Front Matter: Volume 9479

Raja Suresh
Editor

21–23 April 2015
Baltimore, Maryland, United States

Sponsored and Published by
SPIE
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.
Contents

v Authors
vii Conference Committee

AFFORDABILITY CONSIDERATIONS IN MILITARY SYSTEMS

9479 04 A reconfigurable electromagnetic interface to ease requirements on phased array common modules [9479-3]

9479 05 Optically controlled GeTe phase change switch and its applications in reconfigurable antenna arrays [9479-4]

9479 06 Impact: a low cost, reconfigurable, digital beamforming common module building block for next generation phased arrays [9479-5]

9479 08 Vanadium dioxide phase change switches [9479-7]

OPEN ARCHITECTURE SYSTEMS

9479 0A A systems approach to achieving the benefits of open and modular systems [9479-9]

9479 0C Open architecture design and approach for the Integrated Sensor Architecture (ISA) [9479-11]

9479 0E Modular open RF architecture: extending VICTORY to RF systems [9479-13]

ISR SYSTEMS

9479 0L Development of a video SAR for FMV through clouds (Invited Paper) [9479-20]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Nils R. Sandell Jr., Strategic Technology Office, DARPA (United States)

Symposium Co-chair

David A. Logan, BAE Systems (United States)

Conference Chair

Raja Suresh, General Dynamics Advanced Information Systems (United States)

Conference Program Committee

Robert Bond, MIT Lincoln Laboratory (United States)
Vasu D. Chakravarthy, Air Force Research Laboratory (United States)
Megan Cramer, U.S. Navy PEO LCS (United States)
John S. Eicke, U.S. Army Research Laboratory (United States)
Thomas Green, SAIC (United States)
Nickolas Guertin, U.S. Navy (United States)
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
Leo J. Rose, U.S. Air Force (United States)
Jason R. Stack, Office of Naval Research (United States)

Session Chairs

Affordability Considerations in Military Systems
Roy H. Olsson III, DARPA (United States)

Open Architecture Systems
Jason R. Stack, Office of Naval Research (United States)
Megan A. Cramer, U.S. Navy (United States)

Self-organizing Collaborative Unmanned ISR Teams I: Joint session with Conferences 9479 and 9468
Raja Suresh, General Dynamics Advanced Information Systems (United States)
Robert E. Karlsen, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)
Self-organizing, Collaborative Unmanned ISR Teams II: Joint session with conferences 9479 and 9468

Raja Suresh, General Dynamics Advanced Information Systems (United States)

Robert E. Karlsen, U.S. Army Tank Automotive Research, Development and Engineering Center (United States)

MAST: Bio-inspired Control: Joint Session with Conferences 9467, 9468, 9479

Christopher M. Kroninger, U.S. Army Research Laboratory (United States)

William D. Nothwang, U.S. Army Research Laboratory (United States)

MAST: Scale Legged Locomotion: Joint Session with Conferences 9467, 9468, 9479

Christopher M. Kroninger, U.S. Army Research Laboratory (United States)
