Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

We had the great honor of organizing the Eighth International Conference on Digital Image Processing (ICDIP 2016). It was truly a great pleasure for us to greet more than 250 participants from many different countries. We firmly believe that ICDIP will become an important international event in the field of Digital Image Processing.

The Eighth International Conference on Digital Image Processing (ICDIP 2016) was co-sponsored by Sichuan Province Computer Federation, International Association of Computer Science and Information Technology, Chengdu University of Information Technology and Chinese Academy of Sciences Chengdu Institute of Computer Applications, and assisted by Sichuan University, University of Electronics Science and Technology of China, Southwest Jiaotong University, and Chengdu Young Education Consulting Co., Ltd.

The objective of this conference was to provide a platform for the participants to report and review innovative ideas and up-to-date progress and developments and discuss novel approaches to application in the digital image processing field. It is sincerely hoped that the research and development in digital image processing will be improved and the international cooperation sharing the common interest enhanced.
