The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), “Title of Paper,” in Twelfth International Conference on Information Optics and Photonics, edited by Yue Yang, Proc. of SPIE 12057, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:
• The first five digits correspond to the SPIE volume number.
• The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 08 ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.
Contents

Part One

TWELFTH INTERNATIONAL CONFERENCE ON INFORMATION OPTICS AND PHOTONICS

12057 02 Optical element surface defects detection and quantitative evaluation standard based on dark-field imaging [12057-1]

12057 03 Compact portable laser system for transportable communication band ultra-narrow linewidth laser [12057-2]

12057 05 Residual amplitude modulation suppression to $6 \times 10^{-7}$ in frequency modulation [12057-4]

12057 06 Spectral calibration method for Stokes polarimeter [12057-5]

12057 07 Effects of impurities (Fe, Ce, Cu, Ca) on electronic and optical properties in fused silica: a first-principles calculation [12057-6]

12057 08 Investigation of defect formation in InGaAs on GaP/ Si (100) substrates [12057-7]

12057 09 GaSb-based narrow ridge waveguide laser diode with single transverse mode operation [12057-10]

12057 0A Vibration detection and reconstruction based on Φ-OTDR with dual AOM [12057-11]

12057 0B High-speed camouflage detection with checkerboard projection [12057-12]

12057 0C Design optimization of the single-mode hybrid photonic crystal terahertz waveguide chips [12057-13]

12057 0D High-stable photonics-based frequency-quadrupled LFM signal generation for radar applications [12057-14]

12057 0E Multimode assisted open-cavity Mach-Zehnder interferometer [12057-15]

12057 0F Intensity modulated optical liquid level sensor based on cascaded multimode-single-mode-multimode fiber structure [12057-16]

12057 0G Highly stable erbium-doped fiber amplifier (EDFA) pumped with a constant-current-driven semiconductor laser diode (LD) [12057-17]

12057 0H Subring-wavelength multidimensional multiplexing for quad-comb generation from an integrated dual-ring mode-locked laser [12057-18]
Fast lithographic source pupil optimization using difference of convex functions algorithm for transformed L1 penalty [12057-20]

Comparison of sparse-based full chip source optimization with different bases [12057-21]

Deep learning-based 3D shape reconstruction with multi-frequency projection fringes [12057-22]

A new measurement method for contrast sensitivity and color difference threshold characteristics of human eyes [12057-23]

Observing the different two-photon interference phenomena at ultrashort timescale with a series of polarizers based on two-photon absorption detection [12057-24]

Theoretical investigation of properties of filament pumped by Gaussian and super-Gaussian beams at relative low incident power [12057-25]

Experimental demonstration of multimode fiber active illuminated imaging via deep learning [12057-26]

Shot-noise-limited displacement measurement with frequency-synthesized light [12057-27]

A novel method to simultaneously obtain phase modulation depth and residual amplitude modulation ratio in sinusoidal phase modulating interferometer [12057-28]

Study of phase-sensitive heterodyne locking [12057-29]

Obtain the phase velocity of ocean waves by using distributed acoustic sensing [12057-31]

Design of special cylinder support for reflective mirror in space optical instrument for laser communication [12057-32]

Spectral reconstruction with model-based neural network for liquid crystal modulator devices [12057-33]

Photobiomodulation enhances macrophage phagocytic capacity via Rac1 activation [12057-34]

Wireless channel security monitoring based on integrated all optical channelized receiver [12057-35]

Gas pressure sensor based on a hollow cavity modulated phase shifted fiber Bragg grating [12057-36]

Research on performance of vector magnetic field sensor based on side-polished hollow-core fiber coated with magnetic fluid [12057-41]

Hydrogen sensor based on a fiber optic F-P interferometer with a fiber Bragg grating and a nanofilm [12057-42]
12057 10 Error compensation of the multi-visual structured light 3D measurement system based on 3D point cloud for accuracy consistency [12057-43]

12057 11 A deep learning approach for noise reduction of off-axis computer generated holograms [12057-44]

12057 12 Optical microresonator based on an in-fiber rectangular air bubble [12057-45]

12057 13 AFC-900 large-format aerial frame camera: design principles and photogrammetric processing [12057-46]

12057 14 Natural light field compressive imaging [12057-47]

12057 15 Displacement sensor based on a macrobending plastic optical fiber with a multi-notched structure [12057-48]

12057 16 Filtering algorithm in 3D reconstruction of wheel tread based on moire profilometry [12057-49]

12057 17 A core-offset hetero structured optical fiber based surface plasmon resonance sensor [12057-50]

12057 18 Stable continuous-wave THz vector imaging based on an optical frequency comb [12057-51]

12057 19 Radial phase shift spiral zone plate fabrication using direct laser writing for generating a perfect vortex beam [12057-52]

12057 1A A compact ultrafast GHz mode-locked fiber laser for optical sub-sampling [12057-54]

12057 1B A novel pattern-free phase unwrapping algorithm [12057-55]

12057 1C Design of a distributed Brillouin optical fiber sensing system based on high efficiency and cost-effective consideration [12057-56]

12057 1D Deep homography convolutional neural network for fast and accurate image registration [12057-58]

12057 1E 3D point cloud surface reconstruction algorithm of pantograph slide [12057-60]

12057 1F Low dark current and high bandwidth waveguide photodetector by selective area growth technique for photonic integration [12057-61]

12057 1G Temperature and strain fiber sensor design based on microstructural Fabry-Perot cavity [12057-62]

12057 1H Effects of different preparation processes on the transparent electromagnetic shielding performance of graphene [12057-63]

12057 1I A simple self-oscillating optical frequency comb generator based on the monolithic integrated laser subject to the gain-switching state [12057-65]

Research on training set in image segmentation of terahertz digital holographic reconstructed image based on convolutional neural network [12057-97]

Ag:SnO$_2$/CuAlO$_2$ based photoelectronic synapse for artificial vision system [12057-99]

Design and analysis of polarization-splitting low-loss rectangular fiber [12057-101]

Photoelectronic synaptic performance of SiO$_x$/a-Si$_{1-x}$Ru$_x$ bilayer based memristors [12057-102]

Structured continuous thick metal film with largely enhanced transmission [12057-103]

Magnetic field sensor based on multilongitudinal mode fiber laser and radio-frequency demodulation [12057-105]

Dark-field imaging and Raman spectroscopy study of the interaction process between cells and nanoparticles [12057-106]

High-performance surface-illuminated pin photodetector array for 200Gbps receiving system [12057-107]

Interactions between stratified chiral particles optically trapped in high-order Bessel beams [12057-110]

Mode-conversion in few-mode fibers based on PC-FWM [12057-111]

Study on far-field intensity of phased laser beams with different polarization states [12057-112]

Defocusing detection based on asymmetric placement of dual-quadrant detector [12057-115]

A scanner matching method based on covariance matrix adaptation evolution strategy [12057-116]

A sensitized fiber optic Fabry-Perot temperature sensor based on virtual Vernier effect [12057-117]

Fiber optic refractive index sensor based on tapered capillary [12057-118]

Continual learning for scene classification of high resolution remote sensing images [12057-119]

Dither-free bias control technique at the null point of the MZM based on power monitoring [12057-120]

**Part Two**

Linear polarization characteristics of broadband half-wave plate based on monolayer all-dielectric metamaterials [12057-121]
| 12057 2L | A fiber laser temperature-sensing system with customizable sensitivity based on beat frequency demodulation method [12057-122] |
| 12057 2M | Acoustic heterogeneity correction in photoacoustic tomography based on ultrasound tomography [12057-123] |
| 12057 2N | Metal defect detection based on primary three-color channel [12057-124] |
| 12057 2O | Flexible tactile sensor with 2D structure based on Fiber Bragg grating [12057-125] |
| 12057 2P | Bending vector sensing based on periodic core-offset ultra-long period fiber grating [12057-126] |
| 12057 2Q | Study on the influence of laser seeker tracking state on far field direct laser [12057-127] |
| 12057 2R | Simulation of non-line-of-sight communication with nonuniform Monte-Carlo model [12057-128] |
| 12057 2S | Sub-kilohertz laser linewidth measurement using a loss-compensated recirculating self-heterodyne method with short fiber [12057-129] |
| 12057 2T | Tunable polydimethylsiloxane-based microsphere for magnetic field sensing [12057-130] |
| 12057 2U | Research on vibration sensing characteristics of FBG packaged with composites [12057-131] |
| 12057 2V | Design and simulation of electromagnetically induced transparent structure based on terahertz metamaterials [12057-132] |
| 12057 2W | Construction of narrow-band infrared radiation characteristics database for high-temperature hydrocarbon combustion media [12057-133] |
| 12057 2X | Inter-satellite laser ranging for time-delay interferometry in space-based gravitational-wave detection [12057-134] |
| 12057 2Y | Amplified O-band direct-detection transmission using bismuth-doped fiber amplifiers [12057-135] |
| 12057 2Z | Magnetic field sensor based on PDMS incorporated with ferromagnetic nanocrystals [12057-138] |
| 12057 30 | Bionic retina-like first-photon imaging [12057-139] |
| 12057 31 | Super-resolution microscopy based on structural illumination [12057-140] |
| 12057 32 | Microwave photonic based high-resolution ISAR imaging system for high-speed target [12057-141] |
| 12057 33 | Generation of multi-focus abruptly autofocusing beams [12057-142] |
Low-light-level image pixel super-resolution reconstruction method [12057-143]

A simplified OFDR system with an integrated in-fiber auxiliary interferometer [12057-145]

Measurement and inversion of Mueller matrix on metal surface [12057-146]

High-speed processing of silicon carbide ceramic by high repetition frequency femtosecond laser [12057-148]

Auto-focusing of ultra-clean sample based on projection view method [12057-149]

Photonic-enabled high frequency broadband RF canceller based on optical spectrum processing [12057-150]

Experimental study on laser cleaning of pollutants on the surface of ceramic relics [12057-153]

Image-based noise filtering method for Geiger-mode APD array Lidar data [12057-154]

Pneumonia image classification based on convolutional neural network [12057-155]

Effect of variable temperature growth on the crystal quality and surface morphology characteristics of InGaAs/GaAs MQWs obtained via MOCVD [12057-156]

Single-exposure 3D label-free microscopy based on color-multiplexed intensity diffraction tomography [12057-157]

Random nanostructures based on moth-eye antireflection for broadband and wide-angle transmission-enhanced [12057-158]

Digital holographic microplastics detection and characterization in heterogeneous samples via deep learning [12057-161]

Time-frequency image-based signal recognition by using improved CenterNet [12057-162]

Light efficiency enhanced quantum dot color conversion layer based on a distributed Bragg reflector [12057-163]

Detection of microparticles in flow by 2D light scattering and fluorescence imaging [12057-164]

A SiN-Si dual-layer optical phased array with high radiation efficiency and large steering range [12057-167]

Adaptive mode control in LMA fiber laser with a photonic lantern [12057-169]

Ultra-compact optical switch based on Sb2Se3-assisted PhC-like subwavelength structures [12057-171]

High-accuracy real-time omnidirectional 3D scanning and inspection system [12057-172]
Fast and accurate temperature extraction via general regression neural network for BOTDA sensors [12057-174]

Generation of a 100GHz Kerr soliton frequency comb in an auxiliary laser assisted Si₃N₄ micro-ring resonator [12057-176]

Thermal analysis of water-cooling channel structure under high power laser [12057-177]

The influence of the assembly error of the plenoptic sensor on the wavefront detection [12057-179]

Application of a revised scanning splice method for the Mueller microscope [12057-182]

Modulation format identification based on logistics regression for high-speed coherent optical communication system [12057-183]

Airborne Geiger-mode lidar system with real-time data compression [12057-184]

Inversion of atmospheric turbulence profiles based on generalized Hufnagel-Valley model and DCIM lidar [12057-185]

Comparative study of two target detection algorithms in UAV aerial photography detection [12057-189]

Surface plasmon resonance sensor based on gold-coated hollow fiber structure [12057-194]

Dual-comb generation based on nonlinear polarization rotation and Lyot filter in a single-cavity fiber laser [12057-195]

Modeling study of UV optical characteristics of multiphase alumina cluster in the plume [12057-196]

Optically stimulated synaptic devices based on silicon-tin alloyed thin film [12057-200]

Slope and curvature detection algorithm with high noise immunity in four-hole amplitude-modulated wavefront sensor [12057-201]

Detection of carrier-envelope offset frequency of a figure-of-9 erbium-doped fiber laser [12057-202]

Experimental validation of modified EGN model in real-time 400G/800G transmission with PCS and digital sub-carrier multiplexing [12057-203]

Parallel-cascaded Mach-Zehnder interferometers fiber-optic disturbance detecting system [12057-205]

Experimental investigations on the influence of molten-state duration time upon transmission characteristics of helical long-period fiber gratings [12057-206]
Simulations of impacts on aerial image performance of defocus on different resolution enhancement technologies [12057-207]

A novel fiber-optic surface plasmon resonance sialic acid nanosensor based on boronic-acid-functionalized Au NPs [12057-209]

Structured illumination microscopy and super-resolution image reconstruction [12057-211]

Novel mode control method based on transmission matrix characteristics of a photonic lantern [12057-212]

A field trial of microwave photonic radar system based on photonic arbitrary waveform generator [12057-213]

Research on scanning infrared digital holography with large field of view [12057-214]

The propagation properties of a double-half inverse Gaussian hollow beam with vortex through free space [12057-215]

Ultra-narrow band sensor based on dielectric array coupling metal substrate in the visible [12057-216]

The key technologies in the kW-class thin-disk laser [12057-217]

End-to-end algorithm for absolute phase retrieval [12057-218]

Polarization measurement errors analysis on fully-automatic polarimetry [12057-219]

Large depth of field imaging method with liquid lens [12057-220]

A pupil aberration recovery method for Fourier ptychography based on annular illumination [12057-223]

Total variation method for reconstruction of three-dimensional refractive index distribution of optical fiber under sparse angle [12057-224]

Optical coherence tomography using nonstationary signal processing based on continuous wavelet transform [12057-225]

Terahertz time-domain spectroscopy of wide-bandgap semiconductors GaN and β-Ga2O3 [12057-226]

Spectral reconstruction with dictionary leaning based on spatially modulated photonic crystal [12057-227]

Hyperspectral imaging system based on fiber endoscope [12057-228]

Research on edge enhancement of optical image based on acousto-optic filtering [12057-229]
