Front Matter: Volume 9170

Event: SPIE NanoScience + Engineering, 2014, San Diego, California, United States
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 0277-786X
ISBN: 9781628411973

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.
## Contents

### SESSION 1  NANOPHOTONICS FOR ENERGY

<table>
<thead>
<tr>
<th>Paper ID</th>
<th>Title</th>
<th>References</th>
</tr>
</thead>
<tbody>

SESSION 5  NANOPHOTONIC DEVICES

9170 0O  High finesse silicon ring resonators for monolithic mode-locked lasers [9170-24]

SESSION 6  NANOFABRICATION OF OPTICAL ELEMENTS

9170 0V  Nano fabrication of compound bifocal zone plate for x-ray optics [9170-32]
9170 0X  Omnidirectional wavelength selective emitters/absorbers based on dielectric-filled anti-reflection coated two-dimensional metallic photonic crystals [9170-34]

SESSION 7  INNOVATIVE PATTERNING

9170 0Z  Laser-assisted biosynthesis for noble nanoparticles production [9170-36]
9170 10  Nanoimprint fabrication of wiregrids micro-polarizers in near infrared spectra using SU-8 as an intermediate film [9170-37]

SESSION 8  NANOPARTICLE PROPERTIES

9170 13  Polarized light emission by deposition of aligned semiconductor nanorods [9170-41]
9170 14  Design of single-polarization single-mode photonic nanowire [9170-42]
9170 15  Generation of Cd1-xZnxS nanoparticles by laser ablation in liquids [9170-43]
9170 16  Deep UV microsphere nanolithography to achieve sub-100 nm feature size [9170-44]

POSTER SESSION

9170 18  Fabrication of high aspect ratio silicon gratings by interference lithography and potassium hydroxide anisotropic etch technique [9170-47]
9170 1C  Surface potential and field effect in structures with Ge-nanoclusters grown on Si(100) surface [9170-51]
9170 1D  Comparison of triangular and squared ITO nano-grating of GaN LEDs [9170-52]
9170 1F  Lightfast optical current in dielectric by plasmonically induced local field [9170-54]
9170 1I  Formation of sub-wavelength pitch regular structures employing a motorized multiple exposure Lloyd’s mirror holographic lithography setup [9170-57]
9170 1J  Processing and characterization of monodisperse phosphine-free CdSe colloidal quantum dots [9170-58]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Symposium Co-chairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

Eva M. Campo, Bangor University (United Kingdom)
Elizabeth A. Dobisz, HGST (United States)
Louay A. Eldada, Quanergy, Inc. (United States)

Conference Program Committee

André-Jean Attias, Université Pierre et Marie Curie (France)
Irene Fernandez-Cuesta, Lawrence Berkeley National Laboratory (United States)
Sarah Haigh, The University of Manchester (United Kingdom)
Sondra Hellstrom, California Institute of Technology (United States)
Ghassan E. Jabbour, Arizona State University (United States)
Robert Magnusson, The University of Texas at Arlington (United States)
Balaji U. Panchapakesan, University of Louisville (United States)
Won Park, University of Colorado at Boulder (United States)
Dorota A. Pawlak, Institute of Electronic Materials Technology (Poland)
Jun Tanida, Osaka University (Japan)
Richard Tiberio, Stanford University (United States)
Chee Wei Wong, Columbia University (United States)

Session Chairs

1 Nanophotonics for Energy
Louay A. Eldada, Quanergy Systems, Inc. (United States)

2 Nanomechanical Nanofluidic Devices
Eva M. Campo, Bangor University (United Kingdom)

3 Nanostructure Properties and Devices
Louay A. Eldada, Quanergy Systems, Inc. (United States)
4 Subwavelength Structures  
*Elizabeth A. Dobisz*, HGST (United States)

5 Nanophotonic Devices  
*Elizabeth A. Dobisz*, HGST (United States)

6 Nanofabrication of Optical Elements  
*Louay A. Eldada*, Quanergy Systems, Inc. (United States)

7 Innovative Patterning  
*Won Park*, University of Colorado at Boulder (United States)

8 Nanoparticle Properties  
*Eva M. Campo*, Bangor University (United Kingdom)
