

PROCEEDINGS OF SPIE

Photovoltaic Cell and Module Technologies II

**Bolko von Roedern
Alan E. Delahoy**
Editors

**10–11 August 2008
San Diego, California, USA**

Sponsored and Published by
SPIE

Volume 7045

Proceedings of SPIE, 0277-786X, v. 7045

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Photovoltaic Cell and Module Technologies II*, edited by Bolko von Roedern, Alan E. Delahoy, Proceedings of SPIE Vol. 7045 (SPIE, Bellingham, WA, 2008) Article CID Number.

ISSN 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- v *Conference Committee*
- vii *Commercialization of large scale CPV: What lies ahead?* (Plenary Paper) [7043-104]
D. Holland, Solar Systems Pty., Ltd. (Australia)
- xiii *Nanostructures for high-efficiency photovoltaics* (Plenary Paper) [7047-102]
H. A. Atwater, California Institute of Technology (United States)
- xvii *Reliability of PV systems* (Plenary Paper) [7048-101]
J. H. Wohlgemuth, BP Solar International, Inc. (United States)

THIN-FILM SOLAR CELLS

- 7045 04 **Long-term performance data and analysis of CIS/CIGS modules deployed outdoors (Invited Paper)** [7045-04]
J. A. del Cueto, S. Rummel, B. Kroposki, A. Anderberg, National Renewable Energy Lab. (United States)
- 7045 05 **In-situ monitoring of rapid thermal processes (RTP) OF CU(IN,GA)(S,SE)₂ by optical methods** [7045-05]
R. Hesse, H. Rodriguez Alvarez, R. Mainz, J. Lauche, Helmholtz-Zentrum Berlin für Materialien und Energie (Germany); P. Herdin, Sulfurcell Solartechnik GmbH (Germany); D. Abou-Ras, T. Unold, H.-W. Schock, Helmholtz-Zentrum Berlin für Materialien und Energie (Germany)
- 7045 06 **Influence of TCO type on the performance of amorphous silicon solar cells** [7045-06]
A. E. Delahoy, A. P. Stavrides, A. M. Patel, L. T. Le, J. A. Cambridge, Y. Xu, S. Guo, EPV Solar, Inc. (United States)

SPECIAL SOLAR CELLS, MODULES, MATERIALS II

- 7045 07 **Advances in tin-based transparent conductive oxides for thin film photovoltaic applications (Invited Paper)** [7045-07]
C. R. Cording, AGC North America (United States)
- 7045 08 **Antireflective trilayer films fabricated using a filtered cathodic vacuum arc** [7045-08]
N. Biluš Abaffy, J. G. Partridge, D. G. McCulloch, Royal Melbourne Institute of Technology (Australia)
- 7045 09 **Design of anti-reflection coating for spherical silicon photovoltaic devices** [7045-09]
M. Gharghi, S. Sivoththaman, Univ. of Waterloo (Canada)

POSTER SESSION

- 7045 0C **Development of amorphous silicon-based thin-film solar cells with low-temperature coefficient** [7045-12]
K. Sriprapha, National Science and Technology Development Agency (Thailand); S. Inthisang, Tokyo Institute of Technology (Japan); S. Y. Myong, Korea Iron & Steel Energy Research Institute (Korea, Republic of); S. Miyajima, A. Yamada, Tokyo Institute of Technology (Japan); P. Sichanugrist, National Science and Technology Development Agency (Thailand); M. Konagai, Tokyo Institute of Technology (Japan)
- 7045 0D **Characteristics of organic solar cells with various cathodes and n-type organic semiconductors** [7045-13]
J. Chang, H.-L. Cheng, National Cheng Kung Univ. (Taiwan); S.-J. Liu, National Univ. of Tainan (Taiwan); S.-Y. Lin, F.-C. Tang, J.-S. Chen, S. L.-C. Hsu, National Cheng Kung Univ. (Taiwan); Y.-J. Wang, Industrial Technology Research Institute (Taiwan); W.-Y. Chou, National Cheng Kung Univ. (Taiwan)
- 7045 0E **Simulation of the InGaN-based tandem solar cells** [7045-14]
X. Shen, S. Lin, F. Li, Y. Wei, S. Zhong, H. Wan, J. Li, Guangxi Univ. (China)
- 7045 0H **The structural and material properties of CuInSe₂ and Cu (In,Ga)Se₂ prepared by selenization of stacks of metal and compound precursors by Se vapor for solar cell applications** [7045-17]
F. B. Dejene, Univ. of the Free State (South Africa)

Author Index

Conference Committee

Symposium Chair

Ravi Durvasula, Lightfleet Corporation (United States)

Conference Chairs

Bolko von Roedern, National Renewable Energy Laboratory (United States)

Alan E. Delahoy, EPV Solar, Inc. (United States)

Program Committee

Robert W. Collins, Jr., University of Toledo (United States)

Ravi Durvasula, Lightfleet Corporation (United States)

Alan L. Fahrenbruch, Stanford University (United States)

Sheyu Guo, EPV Solar, Inc. (United States)

Martha Ch. Lux-Steiner, Hahn-Meitner-Institut Berlin GmbH (Germany)

James R. Sites, Colorado State University (United States)

Bhushan L. Sopori, National Renewable Energy Laboratory (United States)

Session Chairs

- 1 Special Solar Cells, Modules, Materials I
Raik Hesse, Hahn-Meitner-Institut Berlin GmbH (Germany)
- 2 Thin-Film Solar Cells
Bolko von Roedern, National Renewable Energy Laboratory (United States)
- 3 Special Solar Cells, Modules, Materials II
Alan E. Delahoy, EPV Solar, Inc. (United States)
