

PROCEEDINGS OF SPIE

High and Low Concentrator Systems for Solar Energy Applications IX

**Adam P. Plesniak
Candace Pfefferkorn**
Editors

**19–20 August 2014
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 9175

Proceedings of SPIE 0277-786X, V. 9175

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High and Low Concentrator Systems for Solar Energy Applications IX, edited by Adam P. Plesniak, Candace Pfefferkorn,
Proc. of SPIE Vol. 9175, 917501 · © 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2084865

Proc. of SPIE Vol. 9175 917501-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *High and Low Concentrator Systems for Solar Energy Applications IX*, edited by Adam P. Plesniak, Candace Pfefferkorn, Proceedings of SPIE Vol. 9175 (SPIE, Bellingham, WA, 2014) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/14/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page,

and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>The renaissance of CdTe-based photovoltaics (Solar Energy Plenary Paper) [9177-302]</i>
xvii	<i>Hot carrier solar cell absorbers: materials, mechanisms and nanostructures (Solar Energy Plenary Paper) [9178-304]</i>
xxix	<i>International PV QA Task Force's proposed comparative rating system for PV modules (Solar Energy Plenary Paper) [9179-305]</i>

SESSION 1 CROSS-CUTTING TOPICS OF INTEREST TO CPV AND CSP I

9175 03	300 sun light engine for high concentrator application studies [9175-2]
9175 05	Freeform solar concentrator with a highly asymmetric acceptance cone [9175-4]

SESSION 2 CSP SYSTEMS AND OPTICS

9175 06	Reduction of radiative heat losses for solar thermal receivers [9175-8]
9175 07	A small-scale concentrating solar thermal system [9175-6]

SESSION 3 CROSS-CUTTING TOPICS OF INTEREST TO CPV AND CSP II

9175 09	Plasmonic nanoparticle based spectral fluid filters for concentrating PV/T collectors [9175-9]
9175 0A	Sun to fibers (S2F): massively scalable collection and transmission of concentrated solar light for efficient energy conversion and storage [9175-10]
9175 0B	Shaping solar concentrator mirrors by radiative heating [9175-11]
9175 0C	Self-tracking phase change concentrator device demonstrator [9175-12]

SESSION 4 SPECTRUM SPLITTING CONCENTRATORS I

9175 0F	Positional irradiance measurement: characterization of spectrum-splitting and concentrating optics for photovoltaics [9175-15]
---------	---

SESSION 5	SPECTRUM SPLITTING CONCENTRATORS II
9175 0G	Design of folded holographic spectrum-splitting photovoltaic system for direct and diffuse illumination conditions [9175-16]
9175 0H	Analysis of dispersive spectrum splitting systems [9175-17]
9175 0I	Two-axes spectral splitting optical concentrator based on single plastic element [9175-18]
SESSION 6	CSP OPTICS AND COATINGS
9175 0J	Low cost anti-soiling coatings for CSP collector mirrors and heliostats [9175-19]
9175 0K	Optical and adhesive properties of dust deposits on solar mirrors and their effects on specular reflectivity and electrodynamic cleaning for mitigating energy-yield loss [9175-20]
9175 0L	Anti-oxidation high-performance solution-processed Ni plasmonic nanochain-SiO_x selective solar thermal absorbers [9175-21]
SESSION 7	CPV SYSTEMS AND OPTICS
9175 0N	First demonstration of a novel 2D-waveguiding solar concentrator [9175-23]
9175 0P	Electroluminescence imaging of Morgan Solar Inc.'s 4th generation CPV technology for in-line quality control and optical efficiency estimation [9175-25]
	POSTER SESSION
9175 0S	Luminescent optical epoxies for solar concentrators [9175-28]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Oleg V. Sulima, GE Global Research (United States)

Conference Chairs

Adam P. Plesniak, Arzon Solar, LLC (United States)

Candace Pfefferkorn, SunShot Initiative, U.S. Department of Energy
(United States)

Conference Program Committee

Harry A. Atwater Jr., California Institute of Technology (United States)

Daniel J. Friedman, National Renewable Energy Laboratory
(United States)

Noel C. Giebink, The Pennsylvania State University (United States)

Raymond K. Kostuk, The University of Arizona (United States)

Andru J. Prescod, SunShot Initiative, U.S. Department of Energy
(United States) and ManTech International Corporation
(United States)

Session Chairs

- 1 Cross-cutting Topics of Interest to CPV and CSP I
Adam P. Plesniak, Arzon Solar, LLC (United States)
- 2 CSP Systems and Optics
Candace Pfefferkorn, U.S. Department of Energy (United States)
- 3 Cross-cutting Topics of Interest to CPV and CSP II
Noel C. Giebink, The Pennsylvania State University (United States)
- 4 Spectrum Splitting Concentrators I
Adam P. Plesniak, Arzon Solar, LLC (United States)
- 5 Spectrum Splitting Concentrators II
Sunita Darbe, California Institute of Technology (United States)
- 6 CSP Optics and Coatings
Andru J. Prescod, SunShot Initiative, U.S. Department of Energy
(United States) and ManTech International Corporation
(United States)
- 7 CPV Systems and Optics
Raymond K. Kostuk, The University of Arizona (United States)
