ix Conference Committee
xi Introduction

ORGANIC PHOTONICS + ELECTRONICS PLENARY SESSION

8477 02 Plastic solar cells: breaking the 10% commercialization barrier (Plenary Paper) [8477-103]
L. Dou, J. You, C.-C. Chen, G. Li, Y. Yang, Univ. of California, Los Angeles (United States)

8477 04 Stability and degradation of organic photovoltaics fabricated, aged, and characterized by the ISOS 3 inter-laboratory collaboration [8477-2]
D. M. Tanenbaum, Technical Univ. of Denmark (Denmark) and Pomona College (United States); M. Hermenau, Technische Univ. Dresden (Germany); E. Voroshazi, IMEC (Belgium) and Katholieke Univ. Leuven (Belgium); M. T. Lloyd, National Renewable Energy Lab. (United States); Y. Galagan, Holst Ctr. (Netherlands); B. Zimmermann, Fraunhofer Institute for Solar Energy Systems (Germany); M. Hösel, H. F. Dam, M. Jørgensen, S. Georgyevan, Technical Univ. of Denmark (Denmark); S. Kudret, W. Maes, L. Lutsen, D. Vanderzande, Hasselt Univ. (Belgium); U. Würfel, Fraunhofer Institute for Solar Energy Systems (Germany); R. Andriesen, Holst Ctr. (Netherlands); R. Rösch, H. Hoppe, Ilmenau Univ. of Technology (Germany); M. Lira-Cantu, G. Teran-Escobar, CIN2, CSIC, Lab. of Nanostructured Materials for Photovoltaic Energy (Spain); A. Dupuis, P.-O. Bussière, A. Rivaton, Clermont Univ., Univ. Blaise Pascal, LPMM (France) and LPMM, CNRS (France); G. Y. Uzunoğlu, TÜBİTAK National Metrology Institute (Turkey); D. Germack, Brookhaven National Lab. (United States); B. Andreasen, M. V. Madsen, K. Normann, E. Bundgaard, F. C. Krebs, Technical Univ. of Denmark (Denmark)

8477 05 Efficient organic vacuum deposited tandem solar cells and modules (Invited Paper) [8477-3]
C. L. Uhrich, R. Meerheim, T. Mueller, F. Lindner, K. Walzer, B. Maennig, A. Weiss, M. Pfeiffer, Heliatek GmbH (Germany)

8477 08 Donor/acceptor morphology control for efficient and stable photovoltaic cells by using semiconducting diblock copolymers (Invited Paper) [8477-6]
K. Tajima, The Univ. of Tokyo (Japan) and Japan Science and Technology Agency (Japan); S. Miyanishi, Y. Zhang, K. Hashimoto, The Univ. of Tokyo (Japan)
Electronic structure tuning of new fused thieno[3,2-b]thieno bisthiophene based polymers via alkyl chain and Group IV heteroatom modulation [8477-7]
B. C. Schroeder, H. Bronstein, R. S. Ashraf, W. Zhang, Z. Huang, P. Shakya Tuladhar, T. D. Anthopoulos, J. R. Durrant, I. McCulloch, Imperial College London (United Kingdom)

DEVICE PHYSICS AND FILM MORPHOLOGY

Spatial mapping of photocurrents in organic solar cells comprising wedge-shaped absorber layers for an efficient material screening [8477-12]
F. Nickel, C. Sprau, M. F. G. Klein, J. Mescher, U. Lemmer, A. Colsmann, Karlsruhe Institute of Technology (Germany)

Characterization of charge transport via in situ potentiometry in bulk heterojunction organic photovoltaic materials [8477-13]
E. Danielson, C. Lombardo, A. Dodabalapur, The Univ. of Texas at Austin (United States)

Imaging organic solar cell morphology with organic light emitting diode-organic solar cell devices [8477-14]
G. Williams, H. Aziz, Univ. of Waterloo (Canada)

HIGH-EFFICIENCY AND LARGE-AREA ORGANIC SOLAR CELLS

Realization of high efficiency inverted polymer photovoltaic cells for roll-to-roll application (Invited Paper) [8477-15]
F. So, Univ. of Florida (United States)

Low-temperature solution-processed metal oxide buffer layers fulfilling large area production requirements [8477-17]
T. Stubhan, I. Litzov, N. Li, H. Q. Wang, J. Krantz, F. Machui, M. Steidl, H. Oh, G. J. Matt, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); C. J. Brabec, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany) and Bavarian Ctr. for Applied Energy Research (Germany)

Spray deposited PTB7:PC71BM organic polymer solar cells for efficient power generation [8477-19]
S. Ochiai, P. Kumar, K. Santhakumar, L. Saitoh, K. Kojima, Aichi Institute of Technology (Japan); P.-K. Shin, Inha Univ. (Korea, Republic of)

High-speed inkjet printing for organic photovoltaic devices [8477-20]
M. Senghor, M. Manceau, F. Ardiaca, R. de Bettignies, S. Berson, Lab. des Technologies pour les Modules Photovoltaïques, CEA-DRT-LITEN-DTS (France); L. Dassas, S. Poughon, DisaTech/DisaSolar (France); C. Dossou-Yovo, R. Noguera, Ceradrop (France)

CHARGE SEPARATION AND RECOMBINATION

A predictive theory of charge separation in organic photovoltaics interfaces (Invited Paper) [8477-25]
A. Troisi, T. Liu, D. Caruso, D. L. Cheung, D. P. McMahon, The Univ. of Warwick (United Kingdom)
In situ Raman study of ordered molecular aggregates during freeze-dry fabrication of bulk heterojunction solar cells [8477-27]
Y.-B. Lan, P.-H. Sher, C.-H. Cheng, Academia Sinica (Taiwan); P.-T. Huang, Fu-Jen Univ. (Taiwan); J.-K. Wang, Academia Sinica (Taiwan) and National Taiwan Univ. (Taiwan)

IMPROVED SOLAR LIGHT HARVESTING

Improving the light-harvesting of second generation solar cells with photochemical upconversion (Invited Paper) [8477-33]
Y. Y. Cheng, B. Fückel, T. Schulze, R. W. MacQueen, M. J. Y. Tayebjee, A. Danos, T. Khoury, R. G. C. R. Clady, The Univ. of Sydney (Australia); N. J. Ekins-Daukes, Imperial College London (United Kingdom); M. J. Crossley, The Univ. of Sydney (Australia); B. Stannowski, K. Lips, Helmholtz-Zentrum Berlin für Materialien und Energie GmbH (Germany); T. W. Schmidt, The Univ. of Sydney (Australia)

Near IR sensitization of polymer/fullerene solar cells [8477-34]
T. Ameri, J. Min, N. Li, F. Machui, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); C. J. Brabec, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany) and Bavarian Ctr. for Applied Energy Research (Germany); M. Forster, K. Schottler, D. Dolfen, S. Allard, U. Scherf, Bergische Univ. Wuppertal (Germany)

Leveraging directional emission together with nonimaging optics for next-generation luminescent solar concentrators (Invited Paper) [8477-35]
N. C. Giebink, The Pennsylvania State Univ. (United States)

Optical properties enhancement in low-bandgap organic solar cells with embedded PEDOT:PSS gratings [8477-36]
X. Zhu, The Univ. of Hong Kong (Hong Kong, China); C. Duan, South China Univ. of Technology (China); W. C. H. Choy, F. Xie, C. Wang, The Univ. of Hong Kong (Hong Kong, China); F. Huang, Y. Cao, South China Univ. of Technology (China)

HYBRID DEVICES AND PLASMONIC NANOSTRUCTURES

Hybrid photovoltaic devices based on chalcogenide nanostructures (Invited Paper) [8477-37]
J. N. de Freitas, J. P. C. Alves, Univ. Estadual de Campinas (Brazil); L. Koralia, S. L. Brock, Wayne State Univ. (United States); A. F. Nogueira, Univ. Estadual de Campinas (Brazil)

Dye adsorption feature on titania surface and role of dye aggregation inhibitor monitored by quartz crystal microbalance (QCM) [8477-38]
R. Hirota, Y. Ogomi, S. S. Pandey, S. Hayase, Kyushu Institute of Technology (Japan)

Mixing plasmonic Au nanoparticles into all polymer layers for improving the efficiency of organic solar cells [8477-39]
W. C. H. Choy, C. C. D. Wang, D. D. S. Fung, W. E. I. Sha, F.-X. Xie, The Univ. of Hong Kong (Hong Kong, China)
8477 14 **Theoretical studies of effects of 2D plasmonic grating on electrical properties of organic solar cells** [8477-40]
W. E. I. Sha, W. C. H. Choy, The Univ. of Hong Kong (Hong Kong, China); W. C. Chew, The Univ. of Hong Kong (Hong Kong, China) and Univ. of Illinois, Urbana-Champaign (United States)

**POSTER SESSION**

8477 17 **Organic photovoltaic cells with core/shell quantum dots embedded in poly(methyl methacrylate)** [8477-43]
K.-C. Kwon, Y. Park, K. S. Choi, Chung-Ang Univ. (Korea, Republic of); H. Yang, Hongik Univ. (Korea, Republic of); S. Y. Kim, Chung-Ang Univ. (Korea, Republic of)

8477 19 **Evaluation of characteristics on the bulk heterojunction solar cells prepared by PCDTBT: PC_{71}BM composite thin film** [8477-45]
M. Ito, K. Santhakumar, P. Kumar, K. Kojima, Aichi Institute of Technology (Japan); P.-K. Shin, Inha Univ. (Korea, Republic of); S. Ochiai, Aichi Institute of Technology (Japan)

8477 1A **Evaluation of the characteristics of the organic thin film solar cell fabricated by poly[4,8-bis(2-ethylhexyloxy)benzo[1,2-b:4,5-b’]dithiophene-2,6-diyl-alt-(4-octanoyl-5-fluorothieno[3,4-b]thiophene-2-carboxylate)-2,6-diyl]/[6,6]-phenyl-C_{71}-butyric acid methyl ester** [8477-46]
T. Komura, K. Santhakumar, P. Kumar, Aichi Institute of Technology (Japan); P.-K. Shin, Inha Univ. (Korea, Republic of); K. Kojima, S. Ochiai, Aichi Institute of Technology (Japan)

8477 1C **GISAXS studies of initial growth mode and nanostructure of bulk heterojunction layers in planar type metal phthalocyanine molecules** [8477-48]
H. J. Kim, J. W. Kim, Seoul National Univ. (Korea, Republic of); H. H. Lee, Pohang Accelerator Lab. (Korea, Republic of); B. Lee, Argonne National Lab. (United States); J.-J. Kim, Seoul National Univ. (Korea, Republic of)

8477 1D **PEDOT:PSS-free Au nanocluster treated graphene as transparent anode for organic solar cells** [8477-49]
D. Zhang, W. C. H. Choy, The Univ. of Hong Kong (Hong Kong, China); H. Zhu, Tsinghua Univ. (China)

8477 1E **Efficient planar-mixed heterojunction photovoltaic device based on subphthalocyanine:C_{70} structure** [8477-50]
W.-C. Su, National Taiwan Univ. of Science and Technology (Taiwan); S.-W. Liu, Ming Chi Univ. of Technology (Taiwan); C.-W. Cheng, C.-C. Chou, J.-C. Huang, C.-C. Lee, National Taiwan Univ. of Science and Technology (Taiwan)

8477 1G **Organic solvent wetting properties of UV and plasma treated ZnO nanorods: printed electronics approach** [8477-52]
R. Sliz, Univ. of Oulu (Finland); Y. Suzuki, A. Nathan, Cambridge Univ. (United Kingdom); R. Myllyla, Univ. of Oulu (Finland); G. Jabbour, Univ. of Oulu (Finland) and King Abdullah Univ. of Science and Technology (Saudi Arabia)

8477 1H **Synthesis and characterization of donor-acceptor copolymers carrying triphenylamine units for photovoltaic applications** [8477-53]
K. Neumann, M. Theilakkat, Univ. of Bayreuth (Germany)
Correlating crystallinity and photophysics for donor polymers of interest for organic photovoltaic devices [8477-54]
Y. W. Soon, S. Shoaee, I. McCulloch, J. R. Durrant, Imperial College London (United Kingdom)

A simple and inexpensive encapsulation route for high-throughput characterization of organic photovoltaic devices [8477-55]
M. P. Nikiforov, S. B. Darling, Argonne National Lab. (United States)

Intermediate layers for tandem structure of bulk heterojunction photovoltaic cells [8477-57]
A. Kawanami, K. Fujita, Kyushu Univ. (Japan)

Enhanced sensitivity to near-infrared with high fill factor in small molecular organic solar cells [8477-58]

Thermal and substrate surface energy effects on nanostructure and surface morphology in the ultra-thin copper phthalocyanine film [8477-60]
H. H. Lee, Pohang Accelerator Lab. (Korea, Republic of); H. J. Kim, J. W. Kim, J. Jang, J.-J. Kim, Seoul National Univ. (Korea, Republic of)

Ultrafast multi-phasic electron injection in efficient non-aggregated hyperbranched zinc phthalocyanine sensitized solar cells [8477-66]
Y. Li, South Dakota State Univ. (United States) and Univ. of Missouri, Kansas City (United States); P. Lu, X. Yan, South Dakota State Univ. (United States); L. Jin, Z. Peng, Univ. of Missouri, Kansas City (United States)

Author Index
Conference Committee

Symposium Chair

Zakya H. Kafafi, National Science Foundation (United States)

Conference Chair

Zakya H. Kafafi, National Science Foundation (United States)

Conference Cochairs

Christoph J. Brabec, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany)
Paul A. Lane, U.S. Naval Research Laboratory (United States)

Conference Program Committee

Paul L. Burn, The University of Queensland (Australia)
Katsuhiko Fujita, Kyushu University (Japan)
René A. J. Janssen, Technische Universiteit Eindhoven (Netherlands)
Bernard Kippelen, Georgia Institute of Technology (United States)
Barry P. Rand, IMEC (Belgium)
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)
Sean E. Shaheen, University of Denver (United States)
Jiangeng Xue, University of Florida (United States)
Yang Yang, University of California, Los Angeles (United States)
Teketel Yohannes, Addis Ababa University (Ethiopia)

Session Chairs

Organic Photonics + Electronics Plenary Session
Zakya H. Kafafi, National Science Foundation (United States)

1 Progress towards Stable Organic Solar Cells: Joint Session with Conferences 8472 and 8477
Ifor D. W. Samuel, University of St. Andrews (United Kingdom)

2 Progress in Solution Processible Polymers
Klaus Meerholz, Universität zu Köln (Germany)

3 Device Physics and Film Morphology
Paul L. Heremans, IMEC (Belgium)
4 High-Efficiency and Large-Area Organic Solar Cells  
Nikos Kopidakis, National Renewable Energy Laboratory (United States)

5 Charge Transfer Dynamics in Organic Semiconductors: Joint Session with Conferences 8459 and 8477  
Garry Rumbles, National Renewable Energy Laboratory (United States)

6 Charge Separation and Recombination  
Laura M. Herz, University of Oxford (United Kingdom)

7 Interfaces in Organic Solar Cells  
Bernard Kippelen, Georgia Institute of Technology (United States)

8 Improved Solar Light Harvesting  
Seth R. Marder, Georgia Institute of Technology (United States)

9 Hybrid Devices and Plasmonic Nanostructures  
Paul A. Lane, U.S. Naval Research Laboratory (United States)

Poster Session  
Christoph J. Brabec, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany)
Introduction

We are pleased to present the advance proceedings of the thirteenth SPIE conference on Organic Photovoltaics. This proceedings volume consists of short papers/summaries of work to be presented in San Diego, California at the conference on Organic Photovoltaics XIII, which is part of the symposium on Organic Photonics + Electronics at the 2012 SPIE Optics + Photonics International Meeting.

We would like to thank the authors for their contributions to this proceedings volume, the manuscripts’ referees for taking the time to insure the high quality of these contributions, and the organizing committee and SPIE staff for contributing to the success of the conference and its proceedings.

Zakya H. Kafafi
Christoph J. Brabec
Paul A. Lane
