**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

A. Bullard, I. Shawki, Raytheon Space and Airborne Systems (United States)
SESSION 14 MISSIONS AND SENSING IV

8889 1T  Design and realization of linear APS-based sun sensor [8889-59]
H. Liang, J. Zhang, Z. Lv, C. Yu, J. Jia, Beijing Institute of Control Engineering (China)

8889 1U  A carbon dioxide radiance model of the earth planet using the conical earth sensor data [8889-61]
L. Deng, Z. Mei, Z. Tu, J. Yuan, T. He, Y. Wei, Beijing Institute of Control Engineering (China)

POSTER SESSION

8889 1Y  TDRS satellite application to LEO satellite data link [8889-70]
H. Jiang, Shanghai Engineering Ctr. for Micro-satellites (China) and Shanghai Institute of Microsystem and Information Technology (China); X. Shen, Shanghai Engineering Ctr. for Micro-satellites (China) and Shanghai Institute of Technical Physics (China); W. Gong, Shanghai Engineering Ctr. for Micro-satellites (China); J. Yu, Shanghai Engineering Ctr. for Micro-satellites (China) and Shanghai Institute of Microsystem and Information Technology (China)

8889 1Z  ALSAT-2A solar array in orbit performances after 32 months [8889-71]
N. Larbi, M. Attaba, F. Bouchiba, Ctr. de Développement des Satellites (Algeria); E. Beaufume, EADS Astrium S.A.S. (France)

8889 20  Flight experience of 329K star tracker [8889-72]
I. S. Kruzhilov, Moscow Power Engineering Institute (Russian Federation); V. V. Kuniaev, V. I. Fedoseev, Geoфизика-Cosmos (Russian Federation); G. P. Titov, O. V. Shevlyakov, S. V. Latyncev, JSC “Academician M.F. Reshetnev” Information Satellite Systems (Russian Federation)

8889 21  Design and realization of the miniature long-life integrative coded sun sensor [8889-73]
Y. Mo, J. Cui, Y. Zhao, R. Chen, X. Liu, Beijing Institute of Control Engineering (China)

8889 22  Primary mirror alignment and assembly for a multispectral space telescope [8889-74]
