Volume 11443
Part One of Two Parts
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)
ISBN: 9781510636736

Paper Numbering: Proceedings of SPIE follow an e-first publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- the first five digits correspond to the SPIE volume number.
- the last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... OZ, followed by 10-1Z, 20-22, etc. The CID Number appears on each page of the manuscript.
# Contents

## Part One

### OPERATIONAL & PAST MISSIONS

<table>
<thead>
<tr>
<th>Page</th>
<th>Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>11443 08</td>
<td>The role of NASA Engineering and Safety Center (NESC) in advancing NASA's astrophysics missions (past, present, and future)</td>
<td>[11443-270]</td>
</tr>
<tr>
<td>11443 09</td>
<td>The <em>Herschel</em> Space Observatory development, operation and post-operations: lessons learned</td>
<td>[11443-1]</td>
</tr>
</tbody>

Development of an optical and near-infrared telescope onboard the HiZ-GUNDAM mission [11443-19]

JWST

Status of the James Webb Space Telescope mission [11443-21]

Preparing the JWST observatory for science observations [11443-24]

TRANSITING EXOPLANET MISSIONS I

The ESA Ariel mission is ready for implementation [11443-78]

PLATO telescope optical units: an update on working status [11443-80]

TRANSITING EXOPLANET MISSIONS II

CHEOPS, the ESA mission for exo-planets characterization: early operations and commissioning results [11443-82]

LOTUS: wide-field monitoring nanosatellite for finding long-period transiting planets [11443-84]

The MARSU CubeSat: monitoring the activity and planetary transits of low-mass stars and young solar analogues [11443-87]

ENABLING TECHNOLOGIES: OPTICS AND OPTOMECHANICS

Optical space telescope without mirrors [11443-89]

Programmable microshutter selection masks in application to UV spectroscopy [11443-91]

ENABLING TECHNOLOGIES: DETECTORS AND ELECTRONICS

MAJIS/JUICE VIS-NIR FM and SM detectors characterization [11443-137]
### INTERFEROMETRY, FORMATION FLYING, AND STARSHADES

| 11443 1N | Far-infrared intensity interferometry for high angular resolution imaging [11443-139] |
| 11443 1R | Validation of diffraction models with experimental results from the Princeton starshade testbed [11443-143] |

### EXOPLANET IMAGING MISSIONS I

| 11443 1U | The Nancy Grace Roman Space Telescope Coronagraph Instrument (CGI) technology demonstration [11443-194] |
| 11443 1W | Roman CGI testbed HOWFSC modeling and validation [11443-196] |
| 11443 1Y | Design of the vacuum high contrast imaging testbed for CDEEP, the Coronagraphic Debris and Exoplanet Exploring Pioneer [11443-198] |

### EXOPLANET IMAGING MISSIONS II

| 11443 1Z | A space mission dedicated for the characterization of habitable rocky planets [11443-199] |
| 11443 20 | The Habitable Exoplanet Observatory mission concept [11443-200] |
| 11443 24 | Integration times adjusted completeness [11443-204] |

### FAR-INFRARED AND MILLIMETER MISSIONS I

| 11443 27 | The 2020 SPICA telescope preliminary design and predicted performance [11443-207] |
| 11443 28 | Cryogenic system of the infrared space mission SPICA [11443-208] |
| 11443 29 | Mechanical cooler system for the infrared space mission SPICA [11443-209] |
| 11443 2A | ATSA: a cold, active telescope for Space Astronomy [11443-269] |

### FAR-INFRARED AND MILLIMETER MISSIONS III

| 11443 2F | LiteBIRD satellite: JAXA’s new strategic L-class mission for all-sky surveys of cosmic microwave background polarization [11443-249] |
Overview of the medium and high frequency telescopes of the LiteBIRD space mission [11443-250]

TECHNOLOGIES: WAVEFRONT SENSING

Implementation of a dark hole maintenance algorithm for speckle drift in a high contrast space coronagraph [11443-254]

Cross-fringe technique for sensing piston errors of segmented mirror telescope [11443-255]

TECHNOLOGIES: HIGH CONTRAST IMAGING

Construction of EXIST (Exoplanet Imaging System Testbed) toward future space coronagraphs [11443-256]

Experimental analysis of the achromatic performance of a vector vortex coronagraph [11443-258]

Wavefront control experiments with a single mode fiber at the High-Contrast Spectroscopy Testbed for Segmented Telescopes (HCST) [11443-260]

SOLAR SYSTEM AND HELIOPHYSICS

Scientific processing pipeline for ASPIICS coronograph [11443-264]

Focus mechanism for EXOMARS mission: lessons learned from preliminary design to space flight model delivery [11443-266]

POSTER SESSION: CUBESATS AND SMALLSATS

First error budget of a deployable CubeSat telescope [11443-95]

High-resolution deployable CubeSat prototype [11443-96]

Non-contact vibration isolation technology demonstration on a CubeSat [11443-97]

POSTER SESSION: EXOPLANET IMAGING

The Roman exoplanet imaging data challenge: a major community engagement effort [11443-146]
A review of simulation and performance modeling tools for the Roman coronagraph instrument [11443-148]

Prediction and evaluation of the image of the WFIRST coronagraph pupil at the shaped-pupil mask [11443-149]

Part Two

Habitable-zone observatory (HabEx) baseline 4-m telescope design and predicted performance [11443-152]

POSTER SESSION: HIGH CONTRAST IMAGING

Predicting contrast sensitivity to segmented aperture misalignment modes for the HiCAT testbed [11443-158]

A sequential optimization procedure designed for Lyot coronagraph aiming to realize high contrast direct imaging for exoplanets [11443-161]

Data processing for high-contrast imaging with the James Webb Space Telescope [11443-163]

Exploiting symmetries and progressive refinement for apodized pupil Lyot coronagraph design [11443-165]

Design of the life signature detection polarimeter LSDpol [11443-167]

ExoSpec project: an exoplanet spectroscopy technology research collaboration based at NASA’s Goddard Space Flight Center and Ames Research Center [11443-169]

Towards high throughput and low-order aberration robustness for vortex coronagraphs with central obstructions [11443-174]

Mueller matrix maps of dichroic filters reveal polarization aberrations [11443-275]

POSTER SESSION: WAVEFRONT SENSING AND CONTROL

Phasing a sparse telescope [11443-182]

Estimating low-order aberrations through a Lyot coronagraph with a Zernike wavefront sensor for exoplanet imaging [11443-186]

Integrating bias and gain invariance with the generalized Anscombe transform for wavefront sensing [11443-188]

Deep neural networks to improve the dynamic range of Zernike phase-contrast wavefront sensing in high-contrast imaging systems [11443-189]
POSTER SESSION: JWST

11443 4D  Modelling the path length of aluminium seen by the detectors in the MIRI instrument on the JWST [11443-32]

POSTER SESSION: TRANSITING EXOPLANET MISSIONS

11443 4P  The role of the instrument control unit within the ARIEL Payload and its current design [11443-48]
11443 4Q  On the optical alignment of the PLATO cameras [11443-49]
11443 4R  Product assurance for the PLATO Telescope optical unit [11443-50]
11443 4S  A combined software and hardware data compression approach in PLATO [11443-51]
11443 4T  A white light collimator for Plato camera integration support [11443-52]
11443 4V  The instrument control unit of the PLATO payload: design consolidation following the preliminary design review by ESA [11443-54]
11443 4X  Design and validation of the boot software for the instrument control unit of the PLATO mission [11443-56]
11443 51  Design of the electrical ground support equipment for the PLATO camera AIV [11443-60]

POSTER SESSION: WIDE FIELD SURVEY MISSIONS

11443 59  Data processing unit’s hardware and application software description of the Near Infrared Spectro-Photometer: Euclid mission [11443-69]
11443 5A  Pre-flight optical test and calibration for the Cosmic Infrared Background ExpeRiment 2 (CIBER-2) [11443-70]
11443 5B  The application software for the instrument control unit of the NISP instrument of the Euclid mission: final status and lessons learned after delivery of the flight version [11443-71]
11443 5F  Photon counting and precision photometry for the Roman Space Telescope Coronagraph [11443-271]
**POSTER SESSION: DETECTORS AND ELECTRONICS**

11443 5H  Multicore processor based instrument control and data processing units design for the SPICA Instruments [11443-104]

11443 5M  MVIC flight and flight spare sensor calibration [11443-109]

11443 5Q  Detector fabrication development for the LiteBiRD satellite mission [11443-114]

**POSTER SESSION: OPTICS AND OPTOMECHANICS**

11443 65  Parameters for mirror selection: trades between glass ceramics, glass, metals, ceramics and cordierites [11443-130]

**POSTER SESSION: INTERFEROMETRY, FORMATION FLYING, AND STARSHADES**

11443 66  Linear formation-flying astronomical interferometry in low-Earth orbit: a feasibility study [11443-177]

11443 6A  Broadband characterization of anti-reflection coated starshade optical edges for solar glint control [11443-181]

**POSTER SESSION: FAR-IR AND MILLIMETER**

11443 6B  Development of EXo-Zodiacal Infrared Telescope (EXZIT) for observation of visible and near-infrared extragalactic background light [11443-210]

11443 6C  Polarization angle measurement of LiteBiRD low frequency telescope scaled model [11443-211]

11443 6D  Laboratory experiment of densified pupil spectrograph for the Origins Space Telescope [11443-212]

11443 6F  Simulating electromagnetic transfer function from the transmission antennae to the sensors vicinity in LiteBiRD [11443-214]

11443 6G  SPICA Mid-infrared Instrument (SMI): The latest design and specifications [11443-215]

11443 6H  The calibration source assembly for SPICA/SAFARI Instrument [11443-216]

11443 6I  The 4K focal plane unit for SPICA’s SAFARI far infrared instrument [11443-217]

11443 6K  The mid-infrared spectrometer/camera (MiSC) for the Origins Space Telescope [11443-219]
Calibration strategy for the SPICA/SAFARI instrument [11443-220]

A far infrared spectrometer for SPICA mission: optical E2E of SAFARI [11443-226]

Evaluation of reconstructed angular error of a continuous rotating HWP for LiteBIRD [11443-276]

A polarization modulator unit for the mid- and high-frequency telescopes of the LiteBIRD mission [11443-282]

The optical design of the Litebird middle and high frequency telescope [11443-283]

POSTER SESSION: SOLAR SYSTEM AND HELIOPHYSICS

Selection of in-flight flat-field calibration dither pattern for the Solar Disk imager of the Lyman-alpha Solar Telescope [11443-234]

Setting the parameters for the stellar calibration of the SIMBIO-SYS STC camera on-board the ESA BepiColombo mission [11443-235]

On-board de-spiking implemented by MAJIS, the VIS/NIR Imaging spectrometer of JUICE [11443-239]

The optical head of the EnVisS camera for the Comet Interceptor ESA mission: phase 0 study [11443-240]

HYPSOS: a HYperspectral stereo observing system for solar system exploration [11443-243]

Simulations of stray light from the surface scattering of the Solar Corona Imager primary mirror [11443-272]

Thermal-vacuum and security system of the characterization facility for MAJIS/JUICE VIS-NIR FM and SM detectors [11443-277]

Characterization facility for the MAJIS/JUICE VIS-NIR FM and SM detectors [11443-278]

POSTER SESSION: MISSION DEVELOPMENT AND PLANNING

Establishing a resilient flagships science program [11443-44]
