

## Contents

- 1    **Review of fiber optics technology for military applications**  
P. B. Ruffin, U.S. Army Aviation and Missile Command
- 25    **Dispersive and resonant properties of finite one-dimensional photonic band gap structures**  
C. M. Bowden, U.S. Army Aviation and Missile Command; M. Scalora, U.S. Army Aviation and Missile Command (USA) and Time Domain Corp. (USA);  
M. J. Bloemer, U.S. Army Aviation and Missile Command; C. Sibilia, Univ. degli Studi di Roma La Sapienza (Italy); G. D'Aguanno, M. Centini, U.S. Army Aviation and Missile Command and Univ. degli Studi di Roma La Sapienza (Italy);  
M. Bertolotti, Univ. degli Studi di Roma La Sapienza (Italy)
- 87    **Stepwise two-photon excitation studies in fibers and crystals for energy upconversion and infrared quantum counter devices**  
B. R. Reddy, Alabama A&M Univ. (USA)
- 115    **Nonlinear optical properties and applications of polydiacetylene**  
H. A. Abdeldayem, M. S. Paley, NASA Marshall Space Flight Ctr. (USA)  
and Universities Space Research Association (USA); W. K. Witherow,  
D. O. Frazier, NASA Marshall Space Flight Ctr. (USA)
- 135    **Growth and optical characterization of PTS polymer single crystals**  
M. Liu, F. Yoshino, S. Polyakov, G. I. Stegeman, CREOL/Univ. of Central Florida (USA)
- 147    **Light emission from silicon quantum dots**  
H. W. H. Lee, Lawrence Livermore National Lab. (USA); P. A. Thielen, Univ. of California/Davis (USA); G. R. Delgado, Lawrence Livermore National Lab. (USA); S. M. Kauzlarich, C.-S. Yang, Univ. of California/Davis (USA);  
B. R. Taylor, Lawrence Livermore National Lab. (USA)
