Advances in Photonics of Quantum Computing, Memory, and Communication VI

Zameer U. Hasan
Philip R. Hemmer
Hwang Lee
Charles M. Santori
Editors

4–7 February 2013
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 8635
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X
ISBN: 9780819494047

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
# Contents

vii Conference Committee

xi Group IV photonics for the mid infrared (Plenary Paper) [8629-1]  
R. Soref, The Univ. of Massachusetts at Boston (United States)

xxvii Light in a twist: optical angular momentum (Plenary Paper) [8637-2]  
M. J. Padgett, Univ. of Glasgow (United Kingdom)

## NONBLEACHING AND ULTRASMALL FLUORESCENT TAGS I

<table>

Ultrafast optical control of individual electron and hole spin qubits: entanglement between a single quantum dot electron spin and a downconverted 1560-nm single photon (Invited Paper) [8635-10]
K. De Greve, P. L. McMahon, L. Yu, J. S. Pelc, Stanford Univ. (United States); C. M. Natarajan, Stanford Univ. (United States) and Heriot-Watt Univ. (United Kingdom); D. Press, N. Y. Kim, Stanford Univ. (United States); E. Abe, Stanford Univ. (United States) and National Institute of Informatics (Japan); D. Bisping, S. Maier, C. Schneider, M. Kamp, Julius-Maximilians-Univ. Würzburg (Germany); S. Höfling, Stanford Univ. (United States) and Julius-Maximilians-Univ. Würzburg (Germany); R. H. Hadfield, Heriot-Watt Univ. (United Kingdom); A. Forchel, Julius-Maximilians-Univ. Würzburg (Germany); M. M. Fejer, Stanford Univ. (United States) and National Institute of Informatics (Japan); Y. Yamamoto, Stanford Univ. (United States) and National Institute of Informatics (Japan)

SPIN AND SINGLE-DEFECT PHOTONICS

Microring resonator-based diamond optothermal switch: a building block for a quantum computing network [8635-13]
Z. Huang, Hewlett-Packard Labs. (United States); A. Faraon, Hewlett-Packard Labs. (United States) and California Institute of Technology (United States); C. Santori, V. Acosta, R. G. Beausoleil, Hewlett-Packard Labs. (United States)

NV center emission in a substrate free low index environment [8635-14]
F. A. Inam, Macquarie Univ. (Australia); M. D. W. Grogan, Univ. of Bath (United Kingdom) and Boston Univ. (United States); M. Rollings, Univ. of Bath (United Kingdom); T. Gaebel, S. Castelletto, J. M. Say, C. Bradac, T. A. Birks, W. J. Wadsworth, J. R. Rabeau, M. J. Steel, Macquarie Univ. (Australia)

QUANTUM COMPUTING WITH PHOTONS

Opening of hidden capacity-domains of quantum channels [8635-18]
L. Gyongyosi, Budapest Univ. of Technology and Economics (Hungary) Information Systems Research Group (Hungary); S. Imre, Budapest Univ. of Technology and Economics (Hungary)

High numerical aperture diffractive optical elements for neutral atom quantum computing [8635-20]
A. L. Young, S. A. Kemme, J. R. Wendt, T. R. Carter, S. Samora, Sandia National Labs. (United States)

RARE-EARTH-DOPED QUANTUM MEMORIES I

Cavity enhanced rephased amplified spontaneous emission (Invited Paper) [8635-23]
M. J. Sellars, K. Ferguson, S. E. Beavan, The Australian National Univ. (Australia)
Optimal detuning for writing warm-atomic-vapor quantum memory in the presence of collisional fluorescence and four-wave mixing [8635-25]
I. Vurgaftman, M. Bashkansky, U.S. Naval Research Lab. (United States)

Spectral properties of ultra-broadband entangled photons generated from chirped-MgSLT crystal towards monocyte entanglement generation [8635-32]
A. Tanaka, R. Okamoto, Hokkaido Univ. (Japan) and Osaka Univ. (Japan); H. H. Lim, National Institute for Materials Science (Japan); S. Subashchandran, M. Okano, Hokkaido Univ. (Japan) and Osaka Univ. (Japan); L. Zhang, L. Kang, J. Chen, P. Wu, Nanjing Univ. (China); T. Hirohata, Hamamatsu Photonics K.K. (Japan); S. Kurimura, National Institute for Materials Science (Japan); S. Takeuchi, Hokkaido Univ. (Japan) and Osaka Univ. (Japan)

Ultra-low-power all-optical switching with a single quantum dot in a photonic-crystal cavity (Invited Paper) [8635-41]
M. Bajcsy, Stanford Univ. (United States); A. Majumdar, Stanford Univ. (United States) and Univ. of California, Berkeley (United States); D. Englund, Stanford Univ. and Columbia Univ. (United States); J. Vučković, Stanford Univ. (United States)

Coupling of quantum fluctuations in a two-component condensate (Invited Paper) [8635-42]
C. M. Trail, B. C. Sanders, Univ. of Calgary (Canada)

Semiconductor sources of photon pairs (Invited Paper) [8635-43]
G. Weihs, Univ. Innsbruck (Austria) and Univ. of Waterloo (Canada); T. Günthner, B. Presi, Univ. Innsbruck (Austria); R. Horn, Univ. of Waterloo (Canada); P. Abolghasem, B. J. Bijlani, D. Kang, A. S. Helmy, Univ. of Toronto (Canada)

Semiconductor source of entangled photons at room temperature [8635-44]
A. Orieux, A. Eckstein, Lab. Matériaux et Phénomènes Quantiques, CNRS, Univ. Paris 7-Denis Diderot (France); A. Lemaître, Lab. de Photonique et de Nanostructures, CNRS (France); P. Filloux, T. Coudreau, P. Milman, Lab. Matériaux et Phénomènes Quantiques, CNRS, Univ. Paris 7-Denis Diderot (France); A. Keller, Institut des Sciences Moléculaires d'Orsay, CNRS, Univ. Paris-Sud 11 (France); I. Favero, G. Leo, S. Ducci, Lab. Matériaux et Phénomènes Quantiques, CNRS, Univ. Paris 7-Denis Diderot (France)
A novel concept to generate single photons: incoherent conversion from the visible into the infrared spectrum [8635-45]
T. Schröder, Humboldt-Univ. zu Berlin (Germany) and Massachusetts Institute of Technology (United States); P. Jiang, Humboldt-Univ. zu Berlin (Germany) and China Univ. of Petroleum (China); F. Gädeke, M. Barth, Humboldt-Univ. zu Berlin (Germany); V. Lesnyak, N. Gaponik, A. Eychmüller, Technische Univ. Dresden (Germany); O. Benson, Humboldt-Univ. zu Berlin (Germany)

Waveguide superconducting single-photon autocorrelators for quantum photonic applications [8635-46]
D. Sahin, Technische Univ. Eindhoven (Netherlands); A. Gaggero, Istituto di Fotonica e Nanotecnologie, CNR (Italy); G. Frucci, S. Jahanmirinejad, J. P. Sprengers, Technische Univ. Eindhoven (Netherlands); F. Mattioli, R. Leoni, Istituto di Fotonica e Nanotecnologie, CNR (Italy); J. Beetz, M. Lermer, M. Kamp, S. Höfling, Julius-Maximilians-Univ. Würzburg (Germany); A. Fiore, Technische Univ. Eindhoven (Netherlands)

Author Index
Conference Committee

Symposium Chair

David L. Andrews, University of East Anglia Norwich (United Kingdom)

Symposium Cochair

Alexei L. Glebov, OptiGrate Corporation (United States)
Klaus P. Streubel, OSRAM GmbH (Germany)

Program Track Chair

Zameer U. Hasan, Temple University (United States)

Conference Chairs

Zameer U. Hasan, Temple University (United States)
Philip R. Hemmer, Texas A&M University (United States)
Hwang Lee, Louisiana State University (United States)
Charles M. Santori, Hewlett-Packard Labs (United States)

Conference Program Committee

Dmitry Budker, University of California, Berkeley (United States)
Alan E. Craig, Montana State University (United States)
Jonathan Dowling, Louisiana State University (United States)
Gurudev Dutt, University of Pittsburgh (United States)
James D. Franson, University of Maryland, Baltimore County (United States)
Kai-Mei C. Fu, University of Washington (United States)
David Hughes, Air Force Research Laboratory (United States)
Fedor Jelezko, Universität Stuttgart (Germany)
Seth Lloyd, Massachusetts Institute of Technology (United States)
Hideo Mabuchi, Stanford University (United States)
Alan L. Migdall, National Institute of Standards and Technology (United States)
Aleksander K. Rebane, Montana State University (United States)
Selim Shahriar, Northwestern University (United States)
Alan Eli Willner, The University of Southern California (United States)
Jörg Wrachtrup, Universität Stuttgart (Germany)
Horace P. Yuen, Northwestern University (United States)
M. Suhail Zubairy, Texas A&M University (United States)
Session Chairs

OPTO Plenary Session
David L. Andrews, University of East Anglia Norwich (United Kingdom)
Alexei Glebov, OptiGrate Corporation (United States)

1 Nonbleaching and Ultrasmall Fluorescent Tags I
Philip R. Hemmer, Texas A&M University (United States)

2 Nonbleaching and Ultrasmall Fluorescent Tags II: Joint Session with Conferences 8596 and 8635
Ramesh Raghavachari, U.S. Food and Drug Administration (United States)
Philip R. Hemmer, Texas A&M University (United States)

3 Spin-based Computing
Charles M. Santori, Hewlett-Packard Labs (United States)

4 Spin and Single-Defect Photonics
Kai-Mei C. Fu, University of Washington (United States)

5 Quantum Computing with Photons
Alexander V. Sergienko, Boston University (United States)

6 Rare-Earth-Doped Quantum Memories I
Zameer U. Hasan, Temple University (United States)
Philip R. Hemmer, Texas A&M University (United States)

7 Quantum Metrology
Olivier Pfister, University of Virginia (United States)

8 Quantum I: Joint Session with Conferences 8635 and 8637
David L. Andrews, University of East Anglia Norwich (United Kingdom)

9 Quantum II: Joint Session with Conferences 8635 and 8637
John C. Howell, University of Rochester (United States)

10 Rare-Earth-Doped Quantum Memories II
Philip R. Hemmer, Texas A&M University (United States)
Zameer U. Hasan, Temple University (United States)

11 Ultra-Low-Power Switching in Quantum and Nonlinear Photonics I
Charles M. Santori, Hewlett-Packard Labs (United States)
12 Ultra-Low-Power Switching in Quantum and Nonlinear Photonics II  
Hideo Mabuchi, Stanford University (United States) 

13 Nonclassical Light Sources and Detectors  
Kai-Mei C. Fu, University of Washington (United States)
