Volume 10051

Proceedings of SPIE, 1605-7422, V. 10051

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Neural Imaging and Sensing, edited by Qingming Luo, Jun Ding, Proc. of SPIE Vol. 10051,
1005101 · © 2017 SPIE · CCC code: 1605-7422/17/\$18 · doi: 10.1117/12.2270045

Proc. of SPIE Vol. 10051 1005101-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Neural Imaging and Sensing*, edited by Qingming Luo, Jun Ding, Proceedings of SPIE Vol. 10051 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a seven-digit CID article numbering system in which:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

Contents

- v *Authors*
vii *Conference Committee*

OCT I

- 10051 03 **Visible light spectral domain optical coherence microscopy system for ex vivo imaging**
[10051-2]

NOVEL BIOMARKER OR MODEL

- 10051 0G **Sub-micron opto-chemical probes for studying living neurons** [10051-15]
10051 0H **A novel reactive resin for embedding biological tissue** [10051-16]
10051 0I **Stress plays provoking role in hypertension-related stroke: injuries of blood-brain barrier
function** [10051-17]

FLUORESCENCE IMAGING I

- 10051 0M **Through-skull vasculature assessment using fluorescence brain imaging on murine models
at around 800 nm** [10051-21]
10051 0O **Simultaneous two-photon imaging of cerebral oxygenation and capillary blood flow in
atherosclerotic mice** [10051-23]

FLUORESCENCE IMAGING II

- 10051 0R **A three-photon microscope with adaptive optics for deep-tissue in vivo structural and
functional brain imaging** [10051-26]
10051 0T **Rapid imaging of mammalian brain slices with a compact light sheet fluorescent
microscope** [10051-28]

PHOTOACOUSTIC IMAGING

- 10051 0W **Real-time imaging for cerebral ischemia in rats using the multi-wavelength handheld
photoacoustic system** [10051-31]
10051 0X **Feasibility of using RH795 dye for photoacoustic imaging of neuro-electrical activity**
[10051-32]

INTRINSIC SIGNAL IMAGING

10051 10 **Development of a multi-exposure speckle imaging for mice brain imaging** [10051-35]

POSTER SESSION

10051 15 **Wearable ear EEG for brain interfacing** [10051-40]

10051 17 **Functional near infrared spectroscopy for awake monkey to accelerate neurorehabilitation study** [10051-42]

10051 18 **Method for leveling the signal-to-noise ratio in multichannel functional near-infrared spectroscopy** [10051-43]

10051 19 **A pH-sensitive red fluorescent protein compatible with hydrophobic resin embedding** [10051-44]

10051 11 **Resonance Raman spectroscopy of human brain metastasis of lung cancer analyzed by blind source separation** [10051-54]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine,
Massachusetts General Hospital (United States) and Harvard School
of Medicine (United States)

Program Track Chairs:

Rafael Yuste, Columbia University (United States)

David Boas, Massachusetts General Hospital, Harvard Medical School
(United States)

Conference Chairs

Qingming Luo, Huazhong University of Science and Technology
(China)

Jun Ding, Stanford School of Medicine (United States)

Conference Program Committee

Robert R. Alfano, The City College of New York (United States)

David A. Boas, Massachusetts General Hospital (United States)

Shin-Chi Chen, The Chinese University of Hong Kong (China)

Yu Chen, University of Maryland, College Park (United States)

Javier DeFelipe, Universidad Politécnica de Madrid (Spain)

Hongwei Dong, University of California, Los Angeles (United States)

Congwu Du, Stony Brook University (United States)

Beop-Min Kim, Korea University (Korea, Republic of)

Byungkook Lim, University of California, San Diego (United States)

Francesco Saverio Pavone, Laboratorio Europeo per la Spettroscopia
Non-lineare (Italy)

Darcy S. Peterka, Columbia University (United States)

Kambiz Pourrezaei, Drexel University (United States)

Claus-Peter Richter, Northwestern University (United States)

Anna W. Roe, Vanderbilt University (United States)

Shy Shoham, Technion-Israel Institute of Technology (Israel)

Shaoqun Zeng, Britton Chance Center for Biomedical Photonics
(China)

Session Chairs

- 1 OCT I
Qingming Luo, Huazhong University of Science and Technology
(China)
- 2 OCT II
Ruikang K. Wang, University of Washington (United States)
- 3 Whole Brain Imaging
Francesco Saverio Pavone, Laboratorio Europeo per la Spettroscopia
Non-lineare (Italy)
- 4 Novel Biomarker or Model
Dan Zhu, Huazhong University of Science and Technology (China)
- 5 Fluorescence Imaging I
Shaoqun Zeng, Britton Chance Center for Biomedical Photonics
(China)
- 6 Fluorescence Imaging II
Jun Ding, Stanford School of Medicine (United States)
- 7 Photoacoustic Imaging
Beop-Min Kim, Korea University (Korea, Republic of)
- 8 Intrinsic Signal Imaging
Yu Chen, University of Maryland, College Park (United States)
- 9 NIR Imaging
David A. Boas, Massachusetts General Hospital (United States)
