

# PROCEEDINGS OF SPIE

## ***Photonics Applications in Astronomy, Communications, Industry, and High Energy Physics Experiments 2017***

**Ryszard S. Romaniuk  
Maciej Linczuk**  
*Editors*

**28 May–6 June 2017  
Wilga, Poland**

*Organized by*  
Institute of Electronic Systems, Faculty of Electronics and Information Technologies,  
Warsaw University of Technology (Poland)

*Sponsored by*  
PSP—Photonics Society of Poland • Committee of Electronics and Telecommunications,  
Polish Academy of Sciences • ARIES—Accelerator Research and Innovation for European  
Science and Society (CERN, EU H2020) • PKOpto—Polish Committee of Optoelectronics of  
SEP—The Association of Polish Electrical Engineers • EuroFusion Collaboration • EuroFusion  
Poland

*Published by*  
SPIE

**Volume 10445**

Proceedings of SPIE 0277-786X, V. 10445

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Photonics Applications in Astronomy, Communications, Industry, and High Energy Physics Experiments 2017,  
edited by Ryszard S. Romaniuk, Maciej Linczuk, Proc. of SPIE Vol. 10445, 1044501  
© 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2282099

Proc. of SPIE Vol. 10445 1044501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xxvii	<i>Introduction</i>

## Part One

---

### CONFERENCE OVERVIEW

---

10445 02	<b>Photonics Applications and Web Engineering: WILGA 2017 (Invited Paper)</b> [10445-1]
----------	---

---

### PHOTONICS APPLICATIONS

---

10445 03	<b>Multiwavelength laser scattering tomography (Invited Paper)</b> [10445-24]
10445 04	<b>Fringe image analysis for variable wavelength interferometry</b> [10445-25]
10445 05	<b>Mobile environment for an emission spectrometer</b> [10445-26]
10445 06	<b>Response of a uniform optical fiber Bragg grating to strain with a non-smooth distribution: measurements and simulations</b> [10445-27]
10445 07	<b>Measurement of impulse current using polarimetric fiber optic sensor</b> [10445-33]
10445 08	<b>Modeling the characteristic of the optical wavelength discriminator with fiber Bragg grating</b> [10445-37]
10445 09	<b>Asynchronous monitoring of the quality of multilevel optical PAM signals (Invited Paper)</b> [10445-42]
10445 0A	<b>Availability model of stand-alone photovoltaic system</b> [10445-78]
10445 0B	<b>Comparison of the FBG sensor encapsulated into PDMS and FBG sensor glued on the plexiglass pad for respiratory and heart rate monitoring</b> [10445-90]
10445 0C	<b>Optoelectronic systems for automatic vehicle counting and classification in rest areas</b> [10445-96]
10445 0D	<b>Optical properties of thin TiO<sub>2</sub> film deposited on the fiber optic sensor head</b> [10445-114]
10445 0E	<b>SSMF 1310nm dispersion characteristic influence on the 400 Gbit/s and 1000 Gbit/s ethernet physical layer design</b> [10445-115]

10445 OF	<b>Modeling of Brillouin scattering in long-distance fiber optic links with bidirectional optical amplifiers [10445-116]</b>
10445 OG	<b>Analysis of impact long period Bragg gratings parameters on their spectral transmission characteristics [10445-121]</b>
10445 OH	<b>Two-channel MIMO-OCC transmission system on a smartphone [10445-123]</b>
10445 OI	<b>Controlling geometric dimensions of small-size complex-shaped objects [10445-132]</b>
10445 OJ	<b>Spaceborne linear array imager's spatial resolution for arbitrary viewing angles [10445-136]</b>
10445 OK	<b>Lamp of adjustable spectrum for photographic usage [10445-137]</b>
10445 OL	<b>Control algorithms of multi-color LED lighting fixtures [10445-146]</b>
10445 OM	<b>Implementation of multistandard video signals integrator [10445-150]</b>
10445 ON	<b>Optical switching using IP protocol [10445-152]</b>
10445 OO	<b>The temperature tracking system based on fiber Bragg grating and Peltier module [10445-162]</b>
10445 OP	<b>Long time stability of lamps with nanostructural carbon field emission cathodes [10445-179]</b>
10445 OQ	<b>Thermo-optical method and a means of measuring mass fraction control of liquefied petroleum gas components [10445-181]</b>
10445 OR	<b>Parallel-hierarchical processing and classification of laser beam profile images based on the GPU-oriented architecture [10445-183]</b>
10445 OS	<b>Efficiency of optical-electronic systems: methods application for the analysis of structural changes in the process of eye grounds diagnosis [10445-185]</b>
10445 OT	<b>Color transfer by fitting clouds of color points [10445-189]</b>
10445 OU	<b>Using lights in a volume-oriented rendering [10445-190]</b>
10445 OV	<b>Comparison of optical flow algorithms performance on flame image sequences [10445-202]</b>
10445 OW	<b>Object detection in images with low light condition [10445-208]</b>
10445 OX	<b>Fiber optic interferometric force sensor with reduced temperature sensitivity [10445-209]</b>
10445 OY	<b>Contouring of microcapillary images based on sharpening to one pixel of boundary curves [10445-212]</b>
10445 OZ	<b>The spectral method of jitter estimation in fiber optics transmission systems (Invited Paper) [10445-221]</b>

- 10445 10 **Reference LED source of subnanosecond pulses of broadband optical radiation**  
[10445-223]
- 10445 11 **Application of the Fractional Fourier Transform for dispersion compensation in signals from a fiber-based Fabry-Perot interferometer** [10445-224]
- 10445 12 **The influence of CTFBG gratings physical parameters on their spectral properties**  
[10445-227]
- 10445 13 **Virtual reality for spherical images** [10445-228]
- 10445 14 **Comparison of PAM and CAP modulations robustness against mode partition noise in optical links** [10445-229]
- 10445 15 **The infrared camera application for calculating the impact of the feed screw thermal expansion on machining accuracy** [10445-234]
- 10445 16 **High speed data transmission with a modal filter** [10445-241]
- 10445 17 **Uncertainty of chromatic dispersion estimation from transmitted waveforms in direct detection systems (Invited Paper)** [10445-258]
- 10445 18 **Design and fabrication principles of chirped tapered fiber-Bragg-grating-based Fabry-Perot cavity** [10445-261]
- 10445 19 **Detection system for optical coherence tomography: Czerny-Turner spectrometer**  
[10445-262]
- 10445 1A **Temperature fiber Bragg grating based sensor for respiration monitoring** [10445-263]
- 10445 1B **Optical transmission testing based on asynchronous sampling techniques: images analysis containing chromatic dispersion using convolutional neural network** [10445-264]

---

#### COMPUTATIONAL INTELLIGENCE

---

- 10445 1C **Specific properties of invariant, decoupling, and blocking zeros of positive linear electrical circuits with zero transfer matrices (Invited Paper)** [10445-3]
- 10445 1D **Katome: de novo DNA assembler implemented in rust** [10445-15]
- 10445 1E **Encoding of compatible micro-operations in LUT-based FSMs** [10445-34]
- 10445 1F **On a concept of computer game implementation based on a temporal logic** [10445-40]
- 10445 1G **Reducing hardware in FPGA-based Mealy FSM** [10445-41]
- 10445 1H **Hardware realization of an SVM algorithm implemented in FPGAs** [10445-43]
- 10445 1I **Implementation of reversible gates in FPGA structure** [10445-56]
- 10445 1J **Analysing efficiency of IPv6 packet transmission over 6LoWPAN network** [10445-58]

10445 1K	<b>Investigation of circuit features of the immittance modulo-2 adder realization</b> [10445-74]
10445 1L	<b>Smile detectors correlation</b> [10445-79]
10445 1M	<b>Reversible gates and circuits descriptions</b> [10445-84]
10445 1N	<b>A method of reversible circuits synthesis based on s-maps (Invited Paper)</b> [10445-86]
10445 1O	<b>Using a software-defined computer in teaching the basics of computer architecture and operation</b> [10445-87]
10445 1P	<b>Theoretical basis, principles of design, and experimental study of the prototype of perfect AFCS transmitting signals without coding (Invited Paper)</b> [10445-99]
10445 1Q	<b>Complementary filter implementation in the dynamic language Lua</b> [10445-109]
10445 1R	<b>Simulation of data safety components for corporative systems</b> [10445-111]
10445 1S	<b>Logic synthesis of n-ary quantitative relations</b> [10445-118]
10445 1T	<b>Investigation of tracking systems properties in CAVE-type virtual reality systems</b> [10445-120]
10445 1U	<b>Modeling of luminance distribution in CAVE-type virtual reality systems</b> [10445-122]
10445 1V	<b>The research of the availability at cloud service systems</b> [10445-124]
10445 1W	<b>Cloud-based mobility management in heterogeneous wireless networks</b> [10445-127]
10445 1X	<b>Optical transducers with frequency output</b> [10445-129]
10445 1Y	<b>The technology of searching the associative rules while developing the software</b> [10445-133]
10445 1Z	<b>Algorithm of parallel: hierarchical transformation and its implementation on FPGA</b> [10445-135]
10445 20	<b>Towards scalable Byzantine fault-tolerant replication</b> [10445-141]
10445 21	<b>Research of neural network classifier in speaker recognition module for automated system of critical use</b> [10445-142]
10445 22	<b>High-speed counters in Fibonacci numerical system</b> [10445-149]
10445 23	<b>PPRM-based approach to synthesis of reversible functions</b> [10445-153]

## Part Two

---

### COMPUTATIONAL INTELLIGENCE (cont.)

---

10445 24	<b>Adaptive compression methods of data based on Fibonacci linear forms</b> [10445-154]
----------	---

10445 25	<b>C code generation from Petri-net-based logic controller specification</b> [10445-167]
10445 26	<b>Research of a filter on the parallel contour on L-, C-negatrons</b> [10445-168]
10445 27	<b>Self-powered information measuring wireless networks using the distribution of tasks within multicore processors</b> [10445-173]
10445 28	<b>Modeling and implementation of concurrent logic controllers with use of Petri nets, LSMs, and sequent calculus</b> [10445-175]
10445 29	<b>Influence of radiation on metastability-based TRNG</b> [10445-186]
10445 2A	<b>Secure TRNG with random phase stimulation</b> [10445-187]
10445 2B	<b>Offsetting, relations, and blending with perturbation functions</b> [10445-191]
10445 2C	<b>Functional integration of automated system databases by means of artificial intelligence</b> [10445-196]
10445 2D	<b>Concept of information technology of monitoring and decision-making support</b> [10445-199]
10445 2E	<b>The approach to engineering tasks composition on knowledge portals</b> [10445-204]
10445 2F	<b>Grayscale morphological filter based on local statistics</b> [10445-205]
10445 2G	<b>An application of PSO algorithm for multi-criteria geometry optimization of printed low-pass filters based on conductive periodic structures</b> [10445-216]
10445 2H	<b>WebGL and web audio software lightweight components for multimedia education</b> [10445-225]
10445 2I	<b>Reduction in spontaneous firing of mouse excitatory layer 4 cortical neurons following visual classical conditioning</b> [10445-226]
10445 2J	<b>Fractional kinetics of compartmental systems: first approach with use digraph-based method</b> [10445-235]
10445 2K	<b>Characterization of electrical appliances in transient state</b> [10445-239]
10445 2L	<b>Customizing FP-growth algorithm to parallel mining with Charm++ library</b> [10445-240]
10445 2M	<b>Reversible synthesis of incompletely specified Boolean functions using functional decomposition</b> [10445-243]
10445 2N	<b>Encoding of chain outputs in FPGA-based Moore FSMs</b> [10445-249]
10445 2O	<b>Load shifting with the use of home energy management system implemented in FPGA</b> [10445-252]
10445 2P	<b>Mathematical models of production systems development based on optimal aggregation methodology</b> [10445-265]

- 10445 2Q **The efficiency analysis of HTTP/2 protocol** [10445-268]
- 10445 2R **Threats and risks to information security: a practical analysis of free access wireless networks** [10445-269]
- 10445 2S **Quality of content delivery in computer specialists training system** [10445-271]

---

#### BIOMEDICAL APPLICATIONS

---

- 10445 2T **Generation of medium frequency electrotherapeutic signals** [10445-2]
- 10445 2U **Improvement of carbon nanotubes films conductivity for use in biomedical application** [10445-8]
- 10445 2V **New tool to assemble repetitive regions using next-generation sequencing data** [10445-9]
- 10445 2W **Signal processing system for electrotherapy applications** [10445-11]
- 10445 2X **DNASynth: a software application to optimization of artificial gene synthesis** [10445-13]
- 10445 2Y **Localizing wushu players on a platform based on a video recording** [10445-23]
- 10445 2Z **Mobile optogenetic modules for mice** [10445-44]
- 10445 30 **RF-based power distribution system for optogenetic experiments** [10445-46]
- 10445 31 **Genomecmp: computer software to detect genomic rearrangements using markers** [10445-47]
- 10445 32 **CuGene as a tool to view and explore genomic data** [10445-48]
- 10445 33 **Comparison of de novo assembly statistics of *Cucumis sativus* L.** [10445-51]
- 10445 34 **Assembly of cucumber (*Cucumis sativus* L.) somaclones** [10445-52]
- 10445 35 **Detection of genomic rearrangements in cucumber using genomecmp software** [10445-53]
- 10445 36 **Detection system of groundwater contamination in vicinity of shale gas well** [10445-55]
- 10445 37 **System and algorithm for evaluation of human auditory analyzer state** [10445-69]
- 10445 38 **Bioinformatics and expressional analysis of cDNA clones from floral buds** [10445-88]
- 10445 39 **Laser capture microdissection to study flower morphogenesis** [10445-89]
- 10445 3A **Measurement of hepatic steatosis based on magnetic resonance images** [10445-94]
- 10445 3B **Computer-aided system for interactive psychomotor testing** [10445-100]
- 10445 3C **Thermoelectrical generator powered by human body** [10445-104]

10445 3D	<b>Smart image recognition for medical application of lab-on-paper</b> [10445-105]
10445 3E	<b>EMG amplifier with wireless data transmission</b> [10445-107]
10445 3F	<b>Automated method for structural segmentation of nasal airways based on cone beam computed tomography</b> [10445-138]
10445 3G	<b>Physical-mathematical model of optical radiation interaction with biological tissues</b> [10445-140]
10445 3H	<b>Study of the air flow mode in the nasal cavity during a forced breath</b> [10445-151]
10445 3I	<b>Neural expert decision support system for stroke diagnosis</b> [10445-164]
10445 3J	<b>On the possibility of the patient's skin overheating during low-intensive phototherapy</b> [10445-169]
10445 3K	<b>Mathematical modeling of systemic factors determining the risk of deterioration of drinking water supply and development of allergic diseases of population</b> [10445-172]
10445 3L	<b>The human body metabolism process mathematical simulation based on Lotka-Volterra model</b> [10445-180]
10445 3M	<b>Bio-inspired approach to multistage image processing</b> [10445-184]
10445 3N	<b>In-vivo monitoring of oxygen saturation in murine carcinoma during PDT by diode laser light diffuse reflectance</b> [10445-188]
10445 3O	<b>Medical expert system for assessment of coronary heart disease destabilization based on the analysis of the level of soluble vascular adhesion molecules</b> [10445-192]
10445 3P	<b>Double-compression method for biomedical images</b> [10445-197]
10445 3Q	<b>The optoelectronic sensor creatinine and urea</b> [10445-198]
10445 3R	<b>Risk assessment of bronchial asthma development in children with atopic dermatitis</b> [10445-201]
10445 3S	<b>Diagnosis abnormalities of limb movement in disorders of the nervous system</b> [10445-207]
10445 3T	<b>Identification and human condition analysis based on the human voice analysis</b> [10445-210]
10445 3U	<b>Can we recognize horses by their ocular biometric traits using deep convolutional neural networks?</b> [10445-218]
10445 3V	<b>Influence of the spectral composition of LED lighting system on plants cultivation in a darkroom</b> [10445-230]
10445 3W	<b>Analytical approaches to estimation of temporal frequency preference from visual evoked potentials</b> [10445-242]

- 10445 3X **Classification of electroencephalograph signals using time-frequency decomposition and linear discriminant analysis** [10445-253]
- 10445 3Y **Tunable white light source for medical applications** [10445-256]
- 10445 3Z **An automated cage for optogenetic experiments with electromagnetic positioning system** [10445-266]
- 10445 40 **Evaluation of aortic contractility based on analysis of CT images of the heart** [10445-281]

---

#### ASTRONOMY, PLASMA, AND HIGH ENERGY PHYSICS

---

- 10445 41 **Transverse velocity dependence of pion-kaon correlations at LHC energies (Invited Paper)** [10445-12]
- 10445 42 **Android application and REST server system for quasar spectrum presentation and analysis** [10445-18]
- 10445 43 **Acceleration of protons to high energies by an ultra-intense femtosecond laser pulse** [10445-95]
- 10445 44 **Application of multivariate analysis methods to search for variable stars in the Pi of the Sky experiment** [10445-117]
- 10445 45 **Study of the heavy-ion collisions using the femtoscopy correlations of the two protons system** [10445-125]
- 10445 46 **Femtoscopy as a tool for studying phase transition phenomena at STAR/BES energies in context of femtoscopic analysis at NICA** [10445-143]
- 10445 47 **Virtual reality visualization algorithms for the ALICE high energy physics experiment on the LHC at CERN** [10445-145]
- 10445 48 **DMA implementations for FPGA-based data acquisition systems (Invited Paper)** [10445-147]
- 10445 49 **Selection of hardware platform for CBM Common Readout Interface** [10445-148]
- 10445 4A **Performance evaluation of the detector and ultra-light micro-cable assembly for tracking application in CBM experiment** [10445-156]
- 10445 4B **Evaluation of FPGA to PC feedback loop** [10445-157]
- 10445 4C **Pi of the Sky observation of GRB160625B** [10445-160]
- 10445 4D **VHDL resolved function based inner communication bus for FPGA (Invited Paper)** [10445-161]
- 10445 4E **Measurement of  $D^0$  elliptic flow using the heavy flavor tracker detector in Au+Au collisions at  $\sqrt{s_{NN}} = 200$  GeV** [10445-176]
- 10445 4F **The computation in diagnostics for tokamaks: systems, designs, approaches** [10445-211]

10445 4G	<b>Pion-kaon femtoscopy at STAR</b> [10445-213]
10445 4H	<b>ADC interface for data server with data preselection for luminosity detector in AIDA-2020 project</b> [10445-217]
10445 4I	<b>Pi of the Sky in LSC-Virgo's EM follow-up in O1 science run (Invited Paper)</b> [10445-231]
10445 4J	<b>Proton-proton, antiproton-antiproton and proton-antiproton correlations</b> [10445-236]
10445 4K	<b>FPGA-based firmware model for extended measurement systems with data quality monitoring</b> [10445-248]
10445 4L	<b>4 Gbps Scalable Low-Voltage Signaling (SLVS) transceiver for pixel radiation detectors</b> [10445-259]
10445 4M	<b>Examination of heavy-ion collisions using EPOS model in the frame of BES program</b> [10445-272]
10445 4N	<b>Data synchronisation for HEP experiments</b> [10445-273]

## Part Three

---

### MATERIAL ENGINEERING

---

10445 4O	<b>Influence of the UV radiation on the screen-printed pH-sensitive layers based on graphene and ruthenium dioxide</b> [10445-4]
10445 4P	<b>SEM and Raman studies of CNT films on porous Si</b> [10445-5]
10445 4Q	<b>Using the principal component analysis method in studies of the TiO<sub>2</sub> Raman spectra</b> [10445-6]
10445 4R	<b>Optical study of plasma sprayed hydroxyapatite coatings deposited at different spray distance</b> [10445-7]
10445 4S	<b>CNT fibers p-doped with F4TCNQ (2,3,5,6-Tetrafluoro-7,7,8,8-tetracyanoquinodimethane)</b> [10445-10]
10445 4T	<b>Visualization of the percolation phenomenon in two-dimensional arrangement of metallic spherical particles</b> [10445-14]
10445 4U	<b>Investigations of carbon nanotubes and polyacrylonitrile composites for flexible textronics</b> [10445-20]
10445 4V	<b>Spectroscopic properties and energy transfer in Er/Ag co-doped antimony oxide glass</b> [10445-21]
10445 4W	<b>Effect of Ag content on structural and luminescent properties of antimony-germanate-silicate glass doped with Eu<sup>3+</sup> ions</b> [10445-32]

- 10445 4X **The impact of the proportion of nanoparticles to the spherical microparticles of silver on the connection parameters LTJT** [10445-59]
- 10445 4Y **Transparent electrodes made with ultrasonic spray coating technique for flexible heaters** [10445-64]
- 10445 4Z **Influence of structural disorder on the optical properties of non-stoichiometric  $\text{Cu}_6\text{P}_{55}\text{I}$ -based thin films** [10445-72]
- 10445 50 **The thermal stability of the carbon-palladium films for hydrogen sensor applications** [10445-73]
- 10445 51 **C-Ni-Pd and CNT-Ni-Pd film's molecular and crystalline structure investigations by FTIR spectroscopy and XRD diffraction** [10445-75]
- 10445 52 **Voltage resonance phenomenon and simulation of electrical properties of  $(\text{FeCoZr})_x(\text{PbZrTiO}_3)_{(100-x)}$  nanocomposite films** [10445-85]
- 10445 53 **Pd-Ni-MWCNT nanocomposite thin films: preparation and structure** [10445-98]
- 10445 54 **Lab-on-paper: fusion with foil and inkjet printing** [10445-102]
- 10445 55 **Nanosilver conductive lines made by spray coating and aerosol jet printing technique** [10445-113]
- 10445 56 **Thermoelectric properties of SiGe whiskers with various morphology** [10445-130]
- 10445 57 **Modeling and fabrication of 4H-SiC Schottky junction** [10445-158]
- 10445 58 **Modeling and simulation of 4H-SiC field effect transistor** [10445-159]
- 10445 59 **Frequency pressure transducer with a sensitivity of mem capacitor on the basis of transistor structure with negative resistance** [10445-166]
- 10445 5A **Percolation threshold of granular metal-dielectric nanocomposites  $(\text{FeCoZr})_x(\text{CaF}_2)_{1-x}$  produced in atmosphere of argon and oxygen** [10445-174]
- 10445 5B **Determination of the chemical composition and basic AC properties of nanocomposites  $(\text{CoFeZr})_x(\text{SiO}_2)_{(100-x)}$**  [10445-214]
- 10445 5C **Gas sensitive material on the basis of cholesteric-nematic mixture doped carbon nanotubes for optoelectronic  $\text{NH}_3$  gas sensor** [10445-222]
- 10445 5D **Statistical analysis of oil percolation through pressboard measured by optical recording** [10445-237]
- 10445 5E **Optical registration of the vacuum impregnation process of electrotechnical pressboard by transformer oil** [10445-238]
- 10445 5F **Strain simulation in face turning of Ti6Al4V thin-walled parts** [10445-250]

10445 5G	<b>Application of Taguchi method to optimization of surface roughness during precise turning of NiTi shape memory alloy [10445-251]</b>
10445 5H	<b>Studies on possibilities of polymer composites with conductive nanomaterials application in wearable electronics [10445-254]</b>
10445 5I	<b>Textile fibers coated with carbon nanotubes for smart clothing applications [10445-283]</b>

---

#### ADVANCED APPLICATIONS

---

10445 5J	<b>Selected aspects of cogeneration technology in distributed energy applications [10445-17]</b>
10445 5K	<b>Multicopter micro air vehicle autonomous landing system based on image markers recognition [10445-36]</b>
10445 5L	<b>Design of circuits of multilevel inverter on IGBT transistors with pulse-amplitude control [10445-45]</b>
10445 5M	<b>Chosen sources of signal interference in HD-TVI technology [10445-49]</b>
10445 5N	<b>Exploring disk performance benchmarks [10445-62]</b>
10445 5O	<b>Reduction of peak energy demand based on smart appliances energy consumption adjustment [10445-65]</b>
10445 5P	<b>The realization of temperature controller for small resistance measurement system [10445-66]</b>
10445 5Q	<b>The influence of electric field intensity on the activation energy of the DC conductivity the electrical pressboard of impregnated with synthetic ester [10445-67]</b>
10445 5R	<b>Principles of operation of high voltage glow discharge electron guns and some possibilities of their technological application [10445-68]</b>
10445 5S	<b>Compensation of hard- and soft-iron distortions is magnetometer measurement data [10445-92]</b>
10445 5T	<b>Opportunistic tri-band carrier aggregation in licensed spectrum for multi-operator 5G hetnet [10445-93]</b>
10445 5U	<b>Air condition sensor on KNX network [10445-97]</b>
10445 5V	<b>Determining of combustion process state based on flame images analysis using k-NN classification [10445-101]</b>
10445 5W	<b>The use of combined classification for analysis of the combustion process state [10445-103]</b>
10445 5X	<b>Experimental measurement of energy harvesting with backpack [10445-106]</b>
10445 5Y	<b>IoT-based flood embankments monitoring system [10445-108]</b>

- 10445 5Z     **Safety recommendation component of mobile information assistant of the tourist**  
[10445-110]
- 10445 60     **Online single-factor measured active nodal load forecasting in an electric power system**  
[10445-126]
- 10445 61     **Method of image texture segmentation using Laws' energy measures** [10445-128]
- 10445 62     **Multi-channel temperature measurement system for automotive battery stack** [10445-131]
- 10445 63     **Different grades MEMS accelerometers error characteristics** [10445-139]
- 10445 64     **Ground control station software design for micro aerial vehicles** [10445-144]
- 10445 65     **Research and neutralizing of spiral deterioration impact to the accuracy of measuring of the volume of sand classifier** [10445-163]
- 10445 66     **Smart grid technologies in local electric grids** [10445-165]
- 10445 67     **Complex information and technical solutions for energy management of municipal energetics** [10445-170]
- 10445 68     **Matching of renewable source of energy generation graphs and electrical load in local energy system** [10445-171]
- 10445 69     **Sensor set-up for wireless measurement of automotive rim and wheel parameters in laboratory conditions (Invited Paper)** [10445-178]
- 10445 6A     **Method of magneto-elastic control of mechanic rigidity in assemblies of hydropower units**  
[10445-182]
- 10445 6B     **The peculiarity of the construction of an optical-electronic system for measurement of geometrical parameters of objects in the micrometer range** [10445-195]
- 10445 6C     **Vibration diagnostic system for evaluation of state interconnected electrical motors mechanical parameters** [10445-200]
- 10445 6D     **Chip flow analysis during the turning of an aircraft part made of stainless steel** [10445-220]
- 10445 6E     **Real-time pitch shifting using a general purpose microcontroller** [10445-232]
- 10445 6F     **Adaptive sub-ranging ADC with autocalibration of internal components offsets** [10445-233]
- 10445 6G     **Development and verification of a measuring stand for recording the physical phenomena during turning** [10445-244]
- 10445 6H     **Implementation of thermoelectric module for cooling process of microscale experimental room** [10445-245]
- 10445 6I     **Preliminary verification tests of mains harmonics generator** [10445-246]
- 10445 6J     **Monitoring of the combustion process under industrial conditions** [10445-255]

- 10445 6K **Self-organizing intelligent network of smart electrical heating devices as an alternative to traditional ways of heating** [10445-267]
- 10445 6L **Methodology of shooting training using modern IT techniques** [10445-279]
- 10445 6M **Functional assumptions of virtual system to improve shooting training and intervention tactics of services responsible for security (VirtPol) (Invited Paper)** [10445-280]
- 10445 6N **Development of an algorithm for controlling a multilevel three-phase converter** [10445-54]

# Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

## Conference Committees

### *WILGA Symposia Steering Committee*

**Andrzej Domański**, Warsaw University of Technology (Poland)  
**Jan Dorosz**, Białystok University of Technology (Poland)  
**Tadeusz Kaczorek**, Białystok University of Technology (Poland)  
**Jerzy Klamka**, Elektronika, Association of Polish Electrical Engineers (Poland)  
**Lech Mankiewicz**, Mikołaj Kopernik Astronomical Center (Poland)  
**Krzysztof Poźniak**, Warsaw University of Technology (Poland)  
**Ryszard S. Romaniuk**, Warsaw University of Technology (Poland)  
**Jerzy Weremczuk**, Warsaw University of Technology (Poland)  
**Tomasz R. Woliński**, Warsaw University of Technology (Poland)  
**Waldemar Wójcik**, Lublin University of Technology (Poland)  
**Filip A. Żarnecki**, University of Warsaw (Poland)

### *WILGA 2017 Symposium Chair*

**Ryszard S. Romaniuk**, Warsaw University of Technology (Poland)

### *WILGA 2017 Symposium Committee*

**Tomasz Adamski**, Warsaw University of Technology (Poland)  
**Michał Borecki**, Warsaw University of Technology (Poland)  
**Elżbieta Czerwosz**, Tele and Radio Research Institute (Poland)  
**Dominik Dorosz**, Białystok University of Technology (Poland)  
**Piotr Gawkowski**, Warsaw University of Technology (Poland)  
**Małgorzata Jakubowska**, ITME Warsaw (Poland)  
**Kazimierz Jędrzejewski**, Warsaw University of Technology (Poland)  
**Konrad Jędrzejewski**, Warsaw University of Technology (Poland)  
**Grzegorz Kasprówicz**, Warsaw University of Technology (Poland)  
**Adam Kisiel**, Warsaw University of Technology (Poland)  
**Andrzej Kotyra**, Lublin University of Technology (Poland)  
**Maciej Linczuk**, Warsaw University of Technology (Poland)  
**Lech Mankiewicz**, Polish Academy of Sciences (Poland)  
**Robert Nietubyć**, National Center for Nuclear Research (Poland)  
**Robert Nowak**, Warsaw University of Technology (Poland)  
**Tomasz Osuch**, Warsaw University of Technology (Poland)  
**Anatoli Piatonow**, Warsaw University of Technology (Poland)  
**Krzysztof Poźniak**, Warsaw University of Technology (Poland)  
**Ryszard S. Romaniuk**, Warsaw University of Technology (Poland)  
**Jerzy Siuzdak**, Warsaw University of Technology (Poland)  
**Władysław Skarbek**, Warsaw University of Technology (Poland)

**Andrzej Skorupski**, Warsaw University of Technology (Poland)  
**Janusz Sosnowski**, Warsaw University of Technology (Poland)  
**Piotr Turkiewicz**, Warsaw University of Technology (Poland)  
**Wojciech Walendziuk**, Lublin University of Technology (Poland)  
**Jerzy Weremczuk**, Warsaw University of Technology (Poland)  
**Andrzej Wróbel**, Nencki Institute of Experimental Biology (Poland)  
**Wojciech Zabołotny**, Warsaw University of Technology (Poland)  
**Filip A. Żarnecki**, University of Warsaw (Poland)

WILGA 2017 Organizing Committee

**Maciej Linczuk**, *Chair*, Warsaw University of Technology (Poland)

WILGA 2017 Symposium Session Chairs

Photonics Applications and Web Engineering, XLth Wilga 2017  
Symposium Opening

**Ryszard S. Romaniuk**, Warsaw University of Technology (Poland)

Optical Communications

**Jerzy Siuzdak**, Warsaw University of Technology (Poland)

Pi of the Sky: A Network of Astronomical Telescopes

**Lech Mankiewicz**, Polish Academy of Sciences (Poland)

Photonic Sensors and Systems

**Tomasz Osuch**, Warsaw University of Technology (Poland)

High Energy Physics Experiments I

**Krzysztof Poźniak**, Warsaw University of Technology (Poland)

High Energy Physics Experiments II

**Adam Kisiel**, Warsaw University of Technology (Poland)

Sensors and Measurement Systems

**Jerzy Weremczuk**, Warsaw University of Technology (Poland)

Metrology and Measurement Systems

**Wojciech Walendziuk**, Lublin University of Technology (Poland)

Digital Image Processing and Analysis

**Włodysław Skarbek**, Warsaw University of Technology (Poland)

Optoelectronics Technologies, Components, Devices, and Systems

**Michał Borecki**, Warsaw University of Technology (Poland)

Materials and Technologies I

**Małgorzata Jakubowska**, Warsaw University of Technology (Poland)

Materials and Technologies II

**Elżbieta Czerwosz**, Tele and Radio Research Institute (Poland)

Optogenetics

**Andrzej Wróbel**, Nencki Institute of Experimental Biology (Poland)

Biomedical and DNA Computing, Bioinformatics

**Robert Nowak**, Warsaw University of Technology (Poland)

Computational Intelligence

**Janusz Sosnowski**, Warsaw University of Technology (Poland)

Reversible Logic

**Andrzej Skorupski**, Warsaw University of Technology (Poland)

WILGA Poster Sessions

**Waldemar Wójcik**, Lublin University of Technology (Poland)

WILGA 2017 Best Student Paper Awards

**Maciej Linczuk**, Warsaw University of Technology (Poland)

## Introduction

The **SPIE-IEEE-PSP WILGA** symposium [[wilga.ise.pw.edu.pl](http://wilga.ise.pw.edu.pl)], is a multi-conference event, a kind of international Forum of Young Science in Photonics, Advanced Electronics and Internet Engineering. It is organized twice a year under the eminent patronage of two big international engineering institutions SPIE [[www.spie.org](http://www.spie.org)] and IEEE [[www.ieee.org](http://www.ieee.org)] and their Polish Counterparts: PSP—Photonics Society of Poland [[www.photonics.pl](http://www.photonics.pl)], successor of the Polish Chapter of SPIE [[www.spie.pl](http://www.spie.pl)] and IEEE Poland Section [[www.ieee.pl](http://www.ieee.pl)], with participation of IEEE R8 [[ewh.ieee.org/reg/8/sac/cms](http://ewh.ieee.org/reg/8/sac/cms)]. The patrons of the symposium are: PAS—Polish Academy of Science (The Committee on Electronics and Telecommunication) [[keit.pan.pl](http://keit.pan.pl)], Association of Polish Electrical Engineers (SEP) [[www.sep.com.pl](http://www.sep.com.pl)], Polish Committee of Optoelectronics SEP [[pkopto.ise.pw.edu.pl](http://pkopto.ise.pw.edu.pl)], Warsaw University of Technology (WUT) [[www.pw.edu.pl](http://www.pw.edu.pl)], Faculty of Electronics and Information Technology [[www.elka.pw.edu.pl](http://www.elka.pw.edu.pl)], Institute of Electronic Systems [[www.ise.pw.edu.pl](http://www.ise.pw.edu.pl)].

**WILGA Organizers:** The Symposium is organized by a group of devoted young people—photonics, mechatronics and electronics researchers—gathered in the PERG/ELHEP Research Group of the Institute of Electronic Systems at the Faculty of Electronics and Information Technology of WUT. Most of these young researchers are active members of PSP, SEP, SPIE, OSA, and IEEE. The symposium is diligently run by young researchers for young fellow researchers, and the main aim is to have a lot of fun and to learn a lot.

**WILGA Publications:** WILGA Symposium publishes its papers in the following proceedings series, technical and peer-reviewed journals: Proceedings of SPIE, since 2002; IEEE eXplore, Internet publication data base; Photonics Letters of Poland, since 2009; Elektronika, SEP Journal, since 1998; IJET—International Journal of Electronics and Telecommunications, PAS [[ijet.pl](http://ijet.pl)].

**WILGA Proceedings of SPIE:** There has been a long tradition of WILGA publishing its works in the Proceedings of SPIE. This volume of Proc. SPIE is the 16th published with WILGA papers. All of the WILGA-SPIE volumes contain over 1,500 papers. All WILGA symposia have published more than 2,500 papers with over 5,000 participants. This is an extraordinary achievement for a modest symposium oriented solely on young researchers. No one event of similar character could compare to this achievement. This success was only possible due to big involvement of young researchers in their work. The following WILGA Proc. SPIE were published: Wilga 2002 – Proc. SPIE 5125; Wilga 2003 – Proc. SPIE 5484; Wilga 2004 – Proc. SPIE 5775; Wilga 2005 bis – Proc. SPIE 5948; Wilga 2005 – Proc. SPIE 6159; Wilga 2006 – Proc. SPIE 6347; Wilga 2007 – Proc. SPIE 6937; Wilga 2008 – Proc. SPIE 7124; Wilga 2009 – Proc. SPIE 7502; Wilga 2010 – Proc. SPIE 7745; WILGA 2011 – Proc. SPIE 8008; WILGA 2012 – Proc.

SPIE 8454, WILGA 2013 – Proc. SPIE 8903, WILGA 2014 – Proc. SPIE 9290; WILGA 2015 – Proc. SPIE 9662; WILGA 2016 – Proc. SPIE. 10031; WILGA 2017 – Proc. SPIE 10445.

**WILGA ways and topics:** The official language of the Symposium is English. Peer reviewed papers are published in a renowned, worldwide recognized series, Proceedings of SPIE. The Symposium is designed mainly for young researchers who just finished their Ph.D. degree, but also Ph.D., M.Sc., and B.Sc. students (from physics, photonics, electronics, electrical engineering and mechatronics, as well as material research) and their tutors/mentors. WILGA has a number of main topical tracks. Historically, the first one was Photonics and Web Engineering. Generally, WILGA embraces advanced photonic, mechatronic and electronic systems, in the following aspects: theory, modeling, algorithms, simulations, emulations, design, hardware, software, hardware-software interaction and integration, measurements, testing, commissioning and exploitation. WILGA also addresses new research tendencies like 3D photonics and electronics design, micro and nano-systems, material engineering including meta-materials. Topical sessions are organized by leading experts. Sessions usually begin with current tutorials and are filled with contributed papers by Ph.D. students and young researchers. One of the most important session tracks in WILGA are photonics applications and systems for superconductive accelerator (and free electron laser) technology and high energy physics experiments. We warmly invite students, young researchers, and their tutors to participate in WILGA.

**WILGA offspring:** The WILGA Symposium gave birth to a few topical meetings and conferences which then struck out on their own. These include student and young researcher regional meetings (Opole, Wrocław, Kielce, Białystok, Lublin, Toruń, Kraków and others), of SPIE student chapters, IEEE student branches, OSA student chapters, but also stand-alone conferences. Some of these meetings are still held periodically with Wilga, while some of them gained complete independence. WILGA is very proud of this sort of parenthood, since the very good idea of WILGA is proliferating elsewhere. One of such meetings is, now fully nondependent, SPS—Signal Processing Symposium which started at Wilga in 2003. Another meeting which originated from Wilga is Photoacoustics which began as a nondependent session.

**WILGA 1998–2001:** Early Wilga Symposia usually gathered around 100 young researchers each. The proceedings were published in Elektronika Journal of SEP, and on CD discs. Some of the reports from these meetings are available on Wilga webpage [[wilga.ise.pw.edu.pl](http://wilga.ise.pw.edu.pl)].

**WILGA 2002:** This was the tenth WILGA Symposium. Over 150 participants attended. This was the first time the proceedings were published SPIE (Proc. SPIE vol. 5125). Fifty-five papers were published under the following topical sessions: Optical Fibers, Links, and Networks I: Fundamentals of Optical Networking; Optical Fibers, Links, and Networks II: Technologies, Measurements, and Components; Electronic and Photonic Systems for High-Energy Physics (HEP) Experiments I: Subsystem Design;

Electronic and Photonic Systems for High-Energy Physics Experiments (HEP) II: Numerical Calculations and Technical Solutions; Optical Fibers, Waveguides, and Communication Channel Theory; Optical Fiber Sensors and Optoelectronics: Industrial Applications; Lighting Technology; Materials Science and Optoelectronic Technologies; Photonics for Astronomy; Biomedical Applications of Electronics and Photonics; Software for Optical Networks and the Internet; Digital Holography, and 3D Object Measurements, and Recognition. WILGA 2002 was reported in the IEEE Region 8 News, August 2002 edition.

**WILGA 2003:** The number of participants exceeded 200 persons for the first time. Proc. SPIE vol. 5484 was published containing 95 papers. The topical sessions were: Optical Communications, Optical Computing, and Control Theory; Tesla: Superconducting Linac and Free Electron X-Ray Laser; Advanced Electronic and Photonic Systems for the BAC/ZEUS Detector at the Hera Accelerator; Advanced Electronic and Photonic Systems for the CMS Detector at the LHC Accelerator; Advanced Electronic and Photonic Systems for Astronomy; Materials Science and Materials for Optoelectronics; Optical Fibers; Optical Fiber Lasers; Advanced Optoelectronic and Optical Fiber Sensors; Diffraction, Holography, Interferometry, and Image Processing; Optoelectronic Components: Photodiodes and LEDs; Optical Fiber Lighting Technology; Optical Broadband Internet Technologies and Techniques; and DSP and Radar Imaging. Wilga 2003 was reported in IEEE Region 8 News, November 2003 issue.

**WILGA 2004:** The number of participants was close to 300. An official agreement of cooperation was signed during Wilga 2004 between the Polish Chapters of SPIE and IEEE. Ninety-two papers were published in SPIE vol. 5775. The sessions were: RF Control System for Tesla and European Superconducting X-ray Free Electron Lasers; Radiation Hardening of Photonics and Electronics for Accelerator/Detector Technologies; Electronic and Photonic Systems for Accelerator/Detector Technology and Astronomy; Optical Communications; Fiber Bragg Gratings and Photonic Crystal Structures; Optoelectronic Materials and Technologies; Digital Holography, Interferometry, and Image Processing; Flame Photometry and Combustion Process Control; FPGA and VHDL; Calculation and Measurement Techniques in Optoelectronics and Electronics; Telemetric Networks for Municipal Systems; Optical and Broadband Internet Technologies and Techniques

**WILGA 2005 and SPIE Poland 2005 Congress on Optics and Optoelectronics:** The SPIE Poland meetings in 2005 were very special because then the Polish Chapter of SPIE (predecessor of Photonics Society of Poland) hosted together with SPIE and some other regional SPIE Chapters, the SPIE Warsaw Congress on Optics and Optoelectronics – SPIE COO Warsaw 2005. The WILGA 2005 Symposium was split to two parts: one was held in Wilga, and the second jointly with the COO'05 at Warsaw University of Technology. Two separate proceedings volumes were published, SPIE Proc. 5948 and 6159. SPIE COO Warsaw 2005 hosted nearly 800 participants. The two Wilga volumes gathered together over 250 papers.

**WILGA 2006:** The number of participants stabilized at around 300 persons. Proc. SPIE vol. 6347 was published containing 111 peer reviewed papers. Several sessions were organized devoted to trial defenses of Ph.D. and M.Sc. theses, mainly in photonics and electronics. The sessions included: Free electron laser instrumentation; HEP instrumentation and measurements; International linear Collider, Software and hardware aspects of photonics; Hardware and software co-design; Experiments in space research, astronomy, and astroparticle physics; Bragg gratings and nonlinear optical fibers; Capillary and ring core optical fibers; Materials for optical fiber technology; Photoacoustics; Optoelectronic equipment; Optical fiber sensors and lighting technology; Optical interconnections, packaging, soldering, and RFID technology; Biometrics; Biomedical applications of photonics and electronics; HF circuits; Simulation and control theory; Virtual laboratories and optical Internet technology; and Intelligent computing in optoelectronics.

**WILGA 2007:** This was the 20th WILGA Symposium. Proc. SPIE 6937 was published containing 152 papers. Nearly 250 presentations filled over 20 topical sessions. The aggregated participation was again around 300 persons. Wilga 2007 was again reported in the IEEE Region 8 News, December 2007 issue. The sessions were on topics such as: Apparatus for optical and gamma-ray astrophysical observations; Flash laser and European x-ray laser development; Superconductive accelerator technology for free electron laser and high energy photon physics; Photoacoustics and ultrashort pulse technology; Optical fiber technology and measurements; Optical fiber applications; Nanomaterials and material research for photonics and electronics; Optical and quantum cryptography; Medical x-ray accelerators and biomedical applications; Warmer program sensory networks for water management/preservation and environment protection; Image processing; Passive and active radar imaging; Signal processing; Radar technology, Optical and radiofrequency technology; Optical measurements; and Algorithms for data processing.

**WILGA 2008:** WILGA 2008 gathered over 200 participants and the proceedings volume (SPIE vol. 7124) contained 35 papers. The introduction to this volume contains a report on the establishment of the Polish Photonics Society, which evolved from the local SPIE Chapter in Poland. PSP immediately opened its publishing body which is Photonics Letters of Poland. The sessions included: Photonic materials research; Liquid crystal and Bragg optical fibers; Photonic micro-components; Apparatus for optical and gamma ray astrophysical observations; Photonic equipment for high energy physics experiments and accelerator technology; Optimal learning systems for photonics and medicine; Warmer project: sensory networks for water management/preservation and environment protection; Broadband pulse technology; and Photonic broadband networks.

**WILGA 2009:** Proc. SPIE vol. 7502 was published containing 100 papers. There were around 200 presentations, and over 300 participants in two parts, optical and

radar. The sessions included: Image processing, Optical biometry; Optical astronomy and space technology; Radar technology; Navigation and target tracking; Signal filters and DSP; Signal modulation, transmission and detection; Laser materials, optical fibers and optoelectronics; Sensors, remote sensing, and measuring networks; Genetics databases and biomedical applications.

**WILGA 2010:** Proc. SPIE vol. 7745 contained 73 papers. The symposium gathered around 300 participants in two parts, optical and radar. Over 200 presentations filled 25 topical sessions. The sessions included: Development of photonics and electronics in Europe and Poland; Photonics applications in astronomy and space technology; Optoelectronics and optical fiber technology; Photonics and IT applications in biology and medicine; Acoustic signal processing; Optoelectronics and electronic, image processing, material nanotechnology; Multiprocessor co-integration platforms. The volume features a series of program articles on development of electronics and telecommunications in Poland.

**WILGA 2011:** Proc. SPIE vol. 8008 contained 71 papers. There were over 250 participants and over 200 presentations. Wilga 2011 featured SPIE-PSP award for the best student paper presentation. The sessions included: Development of photonics and electronics in Europe and Poland; knowledge representation; Advanced photonics and electronics systems: hardware aspects; Advanced photonics and electronics systems: software aspects; Applications of photonics in astronomy; Communications technologies; Multimedia technologies; Advanced biomedical systems; Radar technologies; Materials for photonics and optoelectronics, optical fibers.

**WILGA XXXth Jubilee Symposium:** WILGA 2012, January Edition was held on 26-29 January 2012 at WUT's FE&IT. The WILGA 2012 May edition was held on 28 May–2 June 2012 in a resort owned by Warsaw University of Technology. Over 300 presentations were given during both editions of Wilga, covering a broad area of photonics applications and web engineering. Nearly 350 persons participated. Proc. SPIE 8454 contained 85 papers. The sessions were: Photonics overview for XXX Wilga Symposium, Pi-of-the-sky: a network of astronomical telescopes; Satellite and space technology; High energy physics experiments; Communications and multimedia technology; Optoelectronic technologies, components, devices and systems; Materials and technologies; Components and systems modelling; Biomedical and DNA computing; Airborne applications of computational intelligence; Artificial intelligence, cryptography, software and ontological ICT systems.

**WILGA 2013:** Proc. SPIE 8903 was published and contained 100 papers. The working research sessions of 32nd WILGA 2013 were: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER photomasks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object

oriented design of hardware, terabit optical data links, software-hardware co-design, biomedical engineering, computational intelligence of advanced systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD—European Coordination of Accelerator Research and Development, and TIARA, etc. A special session was devoted to a project EuCARD<sup>2</sup> (2013–2017), which is a continuation of EuCARD.

**WILGA 2014:** Proc. SPIE 9290 was published containing 125 papers. The Wilga 2014 Symposium was held during the last week of May 2014. The working research sessions of the 34th WILGA 2014 symposium were held traditionally as in previous years: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER tokomaks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object oriented design of hardware, terabit optical data links, software-hardware codesign, biomedical engineering, computational intelligence of advanced systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD2 – Enhanced European Coordination of Accelerator Research and Development, TIARA, EuroFusion Project, etc.

**WILGA 2015:** Proc. SPIE 9662 was published containing 169 papers. The Symposium was held during the last whole week of May 2015, plus during two adjacent weekends. The working research Sessions of 36th WILGA were traditionally as in previous years: general photonics, optical fiber technology, optical communications, optoelectronics, applications of optical fibers, integration of electronics, photonics and mechatronics, distributed measurement systems, LHC and CMS at CERN, JET and ITER tokomaks, optics and optoelectronics for astronomy, fundamentals of FPGA-DSP systems, object oriented design of hardware, terabit optical data links, software-hardware co-design, biomedical engineering, computational intelligence of advanced systems, development of photonics and electronics in Europe and Poland, radar technology, terahertz photonics, free electron lasers, E-XFEL and POLFEL lasers, EuCARD2 – Enhanced European Coordination of Accelerator Research and Development, TIARA, EuroFusion Project, etc.

**WILGA 2016:** The 38th Edition of Wilga Symposium was held on 29 May–6 June. It gathered more than 350 participants from Poland and Europe. Over 250 papers were presented orally and around 50 posters. Proc. SPIE volume 10031 contains 194 papers. The 2013–2016 Wilga Symposia were under friendly research patronage of the EuCARD2 EC Program on accelerator technology. The following topical sessions were organized: material engineering, photonics, sensors and measurements, biomedical applications, research experiments, and high performance computing.

**XL SPIE – PSP WILGA 2017:** Proc. SPIE 10445 volume contains 238 papers. WILGA 2017, the 40th Symposium Jubilee Edition, was held on 28 May–5 June 2016 and gathered a record number of nearly 400 participants. WILGA 2017 and hopefully the next Wilga meeting will cooperate with the ARIES EC H2020 Project on Accelerator Research and Innovation for European Science and Society. The Symposium featured the following sessions: Photonics applications; Computational intelligence; Biomedical applications; Astronomy, plasma, and high energy physics; Material engineering; and Advanced applications.

**WILGA 2018:** The WILGA 2018 summer meeting on Photonics Applications will be held on 28 May–3 June 2018. The organizers invite interested young researchers and students in photonics and related fields to participate in this exceptional and very friendly research event oriented toward young researchers from Poland and all over Europe.
