Volume 9123

Proceedings of SPIE 0277-786X, V. 9123

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Information and Computation XII, edited by Eric Donkor, Andrew R. Pirich, Howard E. Brandt, Michael R. Frey, Samuel J. Lomonaco, Jr., John M. Myers, Proc. of SPIE Vol. 9123, 912301

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 QKD, CRYPTOGRAPHY I

9123 02 **Superdense teleportation for space applications** [9123-1]
T. M. Graham, Univ. of Illinois at Urbana-Champaign (United States); H. J. Bernstein, Hampshire College (United States); H. Javadi, Jet Propulsion Lab. (United States); B. J. Geldzahler, NASA Headquarters (United States); P. G. Kwiat, Univ. of Illinois at Urbana-Champaign (United States)

9123 03 **Quantum state regeneration in entanglement based quantum key distribution protocols** [9123-2]
R. Erdmann, Advanced Automation Corp. (United States)

9123 04 **LDPC error correction for Gbit/s QKD** [9123-3]
A. Mink, A. Nakassis, National Institute of Standards and Technology (United States)

9123 05 **Polar codes in a QKD environment** [9123-4]
A. Nakassis, A. Mink, National Institute of Standards and Technology (United States)

9123 06 **Spectral-temporal-polarization encoding of photons for multi-user secure quantum communication** [9123-5]
E. Donkor, Univ. of Connecticut (United States)

SESSION 2 QKD, CRYPTOGRAPHY II

9123 07 **Adaptive multicarrier quadrature division modulation for long-distance continuous-variable quantum key distribution** [9123-6]
L. Gyongyosi, Budapest Univ. of Technology and Economics (Hungary) and Hungarian Academy of Sciences (Hungary); S. Imre, Budapest Univ. of Technology and Economics (Hungary)

9123 08 **The braided single-stage protocol for quantum secure communication** [9123-7]
B. Darunkar, P. Verma, The Univ. of Oklahoma - Tulsa (United States)

9123 09 **Dual compressible hybrid quantum secret sharing schemes based on extended unitary operations** [9123-8]
H. Lai, Macquarie Univ. (Australia) and Beijing Univ. of Posts and Telecommunications (China); M. A. Orgun, Macquarie Univ. (Australia); L. Xue, Australian Taxation Office (Australia); J. Xiao, Beijing Univ. of Posts and Telecommunications (China); J. Pieprzyk, Macquarie Univ. (Australia)

SESSION 3 QUANTUM GATES, CIRCUITS, AND MEMORIES

9123 0A **Example of lumped parameter modeling of a quantum optics circuit** [9123-10]
P. J. Werbos, National Science Foundation (United States)

9123 0B **Implications of the Landauer limit for quantum logic** [9123-11]
F. M. Mihelic, The Univ. of Tennessee Graduate School of Medicine (United States)

9123 0D **Progress towards a quantum memory with telecom-frequency conversion** [9123-13]
D. Stack, P. J. Lee, Q. Quraishi, U.S. Army Research Lab. (United States)

9123 0E **Faraday effect due to Pauli exclusion principle in 3D topological insulator nanostructures** [9123-14]
H. P. Paudel, M. N. Leuenberger, Univ. of Central Florida (United States)

SESSION 4 QUANTUM IMAGING, SENSING, AND NETWORKS

9123 0G **Characterization of photons generated in spontaneous parametric down-conversion** [9123-16]
M. Bashkansky, I. Vurgaftman, U.S. Naval Research Lab. (United States); J. Reintjes, Sotera Defense Solutions (United States)

9123 0I **Deterministic generation of many-photon GHZ states using quantum dots in a cavity** [9123-18]
M. N. Leuenberger, M. Erementchouk, Univ. of Central Florida (United States)

9123 0J **Quantum walk search factors in the regime of weak measurement** [9123-19]
D. Ghoshal, George Mason Univ. (United States)

9123 0L **Hyper-entanglement based sensor with reduced measurement time and enhanced signal to interference ratio** [9123-21]
J. F. Smith III, U.S. Naval Research Lab. (United States)

SESSION 5 QUANTUM COMPUTING AND INFORMATION SCIENCE I

9123 0M **Absence of local energy in elementary spin systems at low temperature** [9123-22]
M. R. Frey, Bucknell Univ. (United States)

9123 0P **Quantum diagrams and quantum networks** [9123-25]
L. H. Kauffman, Univ. of Illinois at Chicago (United States); S. J. Lomonaco, Jr., Univ. of Maryland, Baltimore County (United States)

9123 0Q **Effects of mathematical locality and number scaling on coordinate chart use** [9123-26]
P. Benioff, Argonne National Lab. (United States)

9123 0R **Topological quantum computation of the Dold-Thom functor** [9123-27]
J. Ospina, Univ. EAFIT (Colombia)

9123 0S **Quantum walks in waveguide-based optical quantum device** [9123-28]
N. Wu, H. Hu, State Key Lab. for Novel Software Technology (China) and Nanjing Univ. (China); P. Xu, Nanjing Univ. (China); F. Song, State Key Lab. for Novel Software Technology (China) and Nanjing Univ. (China); X. Li, New York City College of Technology (United States)

9123 0T **Logical synchronization: how evidence and hypotheses steer atomic clocks** [9123-29]
J. M. Myers, Harvard Univ. (United States); F. H. Madjid, Consultant (United States)

Author Index

Conference Committee

Symposium Chair

David A. Whelan, Boeing Defense, Space, and Security (United States)

Symposium Co-chair

Wolfgang Schade, Technische Universität Clausthal (Germany) and Fraunhofer Heinrich-Hertz-Institut (Germany)

Conference Chairs

Eric Donkor, University of Connecticut (United States)
Andrew R. Pirich, ACP Consulting (United States)
Howard E. Brandt, U.S. Army Research Laboratory (United States)

Conference Co-chairs

Michael R. Frey, Bucknell University (United States)
Samuel J. Lomonaco Jr., University of Maryland, Baltimore County (United States)
John M. Myers, Harvard University (United States)

Conference Program Committee

Paul M. Alsing, Air Force Research Laboratory (United States)
Chip Brig Elliott, Raytheon BBN Technologies (United States)
Reinhard K. Erdmann, Air Force Research Laboratory (United States)
Michael L. Fanto, Air Force Research Laboratory (United States)
Michael J. Hayduk, Air Force Research Laboratory (United States)
Louis H. Kauffman, University of Illinois at Chicago (United States)
Vladimir E. Korepin, Stony Brook University (United States)
Alexander V. Sergienko, Boston University (United States)
Tai Tsun Wu, Harvard University (United States)

Session Chairs

1 QKD, Cryptography I
Paul M. Alsing, Air Force Research Laboratory (United States)
Louis H. Kauffman, University of Illinois at Chicago (United States)

2 QKD, Cryptography II
Michael R. Frey, Bucknell University (United States)
Paul M. Alsing, Air Force Research Laboratory (United States)

3 Quantum Gates, Circuits, and Memories
John M. Myers, Harvard University (United States)
Michael L. Fantu, Air Force Research Laboratory (United States)

4 Quantum Imaging, Sensing, and Networks
Samuel J. Lomonaco Jr., University of Maryland, Baltimore County (United States)
Reinhard Erdmann, Advanced Automation Corp. (United States)

5 Quantum Computing and Information Science I
Michael L. Fanto, Air Force Research Laboratory (United States)
Eric Donkor, University of Connecticut (United States)
