PROCEEDINGS OF SPIE

Anomaly Detection and Imaging with X-Rays (ADIX) IV

Amit Ashok
Joel A. Greenberg
Michael E. Gehm
Editors

15–16 April 2019
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 10999

Proceedings of SPIE 0277-786X, V. 10999

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Anomaly Detection and Imaging with X-Rays (ADIX) IV, edited by Amit Ashok,
Joel A. Greenberg, Michael E. Gehm, Proceedings of SPIE Vol. 10999, 1099901
© 2019 SPIE · CCC code: 0277-786X/19/$18 · doi: 10.1117/12.2538102

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SYSTEM DESIGN AND ANALYSIS I

10999 02 **Simulation-based x-ray system design and analysis: past, present, and future (Invited Paper)** [10999-1]

10999 03 **Effective atomic number and electron density determination using spectral x-ray CT (Invited Paper)** [10999-2]

10999 06 **Modeling real-world system geometry and detector response within a high-throughput x-ray simulation framework** [10999-5]

DIFFRACTION AND PHASE CONTRAST I

10999 08 **Motivations and methods for the analysis of multi-modality x-ray systems for explosives detection** [10999-7]

10999 09 **Coding versus collimation in pencil-beam X-ray diffraction tomography** [10999-8]

MACHINE LEARNING ALGORITHMS

10999 0A **Adaptation of self-tuning spectral clustering and CNN texture model for detection of threats in volumetric CT images (Invited Paper)** [10999-9]

10999 0D **Emergence and distinction of classes in XRD data via machine learning** [10999-12]

SYSTEM DESIGN AND ANALYSIS II

10999 0J **X-ray measurement model and information-theoretic metric incorporating material variability with energy correlations** [10999-18]

10999 0L **High-speed 300kev flash x-ray cinematography for investigations of the ballistic impact behavior of target materials and structures** [10999-20]

ALGORITHMS

10999 0M **Lessons learned: data mining and aviation explosives detection systems (Invited Paper)** [10999-21]

10999 0N **Hierarchical reconstruction of x-ray phase tomography based on transferred non-local structural features** [10999-22]

10999 0O **An algorithm to improve the accuracy of search boundaries for objects obtained in the x-ray** [10999-23]

10999 0P **Automated firearms detection in cargo x-ray images using RetinaNet** [10999-24]

10999 0Q **Medical image segmentation by combing the local, global enhancement, and active contour model** [10999-25]

DIFFRACTION AND PHASE CONTRAST II

10999 0S **Optimization of hardware and image processing for improved image quality in x-ray phase contrast imaging** [10999-27]

10999 0U **Combining spatially and energy-resolved CdZnTe detectors with multiplexed collimations to improve performance of x-ray diffraction systems for baggage scanning** [10999-29]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jay Kumler, JENOPTIK Optical Systems, LLC (United States)
Ruth L. Moser, Air Force Research Laboratory (United States)

Symposium Chair

John M. Pellegrino, Georgia Institute of Technology (United States)

Conference Chairs

Amit Ashok, College of Optical Sciences, The University of Arizona (United States)
Joel A. Greenberg, Duke University (United States)
Michael E. Gehm, Duke University (United States)

Conference Program Committee

Mark A. Anastasio, Washington University in St. Louis (United States)
Ali Bilgin, The University of Arizona (United States)
Eric W. Clarkson, The University of Arizona (United States)
Mini Das, University of Houston (United States)
Edward D. Franco, Rapiscan Systems Laboratories (United States)
Christopher W. Gregory, Smiths Detection Inc. (United States)
Tim E. Harvey, EMF Corporation (United States)
Harry E. Martz, Lawrence Livermore National Laboratory (United States)
Joseph A. O'Sullivan, Washington University in St. Louis (United States)
Sean Pang, CREOL, The College of Optics and Photonics, University of Central Florida (United States)
Lei Tian, University of California, Berkeley (United States)
Laura Waller, University of California, Berkeley (United States)
Sharene Young, U.S. Dept. of Homeland Security (United States)

Session Chairs

1 System Design and Analysis I
Amit Ashok, College of Optical Sciences, The University of Arizona (United States)

2 Diffraction and Phase Contrast I
Michael E. Gehm, Duke University (United States)

3 Machine Learning Algorithms
Amit Ashok, College of Optical Sciences, The University of Arizona (United States)

4 Detectors
Joel A. Greenberg, Duke University (United States)

5 System Design and Analysis II
Michael E. Gehm, Duke University (United States)

6 Algorithms
Amit Ashok, College of Optical Sciences, The University of Arizona (United States)

7 Diffraction and Phase Contrast II
Joel A. Greenberg, Duke University (United States)
