Space Missions and Technologies

Joseph Lee Cox
Manfred G. Bester
Wolfgang Fink
Editors

5–6 April 2010
Orlando, Florida, United States

Sponsored and Published by
SPIE
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.  
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.
Contents

ON-ORBIT OPERATIONS

7691 02  Intersatellite radiometric calibration for a satellite radar scatterometer [7691-01]
R. Hanna, L. Jones, Univ. of Central Florida (United States)

7691 03  Use of environmental impacts in sensor scheduling [7691-02]
P. J. Shea, Black River Systems Co., Inc. (United States); M. Gioioso, H. E. Snell, Atmospheric
and Environmental Research, Inc. (United States)

7691 04  A method for studying the effects of thermal deformations on optical systems for space
application [7691-03]
E. Segato, CISAS, Univ. degli Studi di Padova (Italy); V. Da Deppo, CNR-IFN, Univ. degli Studi
di Padova (Italy); S. Debei, Univ. degli Studi di Padova (Italy); G. Cremonese, INAF-
Osservatorio Astronomico di Padova (Italy)

7691 05  Zero-G experimental validation of a robotics-based inertia identification algorithm [7691-04]
J. J. Bruggemann, I. Ferrel, G. Martinez, P. Xie, O. Ma, New Mexico State Univ. (United States)

SPACE QUALIFIED COMPONENTS

7691 09  Performances of AlGaN-based focal plane arrays from 10nm to 200nm [7691-07]
J.-L. Reverchon, S. Bansropun, J.-P. Truffer, E. Costard, Alcatel-Thales III-V Lab. (France);
E. Frayssinet, J. Braut, J.-Y. Duboz, CNRS-CRHEA (France); A. Giuliani, M. Idir, Synchrotron
SOLEIL (France)

7691 0A  Print-and-play: a new paradigm for the nearly-instant aerospace system [7691-08]
K. H. Church, C. M. Newton, A. J. Marsh, nScrypt, Inc. (United States); E. W. MacDonald,
C. D. Soto, The Univ. of Texas at El Paso (United States); J. C. Lyke, Air Force Research Lab.
(United States)

COMMUNICATIONS, COMMANDING, AND CONTROL

7691 0C  Combined differential demodulation schemes for satellite-based AIS with GMSK signals
[7691-10]
Z. Zhang, J. Weinfield, T. Soni, Argon ST, Inc. (United States)

7691 0D  Cooperative controls with intermittent communication [7691-11]
D. Shen, G. Chen, DCM Research Resources, LLC (United States); J. B. Cruz, Jr., The Ohio
State Univ. (United States); K. Pham, E. Blasch, Air Force Research Lab. (United States);
R. Lynch, Naval Undersea Warfare Ctr. (United States)
Compact time-resolved remote Raman system for detection of anhydrous and hydrous minerals and ices for planetary exploration [7691-13]
S. K. Sharma, A. K. Misra, T. E. Acosta, P. G. Lucey, Univ. of Hawai'i (United States); M. N. Abedin, NASA Langley Research Ctr. (United States)

Optical receiver design for the ground to space laser time transfer [7691-25]
I. Prochazka, J. Blazej, P. Fort, J. Kodet, Czech Technical Univ. in Prague (Czech Republic)

**SPACE ENVIRONMENT AND SITUATIONAL AWARENESS**

The influence of uncertainties of attitude sensors on attitude determination accuracy by linear covariance analysis [7691-16]
J. Blomqvist, Cranfield Univ (United Kingdom); R. Fullmer, Utah State Univ. (United States)

Space object tracking with delayed measurements [7691-17]
H. Chen, Univ. of New Orleans (United States); D. Shen, G. Chen, DCM Research Resources, LLC (United States); E. Blasch, K. Pham, Air Force Research Lab. (United States)

Canary: ion spectroscopy for ionospheric sensing [7691-18]

Intelligent sensor tasking for space collision mitigation (Invited Paper) [7691-19]

**POSTER SESSION**

Optimize the space combinations of measure-vectors of the integrated star-sensor/gyro systems for spacecrafts [7691-22]
X. Li, J. Yang, J. Yang, H. Jia, Y. Jiao, Y. Yang, S. Guo, National Univ. of Defense Technology (China); M. Yang, D. Wang, Q. Fan, China Academy of Space Technology (China)
Conference Committee

Symposium Chair

Michael T. Eismann, Air Force Research Laboratory (United States)

Symposium Cochair

William Jeffrey, HRL Laboratories, LLC (United States)

Conference Chairs

Joseph Lee Cox, Missile Defense Agency (United States)
Manfred G. Bester, University of California, Berkeley (United States)
Wolfgang Fink, California Institute of Technology (United States)

Program Committee

Marco Bacaloni, The Aerospace Corporation (United States)
Thomas George, ViaLogy PLC (United States)
Steven C. Gordon, Georgia Tech Research Institute (United States)
Richard T. Howard, NASA Marshall Space Flight Center (United States)
David Irvin, U.S. Air Force (United States)
Jeffrey L. Janicik, Innoflight Inc. (United States)
Ou Ma, New Mexico State University (United States)
Greg J. Meyer, U.S. Air Force (United States)
Pejmun Motaghedi, The Boeing Company (United States)
Khanh D. Pham, Air Force Research Laboratory (United States)
Michael J. Sholl, University of California, Berkeley (United States)
Amanda Vaughn, Kinsey Technical Services, Inc. (United States)
Marco Villa, Space Exploration Technologies (United States)

Session Chairs

Introduction
Manfred G. Bester, University of California, Berkeley (United States)

On-Orbit Operations
Manfred G. Bester, University of California, Berkeley (United States)
Joseph Lee Cox, Missile Defense Agency (United States)

Launch Services
Manfred G. Bester, University of California, Berkeley (United States)
David Irvin, U.S. Air Force (United States)
Space Qualified Components
Michael J. Sholl, University of California, Berkeley (United States)
Manfred G. Bester, University of California, Berkeley (United States)

Communications, Commanding, and Control
Khanh D. Pham, Air Force Research Laboratory (United States)
Manfred G. Bester, University of California, Berkeley (United States)

Space Environment and Situational Awareness
Khanh D. Pham, Air Force Research Laboratory (United States)
Greg J. Meyer, U.S. Air Force (United States)

Optics Designs for Space Telescopes
Manfred G. Bester, University of California, Berkeley (United States)
David Irvin, U.S. Air Force (United States)
