PROCEEDINGS OF SPIE

Broadband Access Communication Technologies V

Benjamin Dingel Raj Jain Katsutoshi Tsukamoto Editors

25–27 January 2011 San Francisco, California, United States

Sponsored and Published by SPIE

Volume 7958

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Broadband Access Communication Technologies V*, edited by Benjamin Dingel, Raj Jain, Katsutoshi Tsukamoto, Proceedings of SPIE Vol. 7958 (SPIE, Bellingham, WA, 2011) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Committee
ix	Introduction
xi	Higher-order modulation formats for spectral-efficient high-speed metro systems (Plenary Paper) [7959-01] R. Freund, M. Nölle, M. Seimetz, J. Hilt, J. Fischer, R. Ludwig, C. Schubert, HG. Bach, KO. Velthaus, M. Schell, Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut (Germany)
xix	Advances in coherent detection algorithms (Plenary Paper) [7960-01] J. C. Rasmussen, T. Hoshida, T. Tanimura, H. Nakashima, S. Oda, Fujitsu Labs. Ltd. (Japan); Z. Tao, L. Li, Fujitsu R&D Ctr. (China)
	OPTICAL COMMUNICATIONS PLENARY SESSION
7958 02	Photonic devices for next-generation broadband fiber access networks (Plenary Paper) [7958-01] L. G. Kazovsky, SH. Yen, SW. Wong, Stanford Univ. (United States)
	COMPONENT TECHNOLOGIES FOR ACCESS, METRO AND COHERENT COMMUNICATIONS: JOINT SESSION WITH CONFERENCES 7959 AND 7960
7958 03	Micro-resonator devices and optical broadband access application (Invited Paper) [7958-02] A. E. Willner, L. Zhang, JY. Yang, The Univ. of Southern California (United States)
7958 04	Inherent RF linearized bandwidth broadening capability of an ultra-linear optical modulator [7958-03] B. B. Dingel, Nasfine Photonics Inc. (United States); A. Prescod, The City College of CUNY (United States) and Corning Inc. (United States); N. Madamopoulos, The City College of CUNY (United States)
	NEXT GENERATION TECHNOLOGIES
7958 05	Recent progress in coherent optical communication technologies (Invited Paper) [7958-04] A. Sano, NTT Corp. (Japan)
7958 06	From Stokes measurements to PDF post-processing [7958-05] JJ. Max, Avensys Inc. (Canada); S. O'Reilly, ITF Labs. (Canada)

	ADVANCED PON FOR ACCESS AND METRO: JOINT SESSION WITH CONFERENCE 7959
7958 08	Advances in fiber access networks development: efficient resource allocation and cost effective protection (Invited Paper) [7958-07] J. Chen, L. Wosinska, Royal Institute of Technology KTH (Sweden)
7958 09	Crosstalk analysis of an extended reach hybrid tree-ring PON architecture [7958-08] S. Peiris, N. Madamopoulos, The City College of CUNY (United States); D. Richards, N. Antoniades, The College of Staten Island, CUNY (United States)
7958 0A	A novel hybrid three-band transport system based on a DFB LD with multi-wavelength output characteristic (Invited Paper) [7958-09] HH. Lu, PC. Peng, HC. Peng, CY. Li, HS. Su, National Taipei Univ. of Technology (Taiwan)
7958 OB	Unified cost effective next-generation passive optical network and IEEE 802.16m network architecture [7958-10] S. Hussain, S. R. Zaidi, H. Erkan, The City College of CUNY (United States); A. Sana, Bronx Community College of CUNY (United States)
	CATV AND ROF
7958 OC	Convergence of broadcasting and communications utilizing CATV network (Invited Paper) [7958-11] K. Kumamoto, H. Hoshino, K. Yasukawa, Osaka Institute of Technology (Japan); T. Higashino, K. Tsukamoto, S. Komaki, Osaka Univ. (Japan); K. Inagaki, National Institute of Information and Communications Technology (Japan)
7958 OD	Performance analysis of IM/DD radio-on-fiber link for transmitting multicarrier RF signals [7958-12] T. Higashino, S. Okumura, K. Tsukamoto, S. Komaki, Osaka Univ. (Japan); K. Kumamoto, K. Yasukawa, Osaka Institute of Technology (Japan); K. Inagaki, National Institute of Information and Communications Technology (Japan)
7958 OE	Modulation of relaxation oscillation frequency of a DFB laser by using direct detection [7958-13] A. Baylón-Fuentes, P. Hernández-Nava, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); A. García-Juárez, Univ. de Sonora (Mexico); I. E. Zaldívar-Huerta, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); J. Rodríguez-Asomoza, Univ. de las Américas Puebla (Mexico); G. Aguayo-Rodríguez, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); R. Gómez-Colín, Univ. de Sonora (Mexico)
7958 OF	Development of broadband optical frequency resource over 8.4-THz in 1.0-um waveband for photonic transport systems [7958-14] N. Yamamoto, National Institute of Information and Communications Technology (Japan);

Y. Omigawa, Y. Kinoshita, Aoyama Gakuin Univ. (Japan); A. Kannno, K. Akahane, T. Kawanishi, National Institute of Information and Communications Technology (Japan);

H. Sotobayashi, Aoyama Gakuin Univ. (Japan)

7958 0G	Computer modeling and design analysis of a bit rate discrimination circuit based dual-rate burst mode receiver [7958-19] S. Kota, J. Patel, E. Ghillino, RSoft Design Group, Inc. (United States); D. Richards, The College of Staten Island, CUNY (United States)
	OPTICAL NETWORKS: JOINT SESSION WITH CONFERENCES 7959 AND 7960
7958 OH	Ultra-wide tuning range of reconfigurable optical add-drop multiplexer using photorefractive polymer [7958-15] Y. Wakayama, A. Okamoto, A. Tomita, Hokkaido Univ. (Japan); K. Sato, Hokkai-Gakuen Univ. (Japan)
	OPTICAL WIRELESS ACCESS
7958 01	Broadband ubiquitous femto-cell network with MIMO distributed antenna system over WDM-PON (Invited Paper) [7958-16] K. Iwatsuki, T. Tashiro, K. Hara, T. Taniguchi, J. Kani, N. Yoshimoto, NTT Corp. (Japan); K. Miyamoto, T. Nishiumi, T. Higashino, K. Tsukamoto, S. Komaki, Osaka Univ. (Japan)
7958 OJ	All-optical demultiplexer based on dynamic multiple holograms for optical MIMO processing and mode division multiplexing [7958-17] T. Oda, A. Okamoto, D. Soma, A. Tomita, Y. Wakayama, Hokkaido Univ. (Japan)
7958 OK	Optical wireless networked-systems: applications to aircrafts (Invited Paper) [7958-18] M. Kavehrad, J. Fadlullah, The Pennsylvania State Univ. (United States)
	POSTER SESSION
7958 OL	Next generation wireless technology WiMAX and its integration with EPON [7958-20] S. R. Zaidi, S. Hussain, H. Erkan, The City College of CUNY (United States); A. Sana, Bronx Community College of CUNY (United States); A. Carranza, New York City College of Technology of CUNY (United States)
7958 OM	Techno-economic feasibility studies for solar powered passive optical network [7958-21] K. Ennser, S. Mangeni, S. Taccheo, Swansea Univ. (United Kingdom); S. Aleksic, Vienna Univ. of Technology (Austria)
	Author Index

Conference Committee

Symposium Chair

Liang-Chy Chien, Kent State University (United States)

Symposium Cochairs

E. Fred Schubert, Rensselaer Polytechnic Institute (United States) **Klaus P. Streubel**, OSRAM GmbH (Germany)

Program Track Chair

Benjamin Dingel, Nasfine Photonics, Inc. (United States)

Conference Chairs

Benjamin Dingel, Nasfine Photonics, Inc. (United States) **Raj Jain**, Washington University in St. Louis (United States) **Katsutoshi Tsukamoto**, Osaka University (Japan)

Program Committee

Arjan Durresi, Indiana University-Purdue University Indianapolis (United States)

David W. Faulkner, British Telecom Research Laboratories (United Kingdom)

Mahbub Hassan, The University of New South Wales (Australia) **Mohsen Kavehrad**, The Pennsylvania State University (United States)

Rangaraj Madabhushi, Madabhushi Consultants, LLC (United States)
Nicholas Madamopoulos, The City College of New York (United States)

Dalma Novak, Pharad, LLC (United States)

Jean-Charles Point, JCP-Consult (France)

Ken-ichi Sato, Nagoya University (Japan)

Peter Van Daele, Universiteit Gent (Belgium)

Jeroen S. Wellen, Alcatel-Lucent (Netherlands)

Session Chairs

Optical Communications Plenary Session **Benjamin Dingel**, Nasfine Photonics, Inc. (United States) **Werner Weiershausen**, Deutsche Telekom AG (Germany)

Component Technologies for Access, Metro and Coherent Communications: Joint Session with Conferences 7959 and 7960 **Guifang Li**, CREOL, The College of Optics and Photonics, University of Central Florida (United States)

Werner Weiershausen, Deutsche Telekom AG (Germany)

Next Generation Technologies

Katsutoshi Tsukamoto, Osaka University (Japan) **Raj Jain**, Washington University in St. Louis (United States)

Advanced PON for Access and Metro: Joint Session with Conference 79.59

Raj Jain, Washington University in St. Louis (United States) **Benjamin Dingel**, Nasfine Photonics, Inc. (United States)

CATV and RoF

Katsutoshi Tsukamoto, Osaka University (Japan) **Benjamin Dingel**, Nasfine Photonics, Inc. (United States)

Optical Networks: Joint Session with Conferences 7959 and 7960 **Werner Weiershausen**, Deutsche Telekom AG (Germany)

Optical Wireless Access

Katsutoshi Tsukamoto, Osaka University (Japan) **Benjamin Dingel**, Nasfine Photonics, Inc. (United States)

Introduction

It is our pleasure to welcome all of you in Photonics West 2011 conference on Broadband Access Communication Technologies V. The purpose of this conference is to promote discussions and disseminations of design, development, and performance of various types of broadband access communication technologies.

This year the three optical-communication related conferences, namely; (i) Broadband Access Communication Technologies V, (ii) Optical Metro Networks and Short-Haul Systems III, and (iii) Coherent Optical Communication: Components, Subsystems, and Systems, decided to have integrated programs with multiple joint sessions between them to assemble well-known invited speakers and solicit high quality technical papers coming from Asia, Europe, and North America. These excellent joint sessions are made possible through the cooperation and leadership of all conference chairs involved.

For one, the joint sessions between Broadband Access Communication Technologies V and Optical Metro Networks and Short-Haul Systems III offer comprehensive coverage of various technical aspects of broadband access from the last-mile to short-haul system to metro-wide networks. On the other hand, the joint sessions with Coherent Optical Communication: Components, Subsystems, and Systems introduce the latest developments and advance technologies in optical coherent communication as they slowly penetrate broadband access field. These efforts have resulted in a very strong technical program representing the state of the art in the field.

The Broadband Access Communication conference continues to provide discussions and disseminations for platform technologies such as optical fiber-based, radio-over-fiber-based, photonics-based, copper-based, satellite-based, mobile wireless-based and power-line communications. We have invited a number of well-known speakers to present the current and future trends of these broadband access technologies as well as the economics of pricing in access.

Finally, we acknowledge and appreciate the speakers and authors of all the contributed and invited papers, the technical program committee members, and SPIE staff for all their valuable efforts. The success of this conference is strongly due them.

Benjamin Dingel Raj Jain Katsutoshi Tsukamoto
