALGORITHM

11519 02 Shallow triple Unet for shadow detection [11519-5]
11519 03 Railway insulator defect detection with deep convolutional neural networks [11519-6]
11519 04 DeepClass: edge-based class occupancy detection aided by deep learning and image cropping [11519-13]
11519 05 Semi-supervised learning for facial component-landmark detection [11519-17]
11519 06 Anchor-free one-stage detector for unmanned aerial vehicle [11519-19]
11519 07 Road diseases detection method based on probability superposition convolutional neural network [11519-29]
11519 08 Target analysis based anomaly detection in surveillance videos [11519-53]
11519 09 A pothole detection method based on 3D point cloud segmentation [11519-54]
11519 0A An empirical study on the use of visual explanation in kidney cancer detection [11519-61]
11519 0B Table detection method based on feature pyramid network with faster R-CNN [11519-62]
11519 0C A vehicle detection algorithm in complex traffic scenes [11519-63]
11519 0D An intelligent CFAR algorithm based on multi-strategy fusion [11519-68]
11519 0E Outdoor parking line detection based on monocular fisheye camera [11519-78]
11519 0F Lung tumor detection using PET/CT scanning based on multiscale and multimodality Mask R-CNN [11519-83]
11519 0G Adaptive weighted semantic edge detection of cultural relics [11519-85]
Real-time object detection based on R-FCN network under structured scene of high-speed railway [11519-89]

**IMAGE TRANSFORMATION AND ANALYSIS**

Multi-feature learning for low-light image enhancement [11519-2]

Generative adversarial network for bidirectional mappings between synthetic and real facial image [11519-4]

An automatic segmentation method based on geometrical features in hemispherical images for forest management [11519-7]

Feature guidance GAN for high quality image restoration [11519-9]

Global thresholding based on improved histogram for chalk area segmentation in rice quality evaluation [11519-18]

Surface normal data guided depth map restoration with edge-preserving smoothing regularization [11519-33]

Generative image inpainting with residual attention learning [11519-48]

Image salt and pepper noise adaptive based on fuzzy median filtering [11519-50]

An attention based method for video semantic segmentation [11519-71]

**PATTERN RECOGNITION**

FPGA-based skin disease identification system using SIFT algorithm and K-NN [11519-16]

Research on book call number recognition under complex color background [11519-22]

Periocular recognition in the wild with learned label smoothing regularization [11519-41]

Recognition of mechanical sphygmomanometer dial value based on Hough transform [11519-70]

A novel incremental person re-recognition method with constant update speed [11519-76]
### OPTICAL IMAGING AND REMOTE SENSING TECHNOLOGY

### COMPUTER VISION AND IMAGE PROCESSING

| 11519 15 | Efficient registration of aerial video to geo-referenced images [11519-3] |
| 11519 16 | Privacy aware crowd-counting using thermal cameras [11519-14] |
| 11519 17 | A fast intra mode decision algorithm based on the sum of region-directional dispersion for virtual reality 360-degree video [11519-25] |
| 11519 18 | A novel image classification algorithm using CNN on a small computation platform [11519-27] |
| 11519 19 | Fast intra-mode decision algorithm for virtual reality 360-degree video based on decision tree and texture direction [11519-28] |
| 11519 1A | Image-to-image translation-based face deocclusion [11519-35] |
| 11519 1B | Reduction of computing resources in convolutional neural network for knee MRI of ACL tears by feature-based method [11519-66] |
| 11519 1C | The gait analysis system based on the first-person video for applications on home health care [11519-79] |
Global deformation model for 3D facial combination

DIGITAL IMAGE PROCESSING TECHNOLOGY AND METHOD

Laser speckle denoising with deep convolutional network
Multi-scale contextual attention-based HDR reconstruction of dynamic scenes
Speckle noise reduction in digital holography using random overlapping masks and 3D block matching filtering
Object 6D pose estimation with non-local attention
Unsupervised variational auto-encoder hash algorithm based on multi-channel feature fusion
Image compressed sensing recovery via adaptive dictionary learning
Illumination normalization of face image
Implementing real time image processing algorithm on FPGA
Multi-sensor images registration based on SIFT and extended phase correlation
A semi-supervised trace lasso norm regularized image classification method
A scale-adaptive real-time target tracking algorithm based on KCF

IMAGE PROCESSING AND APPLICATION

A rotation invariance spatial transformation network for remote sensing image retrieval
Determination of pupillary distance using YOLO algorithm
IC chip marking inspection using FIR system
Previous observation regularized tracker
Robust deep supervised hashing for image retrieval
MetaAMC: meta learning and AutoML for model compression
Accurate volume measurement of road potholes based on 3D point clouds [11519-56]

Sparse subspace clustering with one-way selective orthogonal matching pursuit [11519-59]

Multi RBF-kernel support vector regression for clinical cognitive scores prediction in schizophrenia [11519-65]

A 3D seam extraction and tracking method based on binocular structured light sensor [11519-72]

An efficient deep face matching method for ID and selfie photos: SIRFace [11519-77]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Xudong Jiang, Nanyang Technological University (Singapore)

Conference Co-chair

Hiroshi Fujita, Gifu University (Japan)

Advisory Chair

Keisuke Goda, University of Tokyo (Japan)

Program Committee Chairs

Christine Fernandez-Maloigne, Université de Poitiers (France)
Giovanni Pau, UCLA Samueli School of Engineering (United States)

Steering Committee

Yuri Rzhanov, University of New Hampshire (United States)
Konstantin Rumyantsev, Southern Federal University (Russian Federation)
Yi Xie, Wuhan University (China)

Publicity Chairs

András Horváth, Pázmány Péter Catholic University (Hungary)
Krzysztof Koszela, Poznan University of Life Sciences (Poland)

Technical Committee

Bai Lin, Chang’an University (China)
Bicheng Li, Information Engineering University (China)
Bin Li, University of Science and Technology of China (China)
Bin Tang, University of Electronic Science and Technology of China (China)
Bin Yan, National Digital Switching Center (China)
Chen Qiu, Kogakuin University (Japan)
Cheng Han, Changchun University of Science and Technology (China)
Chi-Man Pun, University of Macau (Macau)
Chin-Feng Lee, Chaoyang University of Technology (Taiwan)
Dengyin Zhang, Nanjing University of Posts and Telecommunications (China)
Youdong Ding, Shanghai University (China)
Dongmei Fu, University of Science and Technology Beijing (China)
Dongming Zhou, Yunnan University (China)
En-Bing Lin, Central Michigan University (United States)
Zhen Liu, Ningbo University (China)
Zheng Han, Chifeng University (China)
Zhenzhou Wang, Chinese Academy of Sciences (China)
Zhezhou Yu, Jilin University (China)
Zhi Li, Shanghai University (China)
Zhihua Xie, Jiangxi Science and Technology Normal University (China)
Zhitao Xiao, Tianjin Polytechnic University (China)
Zhiwei He, HangZhou DianZi University (China)
Zhuozheng Wang, Beijing University of Technology (China)
Junzhou Zou, East China University of Science and Technology (China)
Zuochang Ye, Tsinghua University (China)
Aiwen Jiang, Jiangxi Normal University (China)
Bing Xiao, Shaanxi Normal University (China)
Bingxin Lu, Dalian Maritime University (China)
Binjie Qin, Shanghai Jiao Tong University (China)
Chao Cheng, Shanghai Changhai Hospital, Second Military Medical University (China)
Chaoxing Wang, Nanjing University of Aeronautics and Astronautics (China)
Chengpo Mu, Beijing Institute of Technology Beijing (China)
Daisuke Miyazaki, Hiroshima City University (Japan)
Fan Zhao, Xi’an University of Technology (China)
Feifei Tang, Chongqing Jiaotong University (China)
Guang Yang, Beijing University (China)
Guoliang Lu, Shandong University (China)
Guoyuan Liang, Chinese Academy of Sciences (China)
Hatanaka Yuji, The University of Shiga Prefecture (Japan)
Hongzhi Wu, Shandong Institute for Development Strategy of Science and Technology (China)
Jia-ming Deng, Jiaying University (China)
Jiwei Hu, Wuhan University of Technology (China)
Junchao Wang, Hangzhou Dianzi University (China)
Langming Zhou, Hunan University (China)
Linbo Qing, Sichuan University (China)
Yaowen Lv, Changchun University of Science and Technology (China)
Manhua Liu, Shanghai Jiao Tong University (China)
Miyamoto Yukinobu, Kobe Gakuin University (Japan)
Ningyu Zhang, Shandong Jianzhu University (China)
P.J. Herrera, Universidad Nacional de Educación a Distancia (Spain)
Peng Zhang, Sun Yat-sen University, Shenzhen (China)
Peiquan Jin, University of Science and Technology of China (China)
Qian Huang, Hohai University (China)
Qingsheng Liu, The Chinese Academy of Sciences (China)
Rencan Nie, Yunnan University (China)
Shouhong Wan, University of Science and Technology of China (China)
Zhaoxia Xie, Beijing Institute of Graphic Communication (China)
Zhuqing Yuan, Tsinghua University (China)
Ziyang Cao, Chang'an University (China)
Zuofeng Zhou, Xi'an Institute of Optics and Precision Mechanics of Chinese Academy of Science (China)
Introduction

This volume includes the papers accepted for presentation at the Twelfth International Conference on Digital Image Processing (ICDIP 2020), which was held virtually 19-22, May 2020 due to the worldwide eruption of COVID-19.

ICDIP 2020 was sponsored by the International Association of Computer Science & Information Technology (Singapore) and technically supported by University of Leeds (United Kingdom), Tufts University (United States), Gifu University (Japan), University of New Hampshire (United States), Université de Bordeaux (France), Poznan University of Technology (Poland), Poznan University of Life Sciences (Poland), and Polish Society for IT Applications in Agriculture, Forestry and Food (Poland). The key goal of the conference was to bring academic scientists, engineers, and industry researchers together to exchange and share their expertise, experience, and research results, and discuss the challenges and future direction of their specialized areas of research in the field of digital image processing. Professors from the United Kingdom, United States, Singapore, Hong Kong, Japan, and France delivered the keynote invited presentations about state-of-the-art research in their areas of expertise. In addition, nine parallel sessions were successfully conducted through the efforts of the session chairs and presenters.

This proceedings volume includes 70 selected papers which were submitted to the conference from universities, research institutes, and industries. All contributed papers have gone through a rigorous blind peer-review process. They were reviewed by at least two experts who are qualified in the field of digital image processing. The papers will provide the readers an overview of many recent advances in the fields related to digital image processing.

We would like to thank all the authors who contributed to this volume and to the members of the organizing committee, reviewers, speakers, chairpersons, partners, and conference participants for their support of ICDIP 2020.

We truly believe that the participants had fruitful discussions and enjoyed the opportunity for future collaborations.

Xudong Jiang
Hiroshi Fujita
