Proceedings of SPIE 0277-786X, V. 10375

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Current Developments in Lens Design and Optical Engineering XVIII, edited by R. Barry Johnson,
Virendra N. Mahajan, Simon Thibault, Proc. of SPIE Vol. 10375, 1037501
© 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2296016

Proc. of SPIE Vol. 10375 1037501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Authors*
- ix *Conference Committee*
- xi *Introduction*

SESSION 1 LENS DESIGN METHODOLOGY I

- 10375 02 **New tools for the design of freeform mirrors** [10375-1]
- 10375 03 **Design of light guide sleeve on hyperspectral imaging system for skin diagnosis** [10375-2]
- 10375 05 **Achieving linearity with an optical quadrant detector tracking system** [10375-4]

SESSION 2 MATERIALS AND COATINGS

- 10375 06 **Multi-band filter design with less total film thickness for short-wave infrared** [10375-5]
- 10375 08 **Introducing the quantum efficiency of fluorescence of SCHOTT optical glasses** [10375-7]
- 10375 09 **Cryogenic refractive index of Heraeus homosil glass** [10375-8]

SESSION 3 ANALYSIS AND APPLICATIONS

- 10375 0A **Wavefront analysis from its slope data** [10375-43]
- 10375 0B **Parametric diffraction efficiency of non-paraxial sinusoidal reflection gratings** [10375-44]
- 10375 0C **Camera System MTF: combining optic with detector** [10375-9]
- 10375 0D **Diffraction and geometrical optical transfer functions: calculation time comparison** [10375-10]
- 10375 0F **Linear decomposition of the optical transfer function for annular pupils** [10375-12]
- 10375 0G **Assembly of a micro-optical resonator based on silicon micro mirrors for use in gyroscopes** [10375-13]

SESSION 4 OPTICAL FABRICATION AND TUNABLE OPTICS

- 10375 0H **Fabrication of multi-focal microlens array on curved surface for wide-angle camera module** [10375-14]
- 10375 0I **The effect of optical system design for laser micro-hole drilling process** [10375-15]
- 10375 0K **Zoom system without moving element by using two liquid crystal lenses with spherical electrode** [10375-17]
- 10375 0L **Tunable refraction power by mutual rotation of helical lens parts** [10375-18]

SESSION 5 SOLID STATE SMART LIGHTING

- 10375 0M **Optical modeling of bullet-shaped LED for use in self-luminous traffic signs** [10375-19]
- 10375 0N **Visual ergonomic evaluations on four different designs of LED traffic signs** [10375-20]
- 10375 0O **Smart lighting using a liquid crystal modulator** [10375-21]
- 10375 0Q **Combining the transformation and the integration methods to design a refractive lens-array for signal lighting applications** [10375-23]

SESSION 6 LENS DESIGN METHODOLOGY II

- 10375 0R **Development of the infrared instrument for gas detection** [10375-24]
- 10375 0S **Optical design of an athermalised dual field of view step zoom optical system in MWIR** [10375-25]
- 10375 0T **Contact lens design with slope-constrained Q-type aspheres for myopia correction** [10375-26]

POSTER SESSION

- 10375 0U **A lazy way to design infrared lens** [10375-27]
- 10375 0V **Design of two-dimensional (crossed) grating calculation in Czerny-Turner spectrometer with usage of freeform mirrors** [10375-28]
- 10375 0W **Design of off-axial Gregory telescope design with freeform mirror corrector** [10375-29]
- 10375 0Y **Optimization of wavefront coding imaging system using heuristic algorithms** [10375-31]
- 10375 0Z **Optical schemes for compact space objectives** [10375-32]
- 10375 10 **Infrared simulation and performance validation of pinhole and 4-bar collimator targets for static performance evaluation of thermal imaging systems** [10375-33]

- 10375 11 **Mask in thickness uniformity for three coating materials** [10375-34]
- 10375 12 **Using a two-lens afocal compensator for thermal defocus correction of catadioptric system** [10375-35]
- 10375 13 **The improved optical setup for Abbe-Porter experiment** [10375-36]
- 10375 14 **Development of surgical binoculars on the basis of polymeric lenses** [10375-37]
- 10375 15 **Optical spherometer for measuring large curvature radii of convex surfaces** [10375-38]
- 10375 17 **Ray tracing for inhomogeneous media applied to the human eye** [10375-40]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

- 6 Lens Design Methodology II
Robert M. Bunch, Rose-Hulman Institute of Technology (United States)

Introduction

We accepted forty-four papers, including sixteen posters, and organized them into six sessions. We had two sessions on Lens Design Methodology, and one each on Materials and Coatings, Analysis and Applications, Optical Fabrication and Tunable Optics, and Solid State Smart Lighting. Taiwan contributed the most papers (12), followed by USA (9), the Russian Federation (6), Mexico (6), Germany (4), Canada (2), Turkey (2), and one each from China, Korea, and Ukraine. Two of the USA papers have coauthors from Spain. Similarly, two of the Russian papers have coauthors from Singapore, and one from Taiwan has a coauthor from South Africa. All of the papers from Mexico were Posters. The Proceedings consists of 35 papers. The missing nine papers include four posters, three of which are from Mexico. One invited paper was preplanned to be completed later for publication in Optical Engineering, one presenter had visa problem, another had publication conflicts, and the others were no-shows. Lack of travel funding contributed to some of the no-shows.
