SPIE

**Volume 9176**

Proceedings of SPIE 0277-786X, V. 9176

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Solar Hydrogen and Nanotechnology IX, edited by Sanjay Mathur, Proc. of SPIE Vol. 9176, 917601  
© 2014 SPIE · CCC code: 0277-786X/14/\$18 · doi: 10.1117/12.2084867

Proc. of SPIE Vol. 9176 917601-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>The renaissance of CdTe-based photovoltaics (Solar Energy Plenary Paper) [9177-302]</i>
xvii	<i>Hot carrier solar cell absorbers: materials, mechanisms and nanostructures (Solar Energy Plenary Paper) [9178-304]</i>
xxix	<i>International PV QA Task Force's proposed comparative rating system for PV modules (Solar Energy Plenary Paper) [9179-305]</i>

---

## SOLAR HYDROGEN & NANOTECHNOLOGY I

9176 06	<b>Development of a low cost, portable solar hydrogen generation device [9176-5]</b>
---------	--

---

## SOLAR HYDROGEN & NANOTECHNOLOGY II

9176 08	<b>Homogeneous and heterogenized iridium water oxidation catalysts (Invited Paper) [9176-7]</b>
---------	---

---

## SOLAR HYDROGEN & NANOTECHNOLOGY IV

9176 0E	<b>The effect of temperature in flux-assisted synthesis of <math>\text{SnNb}_2\text{O}_6</math> [9176-14]</b>
---------	---

---

## SOLAR HYDROGEN & NANOTECHNOLOGY VI

9176 0I	<b>Functionalization of Ag nanoparticles using local hydrophilic pool segment designed on their particle surface (Invited Paper) [9176-18]</b>
9176 0K	<b>Nanoporous GaN for enhanced solar hydrogen production [9176-20]</b>
9176 0N	<b>Facile synthesis of <i>p</i>-type Zn-doped <math>\alpha\text{-Fe}_2\text{O}_3</math> films for solar water splitting [9176-23]</b>

# Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

# Conference Committee

## *Symposium Chair*

**Oleg V. Sulima**, GE Global Research (United States)

## *Conference Chair*

**Sanjay Mathur**, Universität zu Köln (Germany)

## *Conference Program Committee*

**Hironori Arakawa**, Tokyo University of Science (Japan)

**Jan Augustynski**, University of Warsaw (Poland)

**Michael Grätzel**, École Polytechnique Fédérale de Lausanne  
(Switzerland)

**Jinghua Guo**, Lawrence Berkeley National Laboratory (United States)

**Hicham Idriss**, SABIC (Saudi Arabia)

**Yosuke Kanai**, The University of North Carolina at Chapel Hill  
(United States)

**Claude Levy-Clement**, Centre National de la Recherche Scientifique  
(France)

**Frank E. Osterloh**, University of California, Davis (United States)

**David Prendergast**, Lawrence Berkeley National Laboratory  
(United States)

**Yasuhiro Tachibana**, RMIT University (Australia)

**John A. Turner**, National Renewable Energy Laboratory  
(United States)

**Lionel Vayssieres**, Xi'an Jiaotong University (China)

**Heli Wang**, National Renewable Energy Laboratory (United States)

**Gunnar Westin**, Uppsala University (Sweden)

**Upul Wijayantha**, Loughborough University (United Kingdom)

**Jin Zhang**, University of California, Santa Cruz (United States)

## *Session Chairs*

- 1 Solar Hydrogen & Nanotechnology I  
**Sanjay Mathur**, Universität zu Köln (Germany)

- 2 Solar Hydrogen & Nanotechnology II  
**Lionel Vayssieres**, Xi'an Jiaotong University (China)

- 3 Solar Hydrogen & Nanotechnology III  
**Zetian Mi**, McGill University (Canada)

- 4 Solar Hydrogen & Nanotechnology IV  
**Bruce E. Koel**, Princeton University (United States)
- 5 Solar Hydrogen & Nanotechnology V  
**Gunnar Westin**, Uppsala University (Sweden)
- 6 Solar Hydrogen & Nanotechnology VI  
**Chung-Li Dong**, National Synchrotron Radiation Research Center  
(Taiwan)
- 7 Solar Hydrogen & Nanotechnology VII  
**Heli Wang**, National Renewable Energy Laboratory (United States)
