Volume 11538

Proceedings of SPIE 0277-786X, V. 11538

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Electro-Optical Remote Sensing XIV, edited by Gary W. Kamerman, Ove Steinvall, Proc. of SPIE
Vol. 11538, 1153801 · © 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2584631

Proc. of SPIE Vol. 11538 1153801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Electro-Optical Remote Sensing XIV*, edited by Gary W. Kamerman, Ove Steinvall, Proceedings of SPIE Vol. 11538 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LASER SENSING

- 11538 04 **Automatic object recognition within point clouds in clustered or scattered scenes** [11538-2]
- 11538 05 **Characterization of an affordable and compact gated-viewing system for maritime search and rescue applications** [11538-3]
- 11538 06 **Water optical properties in Scandinavian waters and airborne optical sensing** [11538-4]

OPTICAL SENSING

- 11538 07 **A multi-sensorial approach for the protection of operational vehicles by detection and classification of small flying objects (Invited Paper)** [11538-5]
- 11538 09 **Laser ranging used for micro UAV localization: characteristics and limitations** [11538-7]
- 11538 0A **Measurement of spectral transmission through snow from SWIR to LWIR** [11538-8]

OPTICAL SYSTEMS AND TECHNOLOGY

- 11538 0C **Laser sensing from small UAVs (Invited Paper)** [11538-10]
- 11538 0D **In-operation calibration of clock-bias and intrinsic parameters for pan-tilt-zoom cameras based on keypoint tracking** [11538-11]
- 11538 0E **A practical image-based measuring method of laser spot size** [11538-12]
- 11538 0F **Birefringence influence on polarization changes and frequency on optical fiber** [11538-13]
- 11538 0G **Range prediction for color imagers toward a joint TRM and human perceptual model** [11538-14]
