

PROCEEDINGS OF SPIE

Optical Sensing, Imaging, and Photon Counting: Nanostructured Devices and Applications

**Manijeh Razeghi
Dorota S. Temple
Gail J. Brown**
Editors

**11–13 August 2015
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 9555

Proceedings of SPIE 0277-786X, V. 9555

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Sensing, Imaging, and Photon Counting: Nanostructured Devices and Applications,
edited by Manijeh Razeghi, Dorota S. Temple, Gail J. Brown, Proc. of SPIE Vol. 9555,
955501 · © 2015 SPIE · CCC code: 0277-786X/15/\$18 · doi: 10.1117/12.2205181

Proc. of SPIE Vol. 9555 955501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optical Sensing, Imaging, and Photon Counting: Nanostructured Devices and Applications*, edited by Manijeh Razeghi, Dorota S. Temple, Gail J. Brown, Proceedings of SPIE Vol. 9555 (SPIE, Bellingham, WA, 2015) Six-digit Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

- v *Authors*
- vii *Conference Committee*
- ix *Nano-bio-optomechanics: nanoaperture tweezers probe single nanoparticles, proteins, and their interactions (Plenary Paper) [9544-501]*

UV DETECTORS AND FOCAL PLANE ARRAYS

- 9555 02 **Solar-blind photodetectors and focal plane arrays based on AlGaIn** [9555-1]
- 9555 03 **Superlattice infrared photodetector research at the Jet Propulsion Laboratory (Invited Paper)** [9555-8]

AVALANCHE PHOTODIODES AND SINGLE-PHOTON DETECTORS

- 9555 0B **Ultraviolet avalanche photodiodes** [9555-4]
- 9555 0C **Effect of temperature on superconducting nanowire single-photon detector noise** [9555-14]

OPTICAL SENSORS AND IMAGERS FOR IR, AND THZ

- 9555 0E **Si based mid-infrared GeSn photo detectors and light emitters (Invited Paper)** [9555-16]

MODELING AND SPECTROSCOPY OF NANOSTRUCTURED OPTICAL SENSORS

- 9555 0I **3D numerical modeling for ultra-sensitive noninvasive size-dependent nanoparticle detection technique using subwavelength silicon microcavities** [9555-20]

ADVANCED ROIC AND IMAGER CONCEPTS

- 9555 0L **Benefits of small pixel focal plane array technology (Invited Paper)** [9555-23]
- 9555 0M **Design methodology: edgeless 3D ASICs with complex in-pixel processing for pixel detectors** [9555-24]
- 9555 0N **Fusion: ultra-high-speed and IR image sensors (Invited Paper)** [9555-25]

NOVEL CONCEPTS IN NANOENGINEERED SENSORS

- 9555 0Q **Dielectrophoresis based integration of nanostructures and their sensorial application**
[9555-28]
- 9555 0S **Localized surface plasmon fiber device coated with carbon nanotubes for the specific**
detection of CO₂ [9555-30]
- 9555 0T **A novel sensing and tracing technology based on the hollow-core plastic optical fiber and**
cone-shape optical coupler [9555-31]
- 9555 0U **Growth of AlGaIn on silicon substrates: a novel way to make back-illuminated ultraviolet**
photodetectors (Invited Paper) [9555-3]

APPLICATIONS II

- 9555 0Y **With electroluminescence microcopy towards more reliable AlGaIn/GaN transistors**
(Invited Paper) [9555-35]
- 9555 10 **Polarization-based optical fiber sensor of steel corrosion** [9555-37]

POSTER SESSION

- 9555 17 **Modeling and analysis of hybrid pixel detector deficiencies for scientific applications**
[9555-45]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Symposium Co-chairs

David L. Andrews, University of East Anglia (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Conference Chairs

Manijeh Razeghi, Northwestern University (United States)
Dorota S. Temple, RTI International (United States)

Conference Co-chair

Gail J. Brown, Air Force Research Laboratory (United States)

Conference Program Committee

Ravi Athale, Office of Naval Research (United States)
James W. Beletic, Teledyne Imaging Sensors (United States)
Arvind I. D'Souza, DRS Sensors & Targeting Systems, Inc.
(United States)
Takeharu Goji Etoh, Ritsumeikan University (Japan)
Christoph H. Grein, University of Illinois at Chicago (United States)
Carl Jackson, SensL (Ireland)
Gerasimos Konstantatos, ICFO - Institut de Ciències Fotòniques
(Spain)
Jay Lewis, Defense Advanced Research Projects Agency
(United States)
Aizhen Li, Shanghai Institute of Microsystem and Information
Technology (China)
Ryan McClintock, Northwestern University (United States)
Hooman Mohseni, Northwestern University (United States)
Philip Perconti, U.S. Army Research Laboratory (United States)
Usha Varshney, National Science Foundation (United States)
Yong-Hang Zhang, Arizona State University (United States)

Session Chairs

- 1 UV Detectors and Focal Plane Arrays
Dorota S. Temple, RTI International (United States)
Jay S. Lewis, Defense Advanced Research Projects Agency (United States)
- 2 IR Detectors and Focal Plane Arrays: Colloidal Quantum Dots and Superlattices
Philip Perconti, U.S. Army Research Laboratory (United States)
Gail J. Brown, Air Force Research Laboratory (United States)
- 3 Avalanche Photodiodes and Single-Photon Detectors
Jay S. Lewis, Defense Advanced Research Projects Agency (United States)
Martina Baeumler, Fraunhofer-Institut für Angewandte Festkörperphysik (Germany)
- 4 Optical Sensors and Imagers for IR, and THz
James W. Beletic, Teledyne Imaging Sensors (United States)
Richard D. Schaller, Argonne National Laboratory (United States)
- 5 Modeling and Spectroscopy of Nanostructured Optical Sensors
Arvind I. D'Souza, DRS Sensors & Targeting Systems, Inc. (United States)
Shuiqing Yu, University of Arkansas (United States)
Ting Mei, Northwestern Polytechnical University (China)
- 6 Advanced ROIC and Imager Concepts
Hooman Mohseni, Northwestern University (United States)
Philippe Guyot-Sionnest, The University of Chicago (United States)
Ting Mei, Northwestern Polytechnical University (China)
- 7 Novel Concepts in Nanoengineered Sensors
Gail J. Brown, Air Force Research Laboratory (United States)
Ryan McClintock, Northwestern University (United States)
- 8 Applications I
Takeharu Goji Etoh, Ritsumeikan University (Japan)
Martin U. Pralle, SiOnyx Inc. (United States)
- 9 Applications II
Dorota S. Temple, RTI International (United States)
Seth Bank, The University of Texas at Austin (United States)
