Volume 7157
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.
Contents

SESSION 1

7157 02 Phase-shifting interferometry using a multi-mode blue laser diode (Invited Paper) [7157-103]
   J. Chen, Y. Tanaka, S. Nakadate, Tokyo Polytechnic Univ. (Japan); Y. Ishii, Tokyo Univ. of
   Science (Japan)

7157 03 A novel acetylene sensing system based on tunable optical filter [7157-02]
   H. Ding, X. Wu, J. Liang, Xi'an Jiaotong Univ. (China)

7157 04 The stabilization of a multiplexed optical fiber interferometer system for on-line precision
   measurement [7157-12]
   X. Fang, Z. M. Chen, Beijing Jiaotong Univ. (China)

7157 05 Current sensor based on giant magnetostrictive material and fiber Bragg grating [7157-04]
   B. Bao, L. Zhang, Jiangsu Univ. (China)

7157 06 Application of CdTe/CdS core-shell quantum dots in a DNA fluorescence probe [7157-50]
   Y. Jiang, J. Zhang, Z. Dai, S. Xu, X. Lv, G. Zheng, Tianjin Polytechnic Univ. (China); B. Sun,
   Nankai Univ. (China)

SESSION 2

7157 07 Sol-gel coated planar optical sensor for high resolution oxygen measurement [7157-36]
   J. Liu, X. Yu, Y. Zhai, Ocean Univ. of China (China)

7157 08 Development of a wireless crop growth monitor based on optical principle [7157-90]
   X. Li, M. Li, D. Cui, China Agricultural Univ. (China)

7157 09 Development of a soil detector based on an optical sensor [7157-91]
   L. Zheng, L. Fan, M. Li, X. An, China Agricultural Univ. (China)

7157 0A The development of a multi-spectral camera used in the detection of crop growth status
   [7157-92]
   Z. Zhang, M. Li, R. Zhao, X. Li, China Agricultural Univ. (China)

7157 0B Investigation of semi-insulating gallium arsenide photoconductive photodetectors
   [7157-99]
   X. Wang, W. Shi, L. Hou, D. Ma, G. Qu, Xi'an Univ. of Technology (China)

SESSION 6

**7157 0N** Temperature-effect measurement of Fresnel reflection by polarization optical time domain reflectometry (POTDR) (Invited Paper) [7157-56]
S. Yang, C. Wu, Z. Li, Z. Tang, Beijing Jiaotong Univ. (China)

**7157 0O** A novel method to measure 3D displacement by single camera [7157-40]
Y. Yi, The Second Artillery Engineering College (China); K. Yue, Xi’an Jiaotong Univ. (China); Z. Li, The Second Artillery Engineering College (China); Q. Chen, The Command Ctr. of the Second Artillery (China); J. Shao, The Second Artillery Engineering College (China)

**7157 0P** Optical system for proximity operations in aerospace [7157-09]
Y.-L. Zhang, National Univ. of Defense Technology (China); X.-C. Liu, Naval Aeronautical Engineering Institute (China); H.-Z. Lu, National Univ. of Defense Technology (China)

**7157 0Q** The ultrafast photoconductive characteristics of GaAs bulk investigated by optical-pump terahertz probe spectroscopy [7157-60]
B. Jin, Q. Zhou, C. Zhang, Capital Normal Univ. (China)

**7157 0R** Microsensors based on planar microtoroid cavities [7157-62]
J. Xiong, Y. Yan, Z. Ji, S. Wang, North Univ. of China (China); S. Yan, North Univ. of China (China) and Tsinghua Univ. (China); X. Ye, Z. Zhou, Tsinghua Univ. (China); W. Zhang, North Univ. of China (China)

POSTER SESSION

**7157 0S** Adaptive optics based on linear phase retrieval technique: numerical simulation and experimental demonstration [7157-20]
B. Chen, M. Li, Institute of Optics and Electronics (China) and Graduate School of the Chinese Academy of Sciences (China); X. Li, W. Jiang, Institute of Optics and Electronics (China)

**7157 0T** The comparison of CCD and CMOS image sensors [7157-23]
L. Zhang, Beijing Normal University (China), Inner Mongolia Univ. of Technology (China), and China Meteorological Administration (China); Y. Jin, L. Lin, J. Li, Y. Du, Inner Mongolia Univ. of Technology (China)

**7157 0U** An FBG-based optical microphone with temperature insensitivity [7157-24]
D. Zheng, Q. Liu, E. Li, Tianjin Univ. (China)

**7157 0V** Strain of optic-fiber/giant magnetostrictive film structure in magnetic field by finite element analysis [7157-26]
J. Hu, M. Pan, J. Xin, D. Chen, National Univ. of Defense Technology (China)

**7157 0W** Novel FBG temperature sensor eliminating lateral strain cross-sensitivity [7157-28]
W. Wang, S. Li, W. Wu, Z. Xiong, Y. Shi, Guangdong Ocean Univ. (China); J. Lin, Dalian Univ. of Technology (China)

**7157 0X** Measuring FBG’s Bragg wavelength using fiber Fabry-Perot tunable filter [7157-41]
R. Li, J. Huang, B. Tang, H. Gu, Naval Univ. of Engineering (China)

Rongshen Chen, The University of Birmingham (United Kingdom)
Shibin Jiang, NB Photonics, Inc. (United States)
Hai Xiao, University of Missouri (United States)
Fajie Duan, Tianjin University (China)
Introduction

Collected over five volumes are the accepted papers from the International Conference on Optical Instruments and Technology 2008 (OIT’08). It is truly a great pleasure for me that the most recent progress in optical instrumentation technology is involved in the OIT’08 proceedings. I firmly believe that the papers included in these OIT’08 proceedings volumes will provide reference information in up-to-date techniques of optical instrumentation technology.

The International Conference on Optical Instruments and Technology 2008 (OIT’08) was sponsored by China Instrument and Control Society (CIS) and was cosponsored by SPIE. The academic and engineering activities of CIS included the fields of optical instruments, control and measurement, automatic sensor, device and instruments, MEMS/NEMS technology, auto-inspection engineering, and scientific instrumentation. CIS has experienced its developments for more than 20 years. Now CIS has more than 30 branches to cover the related instrument domain and the MICONEX international exhibition has its excellent reputation in high quality. SPIE has given great support to organize this international conference by collaborating with us in the whole organizing process from paper collection to the proceedings publication.

The OIT’08 conference collected over 500 papers from different countries or areas of the world. Over 900 authors came from more than 10 countries, including Canada, Japan, India, Romania, Russia, Singapore, Taiwan (China), USA, Pakistan, Spain and China. Published in these five volumes of the Proceedings of SPIE are close to 400 papers. The technical field of the presented papers at the conference covers a lot of current advanced technologies. The cutting-edge technologies and applications of optical instruments were discussed. Quite a few invited papers gave exciting achievements in the fields of optical instrument technology. It is evident that the OIT’08 conference has provided an excellent platform for participants and colleagues in research and development to share the technical progress and to develop new partnerships or broaden new markets.

Finally, on behalf of CIS and conference general chairs, I’d like to heartily thank our supporters and committee members for all they have done for this meeting. Thanks also go to all authors for their contributions; to all of the participants and friends for their interest, especially those who have traveled great distances and taken their time from their busy schedules to attend the meeting. I am also grateful to the staff of SPIE for their support and collaboration in publishing these volumes.

Zhuang Songlin
Chairman, China Instrument and Control Society
