Front Matter: Volume 8520

Event: SPIE Optical Engineering + Applications, 2012, San Diego, California, United States
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
## Contents

**SESSION 1  WAVEFRONT SENSING AND CONTROL**

<table>
<thead>
<tr>
<th>8520 02</th>
<th>Multiple laser guide stars (LGS) for multiple conjugate adaptive optics (MCAO) [8520-1]</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

**SESSION 2  ADAPTIVE CODED APERTURE IMAGING**

| 8520 07 | An efficient and novel computation method for simulating diffraction patterns from large-scale coded apertures on large-scale focal plane arrays [8520-6] |
|         | A. Shrekenhamer, Consultant (United States); S. R. Gottesman, Northrop Grumman Electronic Systems (United States) |
| 8520 08 | A systematic investigation of large-scale diffractive coded aperture designs [8520-7] |
|         | S. R. Gottesman, Northrop Grumman Electronic Systems (United States); A. Shrekenhamer, Consultant (United States); A. Isser, G. Gigioli Jr., Northrop Grumman Electronic Systems (United States) |

**SESSION 3  NOVEL SYSTEMS I**

| 8520 0C | Turbulence compensation for laser communication, imaging on horizontal path and non-natural turbulence using direct and iterative procedures [8520-11] |
|         | G. Marchi, C. Scheifling, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany) |
SESSION 4 EXPLOITATION

8520 0E Maximum a-posteriori LADAR Image estimation in the presence of scintillation and speckle noise [8520-13]
D. C. Dayton, R. Nolasco, Applied Technology Associates (United States); J.-P. Sena, M. Myers, G. Fertig, J. Oliver, Air Force Research Lab. (United States)

8520 0F Multiframe fusion of undersampled 3D imagery [8520-14]
S. C. Cain, Air Force Institute of Technology (United States)

8520 0G Comparison of fast correlation algorithms for target tracking [8520-15]
D. Dayton, J. Allen, R. Nolasco, Applied Technology Associates (United States); G. Fertig, M. Myers, Air Force Research Lab. (United States)

8520 0H Understanding the physics of optical deep turbulence at the Earth's boundary layer [8520-16]
T. C. Farrell, D. Sanchez, J. Smith, J. Holzman, P. Kelly, Air Force Research Lab. (United States); T. Brennan, Optical Sciences Co. (United States); A. Gallegos, D. Oesch, Science Applications International Corp. (United States); D. Kyrazis, R-Cubed, Inc. (United States)

SESSION 5 NOVEL SYSTEMS II

8520 0I Wavefront sensing with the differential optical transfer function (Invited Paper) [8520-17]
M. Hart, J. L. Codona, Steward Observatory, The Univ. of Arizona (United States)

8520 0J Intensity interferometry experiments and simulations [8520-18]
C. Pellizzari, Air Force Research Lab. (United States); R. Holmes, Boeing Inc. (United States); K. Knox, Air Force Research Lab. (United States)

8520 0K Infrared transform spectral imager [8520-19]
P. Vujkovic-Cvijin, J. Lee, B. Gregor, N. Goldstein, R. Panfili, M. Fox, Spectral Sciences, Inc. (United States)

8520 0L Image restoration technique for motion-compensated frame averaged data collected by 3D flash ladar imaging system [8520-20]
B. J. Neff, S. C. Cain, Air Force Institute of Technology (United States)

8520 0M HCIT broadband contrast performance sensitivity studies [8520-30]
E. Sidick, S. Shaklan, K. Balasubramanian, Jet Propulsion Lab. (United States)

8520 0N Spatiotemporal focusing-based widefield multiphoton microscopy for fast optical sectioning of thick tissues [8520-21]
L.-C. Cheng, C.-Y. Chang, National Cheng Kung Univ. (Taiwan); W.-C. Yen, Chung-Shan Institute of Science and Technology (Taiwan); S.-J. Chen, National Cheng Kung Univ. (Taiwan)
Widefield multiphoton microscopy with image-based adaptive optics [8520-22]
C.-Y. Chang, L.-C. Cheng, H.-W. Su, National Cheng Kung Univ. (Taiwan); W.-C. Yen, Chung-Shan Institute of Science and Technology (Taiwan); S.-J. Chen, National Cheng Kung Univ. (Taiwan)

Retractable imaging system on a Cessna T-206H [8520-23]
R. Nolasco, Applied Technology Associates (United States); J.-P. Sena, G. Fertig, M. Myers, J. Oliver, Air Force Research Lab. (United States); D. Dayton, Applied Technology Associates (United States)

Hyper-spectral measurements using a compact SWIR camera [8520-25]
D. Dayton, R. Nolasco, Applied Technology Associates (United States); M. Myers, J.-P. Sena, J. Oliver, Air Force Research Lab. (United States); D. Even, B. Hill, NovaSol (United States)

Phase error correction by phase differential algorithm for synthetic aperture imaging ladar [8520-26]
Y. Zhi, J. Sun, P. Hou, E. Dai, Y. Zhou, L. Liu, Shanghai Institute of Optics and Fine Mechanics (China)

Laser speckle effect overcome using multi-receiver method in the synthetic aperture laser imaging ladar [8520-27]
J. Sun, Y. Zhou, Y. Zhi, E. Dai, L. Liu, Shanghai Institute of Optics and Fine Mechanics (China)

The simulation of space-time speckle and impact based on synthetic aperture imaging ladar [8520-28]
Q. Xu, L. Liu, Y. Zhou, J. Sun, Y. Wu, Shanghai Institute of Optics and Fine Mechanics (China)

A large-angle high speed scanner based on electro-optic crystal for Fresnel telescope synthetic aperture imaging ladar [8520-29]
J. Xu, Y. Zhi, Shanghai Institute of Optics and Fine Mechanics (China); X. Wang, Shandong Academy of Sciences (China); J. Sun, Y. Zhou, E. Dai, L. Liu, New Material Institute, Shanghai Institute of Optics and Fine Mechanics (China)

Author Index
Conference Committee

Program Track Chairs

Stephen M. Hammel, Space and Naval Warfare Systems Command (United States)
Alexander M. J. van Eijk, TNO Defence, Security and Safety (United States)

Conference Chairs

Jean J. Dolne, The Boeing Company (United States)
Thomas J. Karr, Consultant (United States)
Victor L. Gamiz, Air Force Research Laboratory (United States)

Conference CoChair

David C. Dayton, Applied Technology Associates (United States)

Conference Program Committee

Stephen C. Cain, Air Force Institute of Technology (United States)
James Fienup, University of Rochester (United States)
Wes D. Freiwald, Pacific Defense Solutions, LLC (United States)
Richard B. Holmes, Boeing LTS Inc. (United States)
Liren Liu, Shanghai Institute of Optics and Fine Mechanics (China)
Zhaowei Liu, University of California, San Diego (United States)
Sergio R. Restaino, U.S. Naval Research Laboratory (United States)
Michael C. Roggemann, Michigan Technological University (United States)
Robert K. Tyson, The University of North Carolina at Charlotte (United States)
David G. Voelz, New Mexico State University (United States)

Session Chairs

1. Wavefront Sensing and Control
   David C. Dayton, Applied Technology Associates (United States)

2. Adaptive Coded Aperture Imaging
   Stephen R. Gottesman, Northrop Grumman Electronic Systems (United States)
3 Novel Systems I
Richard B. Holmes, Boeing LTS Inc. (United States)

4 Exploitation
James R. Fienup, University of Rochester (United States)

5 Novel Systems II
Stephen C. Cain, Air Force Institute of Technology (United States)
