Introduction

This volume contains a selection of reports presented at the VIII International Conference on Optical Technologies for Telecommunications. The conference was held in Ufa State Aviation Technical University, Ufa, Russia, on 26–28 November 2007.

The conference covered a large range of problems in optical technologies in telecommunications. The papers accepted for publication in this volume were chosen from papers presented at the conference on the topics mentioned in the table of contents.

We have no doubt that the proceedings of this conference will be helpful for both scientists and specialists working in the fields of telecommunication technologies.
