

PROCEEDINGS OF SPIE

High-Performance Computing in Remote Sensing II

**Bormin Huang
Antonio J. Plaza**
Editors

**26–27 September 2012
Edinburgh, United Kingdom**

Sponsored by
SPIE

Cosponsored by
SELEX GALILEO
THALES

Delivered with the support of
Scottish Development International
Scottish Enterprise

Cooperating Organisations
European Association of Remote Sensing • Companies (Belgium) • Remote Sensing and
Photogrammetry Society (United Kingdom) • Scottish Optoelectronics Association (United
Kingdom) • Electronics Sensors and Photonics Knowledge Transfer Network (United Kingdom)

Published by
SPIE

Volume 8539

Proceedings of SPIE 0277-786X, V. 8539

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High-Performance Computing in Remote Sensing II, edited by Bormin Huang, Antonio J. Plaza,
Proc. of SPIE Vol. 8539, 853901 • © 2012 SPIE • CCC code: 0277-786/12/\$18
doi: 10.1117/12.2014336

Proc. of SPIE Vol. 8539 853901-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first

online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

- vii Conference Committee
- ix *Maximizing the use of EO products; how to leverage the potential of open geospatial service architectures (Plenary Paper) [8538-100]*
T. Usländer, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

SESSION 1 HIGH PERFORMANCE COMPUTING I

- 8539 02 **High-performance computing in image registration [8539-1]**
M. Zanin, F. Remondino, Fondazione Bruno Kessler (Italy); M. Dalla Mura, GIPSA-Lab (France)
- 8539 03 **GPU-parallel performance of the community radiative transfer model (CRTM) with the optical depth in absorber space (ODAS)-based transmittance algorithm [8539-2]**
J. Mielikainen, B. Huang, H.-L. A. Huang, Univ. of Wisconsin-Madison (United States); T. Lee, NASA Headquarters (United States)
- 8539 04 **Real-time progressive band processing of linear spectral unmixing [8539-3]**
C.-C. Wu, National Taipei Univ. of Technology (Taiwan); K. Liu, Sinica Academia (Taiwan); C.-I. Chang, Univ. of Maryland, Baltimore County (United States)
- 8539 05 **Fast Fourier Transform Co-processor (FFTC), towards embedded GFLOPs [8539-4]**
C. Kuehl, U. Liebstueckel, I. Tejerina, M. Uemminghaus, F. Witte, EADS Astrium (Germany); M. Kolb, Univ. of Applied Sciences (Germany); M. Suess, R. Weigand, European Space Research and Technology Ctr. (Netherlands); N. Kopp, Hybrid DSP Systems (Netherlands)

SESSION 2 HIGH PERFORMANCE COMPUTING II

- 8539 07 **Progressive hyperspectral imaging [8539-6]**
C.-I. Chang, Univ. of Maryland, Baltimore County (United States)
- 8539 08 **GPU-based parallel implementation of 5-layer thermal diffusion scheme [8539-7]**
M. Huang, J. Mielikainen, B. Huang, H.-L. A. Huang, Univ. of Wisconsin-Madison (United States); M. D. Goldberg, National Oceanic and Atmospheric Administration (United States)
- 8539 0A **An efficient watermarking technique for satellite images using discrete cosine transform [8539-9]**
S. AL-Mansoori, Emirates Institution for Advanced Science and Technology (United Arab Emirates)

- 8539 0B **GPU acceleration of simplex volume algorithm for hyperspectral endmember extraction** [8539-10]
H. Qu, Harbin Institute of Technology (China) and Liaoning Technical Univ. (China);
J. Zhang, Z. Lin, H. Chen, Harbin Institute of Technology (China); B. Huang, Univ. of Wisconsin-Madison (United States)
- 8539 0C **Real-time causal processing of anomaly detection** [8539-11]
Y. Wang, Harbin Engineering Univ. (China) and Univ. of Maryland, Baltimore County (United States); S. Y. Chen, Univ. of Maryland, Baltimore County (United States); C.-C. Wu, National Taipei Univ. of Technology (Taiwan); C. Liu, Univ. of Maryland, Baltimore County (United States) and South China Agricultural Univ. (China); C.-I. Chang, Univ. of Maryland, Baltimore County (United States)
- 8539 0D **Further optimizations of the GPU-based pixel purity index algorithm for hyperspectral unmixing** [8539-12]
X. Wu, Xidian Univ. (China); B. Huang, Univ. of Wisconsin-Madison (United States); A. Plaza, Univ. de Extremadura (Spain); Y. Li, C. Wu, Xidian Univ. (China)

SESSION 3 HIGH PERFORMANCE COMPUTING III

- 8539 0E **Visualization tools for extremely high resolution DEM from the LRO and other orbiter satellites** [8539-13]
J. Montgomery, Georgetown Univ. (United States); J. McDonald, DePaul Univ. (United States)
- 8539 0F **Modified full abundance-constrained spectral unmixing** [8539-14]
E. Wong, C.-I. Chang, Univ. of Maryland, Baltimore County (United States)
- 8539 0G **Further GPU implementation of prediction-based lower triangular transform using a zero-order entropy coder for ultraspectral sounder data compression** [8539-15]
S.-C. Wei, Tamkang Univ. (Taiwan); B. Huang, Univ. of Wisconsin-Madison (United States)
- 8539 0H **Evolutionary techniques for sensor networks energy optimization in marine environmental monitoring** [8539-16]
F. Grimaccia, Politecnico di Milano (Italy); R. Johnstone, The Univ. of Queensland (Australia); M. Mussetta, Politecnico di Milano (Italy); A. Pirisi, Underground Power Srl. (Italy); R. E. Zich, Politecnico di Milano (Italy)
- 8539 0I **Calculating the electromagnetic scattering of ocean surface by physical optics and CUDA** [8539-17]
X. Su, Z. Wu, J. Wu, Xidian Univ. (China)

SESSION 4 HIGH PERFORMANCE COMPUTING IV

- 8539 0J **A unified theory for target-specified virtual dimensionality of hyperspectral imagery** [8539-18]
C.-I. Chang, Univ. of Maryland, Baltimore County (United States)

- 8539 OK **On the acceleration of Eta Ferrier Cloud Microphysics Scheme in the Weather Research and Forecasting (WRF) model using a GPU** [8539-19]
M. Huang, J. Mielikainen, B. Huang, H.-L. A. Huang, Cooperative Institute for Meteorological Satellite Studies (United States); M. D. Goldberg, National Oceanic and Atmospheric Administration (United States)
- 8539 OM **Hyperspectral image feature extraction accelerated by GPU** [8539-21]
H. Qu, Harbin Institute of Technology (China) and Liaoning Technical Univ. (China); Y. Zhang, Z. Lin, H. Chen, Harbin Institute of Technology (China)
- 8539 ON **High performance cluster system design for remote sensing data processing** [8539-22]
Y. Shi, W. Shen, W. Xiong, Z. Fu, R. Xiao, Ministry of Environmental Protection (China)

Author Index

Conference Committee

Symposium Chairs

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Charles R. Bostater Jr., Florida Institute of Technology (United States)

Conference Chairs

Bormin Huang, University of Wisconsin-Madison (United States)
Antonio J. Plaza, Universidad de Extremadura (Spain)

Conference Program Committee

Saeed H. AL-Mansoori, Emirates Institution for Advanced Science and Technology (United Arab Emirates)
Adnan Al Rais, Emirates Institution for Advanced Science and Technology (United Arab Emirates)
Philip E. Ardanuy, Raytheon Intelligence & Information Systems (United States)
Chein-I Chang, University of Maryland, Baltimore County (United States)
Yang-Lang Chang, National Taipei University of Technology (Taiwan)
David J. Crain, GeoMetWatch Corporation (United States)
Qian Du, Mississippi State University (United States)
Yong Fang, Northwest A&F University (China)
Samuel D. Gasster, The Aerospace Corporation (United States)
Mitchell D. Goldberg, National Oceanic and Atmospheric Administration (United States)
Lingjia Gu, Jilin University (China)
Allen H.-L. Huang, University of Wisconsin-Madison (United States)
Tung-Ju Hsieh, National Taipei University of Technology (Taiwan)
Dieter Just, European Organisation for the Exploitation of Meteorological Satellites (Germany)
Roger L. King, Mississippi State University (United States)
Chulhee Lee, Yonsei University (Korea, Republic of)
Tsengdar J. Lee, NASA Headquarters (United States)
Yunsong Li, Xidian University (China)
Sebastian Lopez Suarez, Universidad de Las Palmas de Gran Canaria (Spain)
Enrico Magli, Politecnico di Torino (Italy)
Prashanth Reddy Marpu, Masdar Institute of Science and Technology (United Arab Emirates)

Jarno Mielikainen, University of Eastern Finland (Finland)
Abel Paz, Universidad de Extremadura (Spain)
John J. Pereira, National Environmental Satellite, Data, and Information Service (United States)
Jordi Portell de Mora, Universitat de Barcelona (Spain)
Jeffery J. Puschell, Raytheon Space & Airborne Systems (United States)
Shen-En Qian, Canadian Space Agency (Canada)
Stefan A. Robila, Montclair State University (United States)
Luc Rochette, LR Tech (Canada)
Joan Serra-Sagrista, University Autònoma de Barcelona (Spain)
Roger W. Saunders, Met Office (United Kingdom)
Yuliya Tarabalka, University of Iceland (Iceland)
Carole Thiebaut, Center National d'Études Spatiales (France)
Miguel Velez-Reyes, Universidad de Puerto Rico Mayagüez (United States)
Raffaele Vitulli, European Space Research and Technology Center (Netherlands)
Shih-Chieh Wei, Tamkang University (Taiwan)
Jiaji Wu, Xidian University (China)
Zhen-sen Wu, Xidian University (China)
Ye Zhang, Harbin Institute of Technology (China)

Session Chairs

- 1 High Performance Computing I
Bormin Huang, University of Wisconsin-Madison (United States)
- 2 High Performance Computing II
Antonio J. Plaza, Universidad de Extremadura (Spain)
- 3 High Performance Computing III
Christopher Kuehl, EADS Astrium
- 4 High Performance Computing IV
Saeed H. AL-Mansoori, Emirates Institution for Advanced Science and Technology (United Arab Emirates)
