Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 1605-7422/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering
- system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

- vii Conference Committee
- ix Introduction

DIFFUSE OPTICAL IMAGING

- 8574 02 Synchromodal optical in vivo imaging employing microlens array optics: a complete framework [8574-2]
 J. Peter, Deutsches Krebsforschungszentrum (Germany)
- 8574 03 Toward ideal imaging geometry for recovery independence in fluorescence molecular tomography [8574-3]
 R. W. Holt, Dartmouth College (United States); F. Leblond, Ecole Polytechnique de Montréal (Canada); B. W. Pogue, Dartmouth College (United States) and Thayer School of Engineering at Dartmouth (United States)
- A novel high-resolution optical imaging modality: photo-magnetic imaging [8574-4]
 A. T. Luk, D. Thayer, Y. Lin, F. Nouizi, Univ. of California, Irvine (United States); H. Gao, Emory Univ. (United States); G. Gulsen, Univ. of California, Irvine (United States)
- 8574 05 Temperature-modulated fluorescence tomography: modulating tissue temperature using HIFU for high-resolution in vivo fluorescence tomography [8574-5]
 T. C. Kwong, F. Nouizi, Y. Lin, Univ. of California, Irvine (United States); U. Sampathkumaran, S. Ahmed, InnoSense LLC (United States); G. Gulsen, Univ. of California, Irvine (United States)

CLINICAL APPLICATIONS I

- 8574 0C Using multimodal imaging techniques to monitor limb ischemia: a rapid noninvasive method for assessing extremity wounds [8574-12]
 R. Luthra, Naval Medical Research Ctr. (United States); J. D. Caruso, Naval Medical Research Ctr. (United States) and Walter Reed National Military Medical Ctr. (United States); J. S. Radowsky, Naval Medical Research Ctr. (United States), Uniformed Servcies Univ. of the Health Sciences (United States), and Walter Reed National Military Medical Ctr. (United States); M. Rodriguez, Naval Medical Research Ctr. (United States); J. Forsberg, E. A. Elster, Naval Medical Research Ctr. (United States), Uniformed Servcies Univ. of the Health Sciences (United States), and Walter Reed National Military Medical Ctr. (United States); N. J. Crane, Naval Medical Research Ctr. (United States) and Uniformed Services Univ. of the Health Sciences (United States), and Walter Reed National Military Medical Ctr. (United States); N. J. Crane, Naval Medical Research Ctr. (United States) and Uniformed Services Univ. of the Health Sciences (United States), and Walter Reed National Military Medical Ctr. (United States); N. J. Crane, Naval Medical Research Ctr. (United States) and Uniformed Services Univ. of the Health Sciences (United States)
- 8574 OE **Tissue elasticity measurement method using forward and inversion algorithms** [8574-14] J.-H. Lee, Keimyung Univ. (Korea, Republic of); C.-H. Won, Temple Univ. (United States); H.-J. Park, J. Ku, Y. S. Heo, Y.-N. Kim, Keimyung Univ. (Korea, Republic of)

8574 OF Multimodal tissue perfusion imaging using multi-spectral and thermographic imaging systems applied on clinical data [8574-15]
 J. H. G. M. Klaessens, M. Nelisse, Univ. Medical Ctr. Utrecht (Netherlands);
 R. M. Verdaasdonk, Free Univ. Medical Ctr. (Netherlands); H. J. Noordmans, Univ. Medical Ctr. Utrecht (Netherlands)

CLINICAL APPLICATIONS II

- Biagnosing breast cancer using independent diffuse optical tomography and x-ray mammography scans [8574-16]
 M. Fradkin, Philips France (France); M. C. Hofmann, Massachusetts General Hospital (United States); J.-M. Rouet, Philips France (France); R. H. Moore, D. B. Kopans, Massachusetts General Hospital (United States); K. Tipton, S. Suryanarayanan, Philips Healthcare, N.A. (United States); D. A. Boas, Q. Fang, Massachusetts General Hospital (United States)
- 8574 0H A dual oxygenation and fluorescence imaging platform for reconstructive surgery [8574-17]

Y. Ashitate, J. N. Nguyen, V. Venugopal, A. Stockdale, F. Neacsu, F. Kettenring, B. T. Lee, J. V. Frangioni, S. Gioux, Beth Israel Deaconess Medical Ctr. (United States)

8574 OJ A device for multimodal imaging of skin [8574-19]
 J. Spigulis, Univ. of Latvia (Latvia); V. Garancis, Telemedica SIA (Latvia); U. Rubins, E. Zaharans, J. Zaharans, L. Elste, Univ. of Latvia (Latvia)

PRECLINICAL IMAGING

- 8574 0K Validation of diffuse optical tomography using a bi-functional optical-MRI contrast agent and a hybrid MRI-DOT system [8574-20]
 A. T. Luk, Y. Lin, Univ. of California, Irvine (United States); B. Grimmond, A. Sood, GE Global Research (United States); E. E. Uzgiris, Rensselaer Polytechnic Institute (United States); A. Hagan, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, Univ. of California, Irvine (United States); O. Nalcioglu, G. Gulsen, O. Subel (States); O. Subel (Stat
- 8574 OL **Multimodality pH imaging in a mouse dorsal skin fold window chamber model** [8574-21] H. M. Leung, College of Optical Sciences, The Univ. of Arizona (United States) and The Univ. of Arizona (United States); R. Schafer, M. M. Pagel, I. F. Robey, The Univ. of Arizona (United States); A. F. Gmitro, College of Optical Sciences, The Univ. of Arizona (United States) and The Univ. of Arizona (United States)
- 8574 0M Ultra-high sensitivity detection of bimodal probes at ultra-low noise for combined fluorescence and positron emission tomography imaging [8574-22]
 R. Lebel, N. Zarifyussefian, M. Letendre-Jauniaux, Univ. de Sherbrooke (Canada); O. Daigle, Nüvü Camēras Inc. (Canada); E. Ranyuk, J. Van Lier, B. Guérin, R. Lecomte, Univ. de Sherbrooke (Canada); M. Massonneau, Quidd (France); M.-E. Ducharme, Nüvü Camēras Inc. (Canada); Y. Bérubé-Lauzière, Univ. de Sherbrooke (Canada)

POSTER SESSION

- 8574 0N **Time reversal optical tomography locates fluorescent targets in a turbid medium** [8574-1] B. Wu, W. Cai, S. K. Gayen, The City College and Graduate Ctr., City Univ. of New York (United States)
- 8574 00 Towards diffuse optical tomography of arbitrarily heterogeneous turbid medium using GPUaccelerated Monte-Carlo forward calculation [8574-23]
 X. Yi, W. Chen, L. Wu, W. Zhang, J. Li, X. Wang, L. Zhang, H. Zhao, F. Gao, Tianjin Univ. (China)
- 8574 OP Time-domain schemes of optical topography: methodology, simulative and experimental validation [8574-24]
 L. Duan, X. Wang, J. Li, X. Yi, L. Wu, L. Zhang, F. Gao, Tianjin Univ. (China)
- 8574 0Q
 Color intensity projections with hue cycling for intuitive and compressed presentation of motion in medical imaging modalities [8574-25]
 K. S. Cover, F. J. Lagerwaard, R. M. Verdaasdonk, Free Univ. Medical Ctr. (Netherlands)
- 8574 0T Simulation of action-potential-sensitive second harmonic generation response of unmyelinated afferents to temperature effects [8574-28]
 X. Chen, Z. Luo, H. Yang, A. Zhang, S. Xie, Fujian Normal Univ. (China)

Conference Committee

Symposium Chairs

James Fujimoto, Massachusetts Institute of Technology (United States) R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts General Hospital (United States) and Harvard School of Medicine (United States)

Program Track Chairs

Tuan Vo-Dinh, Duke University (United States) Anita Mahadevan-Jansen, Vanderbilt University (United States)

Conference Chairs

Fred S. Azar, Philips Medical Systems (United States) Xavier Intes, Rensselaer Polytechnic Institute (United States)

Conference Program Committee

David A. Boas, Massachusetts General Hospital (United States)
Yu Chen, University of Maryland, College Park (United States)
Sergio Fantini, Tufts University (United States)
Gultekin Gulsen, University of California, Irvine (United States)
Dimitris N. Metaxas, Rutgers, The State University of New Jersey (United States)
Tim Nielsen, Philips Research (Germany)
Vasilis Ntziachristos, Helmholtz Zentrum München GmbH (Germany)
Brian W. Pogue, Dartmouth Hitchcock Medical Center (United States)
Siavash Yazdanfar, GE Global Research (United States)
Arjun G. Yodh, University of Pennsylvania (United States)

Session Chairs

- Diffuse Optical Imaging
 Gultekin Gulsen, University of California, Irvine (United States)
 Fred S. Azar, Philips Medical Systems (United States)
- 2 Microscopic Imaging Caroline Boudoux, Ecole Polytechnique de Montréal (Canada) Xavier Intes, Rensselaer Polytechnic Institute (United States)
- Clinical Applications I
 Sylvain Gioux, Beth Israel Deaconess Medical Center (United States)
 Fred S. Azar, Philips Medical Systems (United States)

- 4 Clinical Applications II Sylvain Gioux, Beth Israel Deaconess Medical Center (United States) Fred S. Azar, Philips Medical Systems (United States)
- 5 Preclinical Imaging
 Yves Bérubé-Lauzière, Université de Sherbrooke (Canada)
 Xavier Intes, Rensselaer Polytechnic Institute (United States)

Introduction

Data generated by novel imaging technologies such as optical tomography are complex to analyze due to the inherent scattering of light through anatomical systems. Cross validation and direct comparison with established methods in other imaging modalities are especially challenging. There is critical need for new computational techniques to provide rapid, accurate and cost-effective means for quantification and characterization of such data, either independently or integrated with other modalities. These computational methods will enable faster acceptance of novel imaging modalities into viable clinical and/or pre-clinical systems. The applications are diverse and range from imaging at the cellular level to the whole body while incorporating molecular, functional and anatomical information.

The conference objectives are to provide a forum:

- to review and share recent developments in novel multimodal imaging techniques,
- to report development of novel computational methods, and
- to bring together the optical imaging and image analysis communities.

Topics include, but are not limited to:

- multimodal imaging integrating structural, molecular and functional information
- 2D, 3D, 4D, tomographic and / or multi-spectral imaging
- imaging analysis and/or image processing techniques applied to optical imaging (e.g. visualization, segmentation, registration)
- detection and diagnostic analysis techniques which may provide better quantitative and/or diagnostic insight into clinical and pre-clinical imaging (e.g. methods for quantitative measurements, computer-assisted diagnosis)
- imaging analysis and/or image processing techniques used to combine optical imaging with other imaging modalities (e.g. MR, x-ray, PET)
- image analysis, computational methods and reconstruction approaches which may help bring optical imaging into the clinic (visual rendering of complex data set, novel algorithms for assisted optical reconstruction)
- clinical evaluation of these new technologies (Physiological and functional interpretation of image data, visual perception and observer performances, validation of quantitative assessment of optical signatures in-vivo).
