**Volume 11515**

Proceedings of SPIE 0277-786X, V. 11515

International Workshop on Advanced Imaging Technology (IWAIT) 2020, edited by Phooi Yee Lau, Mohammad Shobri, Proc. of SPIE Vol. 11515, 1151501 · © 2020 SPIE
CCC code: 0277-786X/20/$21 · doi: 10.1117/12.2574152

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Workshop on Advanced Imaging Technology (IWAIT) 2020*, edited by Phooi Yee Lau, Mohammad Shobri, Proceedings of SPIE Vol. 11515 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510638358

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

**BEST PAPER SESSION I**

11515 02 **Human performance of face recognition inferred from characteristics of observing eye movement patterns learned by hidden Markov model** [11515-85]

11515 03 **GAN-based single-image reflectance removal using depth of field guidance** [11515-119]

11515 04 **Handwriting feature extraction method for writer verification independent of character type by using AdaBN and AdaIN** [11515-122]

11515 05 **Automated classification method of lung tumor type using cytological image and clinical record** [11515-90]

11515 06 **Elastic net with adaptive weight for image denoising** [11515-94]

11515 07 **Deep neural network for joint light field deblurring and super-resolution** [11515-95]

11515 08 **Effective binarization for historically degraded as-built drawing maps using convolutional neural networks** [11515-116]

**IMAGE PROCESSING I**

11515 09 **Sub-window median-like filter in constant time** [11515-14]

11515 0A **A method of automatic cage generation by variational remeshing method** [11515-89]

11515 0B **Noise reduction in direct multi-material decomposition for dual-energy CT** [11515-28]

11515 0C **An approach to metric rectification using sequential estimation of spatial adjacent planes appeared in single view image** [11515-47]

11515 0D **Texture reconstruction based on underlying pattern modification that reflects user's intention** [11515-67]

11515 0E **Temporal and contextual aggregation for road marking semantic segmentation** [11515-64]

**ANIMATION AND VIRTUAL REALITY I**

11515 0F **Automatic classification of manga characters using density-based clustering** [11515-57]

11515 0G **Articulation awareness with a 3D tongue using a VR system** [11515-58]

11515 0H **Development of an interface simulating swimming motion for virtual space walk-through** [11515-98]

11515 0I **A study of AR advertising to estimate the volume of invisible contents in a packaged product** [11515-96]

11515 0J **An MR-based visualization system of IoT security** [11515-86]

11515 0K **A tuna dismantling education system in virtual reality** [11515-25]

**ARTIFICIAL INTELLIGENCE AND INTERDISCIPLINARY RESEARCH I**

11515 0L **Visual analysis of fish feeding intensity for smart feeding in aquaculture using deep learning** [11515-69]

11515 0M **Fast and effective element-aware domain enhancement and adaptation for semantic segmentation** [11515-110]

11515 0N **Radiomic feature-based prediction model of lung cancer recurrence in NSCLC patients** [11515-33]

11515 0O **Super-resolution image generation for improvement of orbital thin bone segmentation** [11515-16]

11515 0P **Identifying blurry car license number plate using machine learning** [11515-55]

**BEST PAPER SESSION II**

11515 0Q **Fast total-variation-based JPEG artifact removal via the accelerated ADMM** [11515-84]

11515 0R **Transform selection for video coding** [11515-93]

11515 0S **Automated detection of fundic gland polyps and hyperplastic polyps from endoscopic images using SSD** [11515-24]

11515 0T **Robotic motion generation for realization of the target task using function and poses of objects** [11515-65]

11515 0U **Accuracy enhancement in intra- and inter-frame example search for lossless video coding** [11515-105]

11515 0V **Comparison of data costs for depth estimation from compressed light field images** [11515-108]

11515 0W **Lossless coding of HDR color images in a floating point format using block-adaptive prediction with exponent equalization** [11515-106]

11515 0X **A hybrid nonlinear and linear approach for content-aware image downscaling** [11515-113]

11515 0Y **Two-stream deep learning architecture for action recognition by using extremely low-resolution infrared thermopile arrays** [11515-23]

11515 0Z **A method for rendering wavelength-dependent phenomena using spectral image-based lighting** [11515-30]

**BEST PAPER SESSION III**

11515 10 **Detecting image frames which contain a moving object from a severely distorted video stream using dynamic mode decomposition** [11515-54]

11515 11 **Environment understanding during walking via modality conversion from visual to haptic information: localization experiment with vibro-stimuli simulated by optical flow** [11515-82]

11515 12 **Electromagnetic guitar: chord playing support system on guitar by electromagnets** [11515-20]

11515 13 **Improvement of accuracy of wide-surrounded multi-projection in indoor space** [11515-62]

11515 14 **Moving obstacle tracking and estimation on crosswalk for blind people navigation system** [11515-50]

11515 15 **Privacy-preserving machine learning using EtC images** [11515-17]

11515 16 **Integrated and scalable augmented reality multiplayer robotic platform** [11515-9]

11515 17 **Indonesian culture recognition portal based on crowd sourcing contents** [11515-52]

**OPTIMIZATION**

11515 18 **Examination of group head angle acceleration analysis method for learning evaluation in outdoor education** [11515-46]

11515 19 **Pitching form evaluation based on elbow position by a monocular camera** [11515-104]

11515 1A **Performance analysis on prediction structure for multi-view-based light field video coding** [11515-76]

11515 1B **Acquisition of wiping area using SLAM for visualization of cleaning area** [11515-100]

11515 1C **Evaluation for hybrid location estimation system of image retrieval and SLAM** [11515-6]

11515 1D **HEVC intra prediction mode classification by deep learning** [11515-15]

## MULTIMEDIA AND SYSTEMS

11515 1E **An estimation method of the camera fluctuation for a video-based vibration measurement** [11515-22]

11515 1F **Surface segmentation on 3D point cloud of unbroken earthenware and its applications** [11515-115]

11515 1G **Background subtraction via exact solution of Bayesian L1-norm tensor decomposition** [11515-7]

11515 1H **Generating 3D model of furniture from 3D point cloud of room** [11515-112]

11515 1I **A selective fusion module for video super resolution with recurrent architecture** [11515-2]

## IMAGE PROCESSING II

11515 1J **A method of finding characteristic ocean-satellite-image groups using autoencoder** [11515-27]

11515 1K **Extraction of distinctive keywords and articles from untranscribed historical newspaper images** [11515-49]

11515 1L **Head orientation detection with small camera in outdoor education using background images** [11515-19]

11515 1M **Control method of pseudo-force intensity by voltage change using software signal** [11515-41]

## COMPUTER GRAPHICS AND 3D

11515 1N **A study on 3D modeling from handwritten maps for VR environment construction of historical town** [11515-111]

11515 1O **An examination on shape feature extraction based on the elliptic approximation for spatial arrangement of earthenware pieces by using 3D measured point clouds** [11515-114]

11515 1P **Speckle-based pose estimation for 3D measurement of the featureless environment by two cameras** [11515-71]

11515 1Q **Tree growth model for simulation of appearance change** [11515-118]

11515 1R **Avatar's facial expression with "Manpu (Comic Symbols)" by using multiple biometric information** [11515-121]

## ARTIFICIAL INTELLIGENCE AND INTERDISCIPLINARY RESEARCH II

11515 1S **An investigation of machine learning methods for prediction bus travel time of Mongolian public transportation** [11515-56]

11515 1T **Bayes code for two-dimensional auto-regressive hidden Markov model and its application to lossless image compression** [11515-81]

11515 1U **CNN-based super-resolution adapted to quantization parameters** [11515-72]

11515 1V **A study on liver tumor detection from an ultrasound image using deep learning** [11515-74]

11515 1W **Robotic path planning using evolutionary neural network** [11515-78]

## MULTIMEDIA APPLICATIONS

11515 1X **Extrinsic parameters calibration of multiple fisheye cameras in Manhattan worlds** [11515-44]

11515 1Y **Measurement of abdominal shape by sampling moire method and extension to video processing** [11515-68]

11515 1Z **A picking interface seamlessly connecting passive and active performance on guitar** [11515-21]

11515 20 **CSSNet: image-based clothing style switch** [11515-102]

11515 21 **Semantic scene modeling for aquaculture management using an autonomous drone** [11515-18]

## ANIMATION AND VIRTUAL REALITY II

11515 22 **Diminished reality in textureless scenes** [11515-13]

11515 23 **Assessing viewer satisfaction of CG programs as a substitute for real TV programs** [11515-8]

11515 24 **A VR-based support system of self-learning microscope operation** [11515-70]

11515 25 **AR-based self-learning system of Japanese calligraphy skills** [11515-91]

11515 26 **Blocking gamelan instruments frequency in virtual reality** [11515-80]

## SPECIAL SESSION: MEDICAL IMAGING II

11515 27 **Medical image fusion via discrete wavelet transform and fuzzy radial basis function neural network** [11515-45]

11515 28 **Automatic meniscus segmentation using cascaded deep convolutional neural networks with 2D conditional random fields in knee MR images** [11515-32]

11515 29 **A web-based computer aided diagnosis system on liver disease** [11515-29]

## POSTER SESSION

11515 2A **Photo spot recommendation for theme park visitors using collage images** [11515-38]

11515 2B **System for searching illustrations of anime characters focusing on degrees of character attributes** [11515-37]

11515 2C **Wappen: annotation system using scene matching with multiple terminals** [11515-36]

11515 2D **Warping-based motion compensation for triangular patches** [11515-88]

11515 2E **A study on thermal image generation based on deep learning and abnormal temperature detection** [11515-75]

11515 2F **A method for enhancing playground equipment experience using VR technology with smartphone** [11515-99]

11515 2G **Detection and motion analysis of knee joints in three-dimensional point cloud data measured using a depth camera** [11515-87]

11515 2H **Efficient bin allocation for chroma intra mode coding** [11515-123]

11515 2I **Proposal of a rescue operation support system based on 3D reconstruction, GPS, and digital pen** [11515-97]

11515 2J **Pose estimation of excavators** [11515-31]

11515 2K **Operator overloading for cv::UMat converted to equivalent function calls at compile time** [11515-79]

11515 2L **PSF optimization for motion deblurring using temporally coded light** [11515-109]

11515 2M **Speckle noise reduction technique for SAR images using SRAD and gradient domain guided image filtering** [11515-10]

11515 2N **Video search for ambiguous requests** [11515-51]

11515 2O **Hybrid imaging technique of half ROI and full view scan for dose reduction** [11515-34]

11515 2P **An approach to the multiplex reconstructing process for spatially multiplex projected holographic colored images using blue-violet laser light** [11515-40]

11515 2Q **Depth estimation with tilted optics by multi-aperture using color filter** [11515-35]

11515 2R **Method for recognizing objects of unknown size using surface primitives** [11515-66]

11515 2S **Haze removal in outdoor images** [11515-53]

11515 2T **Self-supervised depth completion with attention-based loss** [11515-5]

11515 2U **Recognition of Japanese connected cursive characters using multiple candidate regions** [11515-26]

11515 2V **A simple refinement for depth information predicted with DNN** [11515-48]

11515 2W **Halide implementation of weighted median filter** [11515-42]

11515 2X **Deep skip connection and multi-deconvolution network for single image super-resolution** [11515-120]

11515 2Y **Enhanced Combined Inter-Intra Prediction (CIIP) in versatile video coding** [11515-83]

11515 2Z **Development of a database of radar-shadow cast by a SAR satellite using high resolution DEM data** [11515-11]

11515 30 **Camera: LiDAR calibration using ICP-based automatic plane extraction method** [11515-77]

11515 31 **Multi-frame interpolation of Bayer images using optical flow** [11515-73]

11515 32 **Halide and OpenMP for generating high-performance recursive filters** [11515-43]

11515 33 **Deep residual convolutional neural network with curriculum learning for source camera identification** [11515-61]

11515 34 **A drone-projected image stabilization: consideration of tilt and scaling** [11515-117]

11515 35 **3D model retrieval based on deep learning approach with weighted three-view deep features** [11515-4]

11515 36 **Discovering inactive students patterns and trends by applying data warehouse and visualisation on campus student record** [11515-103]
