Proc. of SPIE Vol. 9533 953301-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

TECHNOLOGIES OF OPTICAL SYSTEMS OF TELECOMMUNICATIONS

9533 02	Fiber optic line for RoF systems with remote and local pump EDFA [9533-2]
9533 03	Influence of parasitic parameters of laser emitter on frequency response of analog fiber-optic link [9533-11]
9533 04	Analysis optical WDM-Nyquist systems with multiplexing in polarization [9533-17]
9533 05	A compression of light pulse in an optical fiber [9533-24]
9533 06	Research of potentiality of nonlinear effects mitigation by considerable increasing of optical fiber core diameter [9533-32]
9533 07	Modeling and simulation of a few-mode long-haul fiber optic transmission link [9533-34]
9533 08	Simulation of the coherent MDM transmission using principal modes of the optical fiber as signal carriers [9533-40]

PASSIVE AND ACTIVE OPTICAL COMPONENTS OF FIBER-OPTIC COMMUNICATIONS AND INFORMATION MEASURING SYSTEMS

9533 09	The fiber optic device for signal positive chirping by interferential method with tuning of chirp size [9533-3]
9533 0A	Lightning-rod effect near sharp dielectric structures [9533-5]
9533 0B	Technological applications of focusing optical elements [9533-8]
9533 0C	Special types of FBG and CoaxBG structures for telecommunication and monitoring systems [9533-10]
9533 0D	Experimental generation of the longitudinal electric field component on the optical axis with high-numerical-aperture binary axicons [9533-15]
9533 0E	Development of a fiber-fed spectrometer for the near IR-domain [9533-20]
9533 0F	Fast and simple method for calculation of the mode field diameter of arbitrary order guided mode in weakly guiding optical fibers [9533-21]

- 9533 OG **Design of multimode optical fibers with low differential mode delay for operating at 1550 nm** [9533-22]
- 9533 OH **Spherical gauge for in-pipe inspection based on the optical fiber grid** [9533-29]
- 9533 OI **Solution for circular lightguide based on Gaussian approximation with correction of mode field distributions into cladding** [9533-33]
- 9533 OJ **Algorithm for estimation of material dispersion of fused silica glass optical fibers** [9533-35]
- 9533 OK **Fiber-optic system for checking the acoustical parameters of gas-turbine engine flow-through passages** [9533-38]
- 9533 OL **Simulation of spectral filters used in hyperspectrometer by decomposition on vector Bessel modes (Invited Paper)** [9533-41]

PROCESSING UNIVARIATE AND MULTIVARIATE OPTICAL SIGNALS

- 9533 OM **Spectral-spatial classification of hyperspectral images with k-means++ partitional clustering** [9533-6]
- 9533 ON **Use of coupled photonic crystal nanobeam cavities for temporal integration of optical signals** [9533-7]
- 9533 OO **Signal improvement due to interaction of PMD and Kerr-nonlinearities in WDM system** [9533-28]
- 9533 OP **The intellectual lighting for optical information-measuring systems** [9533-37]
- 9533 OQ **Instantaneous frequency measurements of microwave signal with serial amplitude-phase modulation conversion of optical carrier** [9533-39]

MAINTENANCE, INSPECTION AND RESTORATION OF OPTICAL COMMUNICATION NETWORKS

- 9533 OR **Investigation of mechanical stress applied to the optical modular cables at low temperatures** [9533-9]
- 9533 OS **Reliability analysis of underground fiber optic cables of different technologies of installation** [9533-12]
- 9533 OT **Probability estimation of optical fiber attenuation increasing due to deformation of optical cable loose tube** [9533-13]
- 9533 OU **Research of the loose-tube gel-filled optical cable stiffness at low temperatures** [9533-14]
- 9533 OV **Analysis of technical and economic indicators of the cable line depending on the technology installation: duct optical cable or underground optical cable** [9533-16]

- 9533 OW **Direct method of determination of the equivalent refractive index profile of the multimode optical fiber by measured impulse responses due to scanning output fiber end** [9533-18]
- 9533 OX **Method for computing the equivalent graded refractive index profile of silica multimode optical fibers via differential mode delay diagram** [9533-19]
- 9533 OY **Investigation of polarization reflectometry sensitivity to detecting new events in fiber optical lines** [9533-26]
- 9533 OZ **Degradation points detection in optical fiber** [9533-42]

QUANTUM OPTICS AND COMMUNICATIONS

- 9533 10 **Spin frequency comb echo memory controlled by a pulsed-gradient of magnetic field** [9533-44]

TRAINING AND EDUCATION IN THE FIELD OF OPTICAL TELECOMMUNICATIONS TECHNOLOGY

- 9533 11 **Software defined down-hole telemetric systems: training course** [9533-43]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

This volume contains a selection of reports presented at the 14th International Conference on Optical Technologies for Telecommunications. The conference was held 19–21 November 2014 at Kazan National Research Technical University, Kazan, Russian Federation.

The conference covered a large range of problems in optical technologies in telecommunications. We have no doubt that the proceedings from this conference will be helpful for both scientists and specialists working in the fields of telecommunication technologies.
