**Volume 11422**

Proceedings of SPIE 0277-786X, V. 11422

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Sensors and Systems for Space Applications XIII, edited by Genshe Chen, Khanh D. Pham, Proc. of SPIE  
Vol. 11422, 1142201 · © 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2572678

Proc. of SPIE Vol. 11422 1142201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensors and Systems for Space Applications XIII*, edited by Genshe Chen, Khanh D. Pham, Proceedings of SPIE Vol. 11422 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

**SESSION 1      SPACE PAYLOADS AND ELECTRONICS**

---

- 11422 03      Time delay integration using COTS IT-CCD for remote sensing and other applications [11422-3]
- 11422 04      Calibration of the compact mid-wave imaging system (CMIS), a candidate for low-cost, low SWaP instrument for weather satellites [11422-4]
- 11422 05      Radiation-hard parallel readout circuit for low-frequency voltage signal measurements [11422-5]

---

**SESSION 2      SPACE COMMUNICATION AND NETWORK**

---

- 11422 06      Scalable free space optical transceiver [11422-6]
- 11422 09      Throughput modeling and analysis for TCP over TCP satellite communications [11422-9]
- 11422 0A      Performance enhancement with transportation layer tunneling for satellite communication systems [11422-10]

---

**SESSION 3      SPACE SITUATIONAL AWARENESS AND SPACE CONTROL**

---

- 11422 0B      Estimation of thruster plumes for resident space object optical observation [11422-11]
- 11422 0C      Uncertainty analysis for characterization small GEO belt debris population [11422-12]
- 11422 0D      Remote detection of arcing on geosynchronous satellites [11422-13]
- 11422 0E      Simulation of resident space objects detection from space-based optical imaging [11422-14]
- 11422 0F      Enhanced GANs for satellite behavior discovery [11422-15]
- 11422 0G      Stochastic inventory control modelling for large satellite constellations [11422-16]

---

**SESSION 4      ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING**

---

- 11422 0I      HODET: Hybrid object detection and tracking using mmWave radar and visual sensors [11422-18]

- 11422 OJ      **Hybrid blockchain-enabled secure microservices fabric for decentralized multi-domain avionics systems [11422-19]**
- 11422 OK      **Enabling continuous operations for UAVs with an autonomous service network infrastructure [11422-25]**

---

**SESSION 5      DECISION SUPPORT FRAMEWORK AND TOOLS FOR SUPPORTING FUTURE SPACE SYSTEMS DEVELOPMENT AND ACQUISITION**

---

- 11422 OL      **Innovative flexible, robust and agile digital engineering platform development for supporting future space systems acquisition [11422-20]**
- 11422 OM      **Systems-of-systems enterprise architecture CONOPS assessment approach and preliminary results [11422-21]**
- 11422 OP      **Multi-criteria decision theory for enterprise architecture risk assessment: theory, modeling and results [11422-24]**

---

**POSTER SESSION**

---

- 11422 OQ      **Hardening a notional missile warning satellite telescope against jamming and damage by ground, airborne, and space-based lasers [11422-27]**
