SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE 
Digital Library

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

TOWARD 4G WIRELESS ACCESS

- 7620 04 **Introduction and comparison of next-generation mobile wireless technologies [7620-03]**
S. R. Zaidi, S. Hussain, M. A. Ali, The City College of The City Univ. of New York (United States);
A. Sana, S. Saddawi, Bronx Community College of The City Univ. of New York (United States);
A. Carranza, New York City College of Technology of The City Univ. of New York (United States)
- 7620 05 **Smooth migration technologies towards next-generation access systems (Invited Paper) [7620-04]**
N. Yoshimoto, NTT Access Network Service Systems Labs. (Japan)
- 7620 06 **Integration of PON and 4G mobile WiMAX networks to provide broadband integrated services to end users [7620-05]**
S. Hussain, S. R. Zaidi, M. A. Ali, The City College of The City Univ. of New York (United States);
A. Sana, S. Saddawi, Bronx Community College of The City Univ. of New York (United States)

HIGH SPEED ACCESS: SYSTEMS AND DEVICES

- 7620 07 **Fiber-radio solutions for in-building high speed wireless networks (Invited Paper) [7620-06]**
M. Sauer, A. Ng'oma, A. Kobayakov, Corning Inc. (United States)
- 7620 08 **Analysis of the spectrum characteristics of a super linear optical modulator [7620-07]**
A. J. Prescod, The City College of The City Univ. of New York (United States) and Corning Inc. (United States); B. B. Dingel, Nasfine Photonics Inc. (United States); N. Madamopoulos, Corning Inc. (United States)
- 7620 09 **Optical heterodyne technique for generating and distributing microwave signals [7620-08]**
A. García-Juárez, Univ. de Sonora (Mexico); I. E. Zaldívar-Huerta, G. Aguayo-Rodríguez, Instituto Nacional de Astrofísica Óptica y Electrónica (Mexico); J. Rodríguez-Asomoza, Univ. de las Américas-Puebla (Mexico); R. Gómez-Colín, A. Vera-Marquina, M. C. Acosta-Enriquez, A. Rojas-Hernández, Univ. de Sonora (Mexico)
- 7620 0A **Cancellation of the IMD3 and IMD5 using opto-electrical predistortion optical transmitter for radio-over-fiber systems [7620-09]**
T.-K. Lee, Y.-T. Moon, H.-S. Kim, Y.-W. Choi, Chung-Ang Univ. (Korea, Republic of)

- 7620 0B **Modeling and performance analysis of an all-optical photonic microwave filter in the frequency range of 0.01-15 GHz** [7620-10]
G. Aguayo-Rodríguez, I. E. Zaldívar-Huerta, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); J. Rodríguez-Asomoza, Univ. de las Américas-Puebla (Mexico); A. García-Juárez, Univ. de Sonora (Mexico); P. Alonso-Rubio, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico)

ADVANCES IN PON AND OPTICAL WIRELESS

- 7620 0C **Application and technical issues of WDM-PON (Invited Paper)** [7620-11]
K. Iwatsuki, NTT Service Integration Labs. (Japan)
- 7620 0D **A novel PON-based mobile distributed cluster of antennas approach to provide impartial and broadband services to end users** [7620-12]
A. Sana, S. Saddawi, J. Moghaddassi, Bronx Community College of The City Univ. of New York (United States); S. Hussain, S. R. Zaidi, The City College of The City Univ. of New York (United States)
- 7620 0E **Wideband optical propagation measurement system for characterization of indoor optical wireless channels** [7620-13]
M. Kavehrad, J. Fadlullah, The Pennsylvania State Univ. (United States)
- 7620 0F **Efficiency of MIMO configuration and adaptive optics corrections in free space optical fading channels** [7620-14]
Z. Hajjarian, M. Kavehrad, J. Fadlullah, The Pennsylvania State Univ. (United States)

POSTER SESSION

- 7620 0G **Statistical analysis on the optical fading in free space optical channel for RoFSO link design** [7620-15]
K.-H. Kim, T. Higashino, K. Tsukamoto, S. Komaki, Osaka Univ. (Japan); K. Kazaura, M. Matsumoto, Waseda Univ. (Japan)

Benjamin Dingel, Nasfine Photonics, Inc. (United States)

- 3 High Speed Access: Systems and Devices
Benjamin Dingel, Nasfine Photonics, Inc. (United States)
Katsutoshi Tsukamoto, Osaka University (Japan)
- 4 Advances in PON and Optical Wireless
Katsutoshi Tsukamoto, Osaka University (Japan)
Raj Jain, Washington University in St. Louis (United States)

Introduction

It is our pleasure to welcome all of you in the SPIE Photonics West 2010 conference on Broadband Access Communication Technologies IV.

Due to the financial bubble in 2009 and the consequences in the whole economy, we are fortunate to have an invited paper on economics of pricing in broadband access to open and set the tone of this conference.

This year we have assembled high-quality technical papers coming from Asia and North America. It provides coherent coverage and latest technologies in various aspects of broadband access from high speed wireless 4G to radio-over-fiber. All these efforts have resulted in a very strong technical program representing the state of the art in the field.

The purpose of this conference is to promote discussions and disseminations of design, development, and performance of various types of broadband access communication technologies. This includes platform technologies such as optical fiber-based, radio-over-fiber-based, photonics-based, copper-based, satellite-based, mobile wireless-based and power-line communications. We have invited a number of well-known speakers to present the current and future trends of these broadband access technologies as well as the economics of pricing in access.

Finally, we strongly appreciate the speakers and authors of all the contributed and invited papers, and the technical program committee members. We also thank the SPIE staff for their help in processing the submissions and organizing the conference. The success of this conference is strongly due them.

Thank you for joining us at the Broadband Access Communication Technologies IV conference.

Benjamin Dingel
Raj Jain
Katsutoshi Tsukamoto
