Volume 6981

Proceedings of SPIE, 0277-786X, v. 6981

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE 
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

SENSOR NETWORKS

- 6981 03 **Air Force Research Laboratory's focused long term challenges (Invited Paper)** [6981-02]
L. J. Rose, Air Force Research Lab. (USA)
- 6981 04 **Probabilistic framework for characterizing uncertainty in the performance of networked battlefield sensors** [6981-03]
D. K. Wilson, U.S. Army Engineer Research and Development Ctr. (USA); C. L. Pettit, U.S. Naval Academy (USA); M. S. Lewis, U.S. Army Engineer Research and Development Ctr. (USA); S. Mackay, Atmospheric and Environment Research, Inc. (USA); P. M. Seman, U.S. Army Engineer Research and Development Ctr. (USA)

ARL INTERNATIONAL TECHNOLOGY ALLIANCE

- 6981 05 **The challenge of sensor information processing and delivery within network and information science research** [6981-04]
G. Pearson, Defence Science and Technology Lab. (United Kingdom); T. Pham, U.S. Army Research Lab. (USA)
- 6981 06 **A biologically inspired MANET architecture** [6981-05]
A. Kershenbaum, V. Pappas, K.-W. Lee, IBM Thomas J. Watson Research Ctr. (USA); P. Lio, Univ. of Cambridge (United Kingdom); B. Sadler, Army Research Lab. (USA); D. Verma, IBM Thomas J. Watson Research Ctr. (USA)
- 6981 07 **On the resiliency of wireless sensor networks with circulation graphs** [6981-06]
V. Pappas, D. C. Verma, IBM Thomas J. Watson Research Ctr. (USA); A. Swami, Army Research Lab. (USA); B. J. Ko, IBM Thomas J. Watson Research Ctr. (USA)
- 6981 08 **Policy enabled interconnection of sensor networks using a message queue infrastructure** [6981-07]
D. C. Verma, IBM Thomas J. Watson Research Ctr. (USA); G. Cirincione, T. Pham, Army Research Lab. (USA)
- 6981 09 **Matching sensors to missions using a knowledge-based approach** [6981-08]
A. Preece, Cardiff Univ. (United Kingdom); M. Gomez, G. de Mel, W. Vasconcelos, D. Sleeman, Univ. of Aberdeen (United Kingdom); S. Colley, G. Pearson, Defence Science and Technology Lab. (United Kingdom); T. Pham, Army Research Lab. (USA); T. La Porta, The Pennsylvania State Univ. (USA)

- 6981 0A **Addressing practical challenges in utility optimization of mobile wireless sensor networks** [6981-09]
S. Eswaran, The Pennsylvania State Univ. (USA); A. Misra, IBM Thomas J. Watson Research Ctr. (USA); T. La Porta, The Pennsylvania State Univ. (USA); K. Leung, Imperial College London (United Kingdom)
- 6981 0B **Location dependent heuristics for sensor coverage planning** [6981-10]
D. C. Verma, C. W. Wu, IBM Thomas J. Watson Research Ctr. (USA); T. Brown, A. Bar-Noy, S. Shamoun, City Univ. of New York Graduate Ctr. (USA); M. Nixon, Univ. of Southampton (United Kingdom)

SELF-ORGANIZING, COLLABORATIVE UNMANNED ISR ROBOTIC TEAMS: JOINT SESSION WITH CONFERENCE 6962

- 6981 0D **Bringing UAVs to the fight: recent army autonomy research and a vision for the future (Invited Paper)** [6981-12]
J. Moorthy, R. Higgins, K. Arthur, U.S. Army Aviation Applied Technology Directorate (USA)
- 6981 0E **Tactical service-oriented architecture (Invited Paper)** [6981-13]
J. Gohde, P. Griffin, B. Rickenbach, J. Rush, General Dynamics Advanced Information Systems (USA)
- 6981 0F **Fault tolerant and lifetime control architecture for autonomous vehicles** [6981-14]
A. Bogdanov, Y.-L. Chen, V. Sundareswaran, T. Altshuler, Teledyne Scientific & Imaging Co. (USA)
- 6981 0G **Global image registration using shape space tracking** [6981-15]
L. Yu, Teledyne Scientific & Imaging (USA); J. Molineros, Vialogy LLC (USA); V. Sundareswaran, Teledyne Scientific & Imaging (USA)

PERSISTENT SURVEILLANCE SYSTEMS

- 6981 0H **Autonomous real-time ground ubiquitous surveillance-imaging system (ARGUS-IS) (Invited Paper)** [6981-16]
B. Leininger, Defense Advanced Research Projects Agency (USA); J. Edwards, J. Antoniadis, D. Chester, D. Haas, E. Liu, BAE Advanced Technologies (USA); M. Stevens, C. Gershfield, M. Braun, BAE Advanced Information Technologies (USA); J. D. Targove, S. Wein, BAE Optical Sensor Systems (USA); P. Brewer, D. G. Madden, K. H. Shafique, ObjectVideo (USA)
- 6981 0I **Track-based video compression** [6981-17]
M. J. Carlotto, J. G. Ackenhusen, B. R. Suresh, General Dynamics Advanced Information Systems (USA)
- 6981 0J **Multisensor staring exploitation (Invited Paper)** [6981-18]
M. L. Bryant, Air Force Research Lab. (USA)
- 6981 0K **Analysis of tower locations for the secure border initiative network** [6981-20]
K. W. Brendley, Artis, LLC (USA)

NETWORKS AND NET-CENTRIC SYSTEMS I

- 6981 OL **Management and routing protocols for military networks (Invited Paper)** [6981-21]
T. Gibson, Defense Advanced Research Projects Agency (USA)

NETWORKS AND NET-CENTRIC SYSTEMS II

- 6981 OO **A cross-layer predictive routing protocol for mobile ad hoc networks** [6981-25]
M. Carvalho, Institute for Human and Machine Cognition (USA); R. Winkler, U.S. Army Research Lab. (USA); C. Perez, Institute for Human and Machine Cognition (USA); J. Kovach, S. Choy, U.S. Army Research Lab. (USA)

C2 SYSTEMS

- 6981 OQ **Collaborative agents for C2 of tactical urban combat operations** [6981-27]
G. Jakobson, Altusys Corp. (USA); J. Buford, Avaya Labs. (USA); L. Lewis, Altusys Corp. (USA)
- 6981 OR **Net-centric communities for the tactical environment** [6981-28]
M. Adcock, M. Crocker, C. Morton, General Dynamics Canada (Canada); F. Stein, MITRE (USA)
- 6981 OT **Distributed technology for global dominance** [6981-30]
P. Sapaty, Institute of Mathematical Machines and Systems (Ukraine)

Introduction

These are the proceedings of the 13th conference on Defense Transformation and Net-centric Systems. The papers presented at the conference strongly reflected the inexorable trend toward net-centric systems and service oriented architectures. The conference included the following special sessions:

1. Self-organizing collaborative unmanned ISR robotic teams, held jointly with the Unmanned Systems Technology conference. Collaborative autonomous systems portend the increasing use of autonomic sensor and shooter platforms to perform the D3 (dirty, dull, and dangerous) missions in an era of declining force structures
2. International Technology Alliance. This is a collaborative program between the U.S. Army Research Laboratory and the UK Defence Science and Technology Laboratory.

Invited speakers at the conference included Leo Rose (AFRL), Keith Arthur (U.S. Army AATD), Peter Griffin (General Dynamics Advanced Information Systems), Dr. Brian Leininger (DARPA), Dr. Michael Bryant (AFRL) and Dr. Tim Gibson (DARPA).

Looking ahead, we expect net-centric systems to be increasingly deployed in the field as C4ISR systems undergo their own "revolution." We expect to focus in the future on the networking of sensors and shooters from space to the mud, as well as distributed collaborative teams of robotic platforms.

It is gratifying to see the high level of audience interest in this conference. My sincere thanks go to the distinguished invited speakers, authors, attendees, and my associates on the program committee for another successful conference.

Raja Suresh
